Crop-Alfalfa and Sorgham, organism. They do not consult a physician because of the well-founded fear that he will insist upon disgusting "examinations" and "local treatment." Dr. Pierce's Favorite Prescription does away with all necessity for these ordeals. It cures in the privacy of the home. It restores health and strength and vigor to the delicate organs concerned in wifehood and motherhood. It tones, invigorates and builds up the nerves and transforms nervous, overwrought, sickly invalids into healthy, happy wives and mothers. Dr. Pierce is an eminent and skillful specialist who has been for thirty years chief consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y. He will answer, without charge, all letters from alling women. The "Favorite Prescription" is for sale by all good dealers.

that our farmers who raise pigs should give a trial to this spring. I believe alfalfa to be the best pasture for swine of any when it grows well—but that is not everywhere. A few pounds of alfalfa not everywhere. A few pounds of alfalia seed sown in even a quarter of an acre of nicely prepared ground would be but a small venture. Sorghum is another crop that our farmers should not fail to give a trial to. A dollar's worth of seed sown broadcast in a piece of ground, free of weeds, about June 1, might pos-

mends crimson clover for a hog pasture. In a letter to the writer he leaves no room for doubt of its adaptability for swine feeding. In order to get the greatest benefit from this crop of this year's sowing, he recommends that some red clover be mixed with it. It grows much faster than red clover late in the season. Isbould use crimson clover, however, for fall feeding, and for this purpose it need not be sown before June or July. Crimson clover deserves a trial by our farmers. Sow 50 cents' or a dollar's

the New York Journal:

Swine raisers should make it a point to sow pasture crops this spring for their hogs. The two best crops, aside spring litters, all to be fattened for market, two acres should be set aside for pasture crops for the pigs. On one acre sow peas, oats and vetches, and on the other rape. The first acre should be divided into two parts. One half of the vetch mixture should be sown by May 1 (earlier, according to latitude), and the other some weeks later. The proportions for one-half acre may be one-half bushel each of peas, oats and vetches (tares). This crop will be ready for the hogs when five inches high, says a Canadian correspondent of The Country Gentleman, who also advises as fol
