Ministers who are not lacking the ense of humor sometimes find themselves inclined to laugh when they know that the dignity of the ministeri al office must be upheld, and they do not dare to even "crack a smile."

A western minister whose piety i not of the kind that makes it impossible, for him to enjoy an amusing situation is fond of telling the following incident: He was sitting in his study one even ng when he was told that a young lady vas waiting to see him in his parlor loing downstairs he found a young lady of perhaps 25 years seated in the parlor. BICYCLES IN JAVA.

Wheeling Is Becoming Popular as an Appusement in the Dutch

Orient. far off Java, where the coffee comes from. Previous to three years ago the silent steed was unknown in the island but now it is estimated that from 3,000

he number is steadily increasing.
"Wheeling," writes Sidney B. Everett, our consul at Batavia, "is confined entirely to Europeans, half castes and Chinese, the Arabs and natives not have ing taken it up. Elderly people do not ride, as they do at home, and women very little, as it is considered immodes ny ladies' wheels here "About 60 per cent. of the wheels in

use here are cheap, and the majority of these cheap ones are German. Thi is due not only to the enterprise of the dermans, which has far surpassed tha fact that people here are very clos and penurious, and always buy the cheapest article obtainable, regardless "Of the better grade of bicycles near ly all are English. These first in the

field. They are very beavy and clumsy, and ought to be easily supplanted by our lighter and better made machines There are distinct signs that a few pec ple are appreciating the fact that pays to buy a good wheel, and if that idea spreads—ideas are slow to spread here—our manufacturers should have

great opportunity.
"Strange to relate, the most fastidi us and the most willing to pay goo prices are the Chinese, who are becoming enthusiastic bicyclists, as they are etter able to stand the heat than Ex

"Although the use of the bicycle preading steadily all the time, the in crease is not at the rate of two year ago. The reason for this is that when reryone who wanted a bicycle had ought one the demand at once ceased and has since been merely from nev comers or boys growing up. The ide of buying a new machine every year, we do at home, is incomprehensible people here, and the wheels the bought two or three years ago will b

made to last until they drop to pieces "The wear on wheels is not very great. Long distance riding is known, although the roads everywher are almost perfect. The sun, however is hot, and the only time one can rid bout the same time in the evening Riding at night, even with a lamp, looked upon with disapproval and su picion, though it is not prohibite Consequently with care there is no reason why a wheel should not last tengers."—N. ONLY TWO-BARRELED CANNON. The Odd Gun Intended for Cutting

Proved a Failure.

The old double-barreled cannon he Mitchell Thunderbolts is now owned by the city, and is on the city hall lot. Capt. Barnett has been instructed to have the cannon mounted at the head of the park on College avenue near the confederate monument. Ther is a history of unique interest tha roes along with this old cannon. In the first place, it is the only double barreled cannon in the world. In the next place, it was invented with a pe-culiar idea in the mind of the in-ventor. It belonged to the Mitchel. Thunderbolts, a company of old mer organized here in 1863 purely for home defense. One of the company, Mr. John Gilleland, invented this cannon, and

had it cast at the Athens foundry. The idea of Mr. Gilleland was one of considerable ingenuity. A 50-foo idea of the inventor was that when the of the cannon they would have a ten ency to diverge, draw the chain tau and mow down an entire company. The company took the cannon out into the country near Athens one day to test is touched off with great ceremony. On of the balls got a little ahead of the ther, and then the mischief was t pay. It had a kind of circular moti-

and plowed up about a quarter of an acre of ground, the members of the company in the meantime scattering n all directions to keep from being hi by the flying chain. The old cannon was never used afte hat except at an occasional democratic ubilee, when charges of powder would be fired. About five years ago the

a few days ago did our people know where it was. Last week it turned up in a junkshop, but it was promptly purchased by the city. Mr. Neumyer, who owned the cannon, had been offered \$50 for it, but when he learned that it wa uarter of an inch thick, put them in a bol spider, and fry them slowly until the offer and swapped it to the city for an old bell.—Athens (Ga.) Banner.

Happy Chance. "Your money or your life!" cried the "Ha, ha!" laughed the artist, and he lrew a pistol.

The artist had no money, and, accord ing to the cities, not much life, but that was not why he laughed. He laughed because he belonged to the school which draws rapidly and boldly, rather than the school which draws laboriously, with great attention o detail .- Detroit Journal.
