Risking Life

To make a living! And we stand and stare up at the man in the clouds, wondering that any man can be so foolhardy. But what of the business man, who has barely time to snatch a hasty meal, and gulps down a lunch of pie and milk in a few minutes? He too, is risking his life to make a living. Life is sustained by food properly digested and assimilated. The result of hasty eating and irregular meals is "weak" stomach, and a "weak" stomach means a weak man. When the stomach is "weak" the food eaten is not properly digested and cannot be perfectly assimilated, so that there is a daily loss of nutrition, which in time will result in physical collapse.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the assimilation of all the nutritive values of the food eaten, and so builds up the body into sound health and strength.

Mr. Ned Nelson, the celebrated Irish Comedian and Mimic, of 577 Royden Street, Camden, N. J., writes: "We fulfilled an engagement of twelve weeks and the constant traveling gave me a bad touch of that dreaded disease called dyspepsia. I had tried everything possible to cure it till last week, while playing at B. F. Keith's Bijou Theater, Philadelphia, in the Nelson Trio, a professional friend of mine advised me to try Dr. Pierce's Golden Medical Discovery. I tried it, and, thank God, with good results."

Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent *free* on receipt of 21 one-cent stamps to pay expense of mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

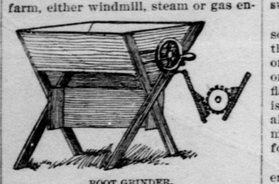
Busheling, Cleaning and Repairing a Specialty

A ROOT GRINDER.

A Homemade Contrivance—Cheap, Speedy and Easy to Run.

The farmer who feeds beets, carrots, turnips and other roots in any great quantity will find it necessary to use some easier and speedier method of reducing them to pulp than chopping up with a spade or the four bladed chopper sometimes used for this purpose. In the illustration, from Ohio Farmer, is shown a cheap homemade grinder which, a correspondent claims, answers all requirements.

As some kind of a power on the farm, either windmill, steam or gas engine or horse, is now frequent, the grinder is illustrated with a belt wheel for power, but if desired a crank and fly wheel may be used and the grinder operated by hand. The manner of making the hopper, attaching legs, braces, etc., is well explained in the complete illustration. The interior or main working parts are shown in the sectional cut. "A" is a triangular shaped strip of wood extending across rear side of box, firmly nailed in place behind the spiked cylinder "B," which revolves and does the grinding, and "C" is another wooden strip having teeth like the cylinder extending across front side of box and fitted in grooves or small strips at ends of hopper in such a way as to serve as an adjustable concave. The cylinder teeth may be ordinary 12 penny spikes, the heads cut off, the remainder of spikes driven into cylinder, leaving about one-half inch projecting and the projecting ends filed sharp, but it will be better to make teeth of one-quarter inch square bar iron cut 2¾ or 3 inches long, one end of each tooth flattened on an anvil, chisel shape, and cooled while redhot by immersion in cold salt water. The other ends of teeth may be cut with a screw thread and teeth screwed into the cylinder, leaving one-half an inch or so of the chisel end projecting. The distance the cylinder teeth are placed apart and the position of the movable concave, the teeth of which should intersect those of the cylinder, will determine degree of fineness to which the roots may be reduced.



ROOT GRINDER.

The conducting spout shown in the illustration of the completed grinder is not absolutely necessary. It is simply a continuation of the back board or boards of the hopper box and has a couple of light side boards.

AT WINTER'S WIND UP.

The Prompt and Diligent Bee All Ready For Spring Work.

Bees begin work much earlier in spring than the ordinary farmer, and those who think bees do not require looking after until warm weather comes in are very much mistaken. Bees begin to draw pretty heavily on their stores to feed the brood long before warm weather makes its appearance in spring. If a colony succeeds in ... strong in numbers, it is building ... they consume a large necessary that ... ore amount of stores.

Bees begin breeding heavily ... they have an opportunity to gather honey from flowers, and to make strong profitable colonies they must have a good supply of reserve stores in the hive. If they are not thus supplied, they will certainly fall short of making colonies that will produce the best results during the honey harvest. However, not all depends upon food. Plenty of reserve stores and all the feeding we can do will not make old, inferior queens lay enough eggs to produce a good colony, and it is only by good management during the fall previous in requeening colonies with good young queens. It seldom pays to keep a queen more than one year and not more than two at the best. Old queens are content with half a hive full of bees and will make preparation to swarm with these conditions, and the result is a failure in honey and in good swarms also.

Colonies are frequently found not only with old, inferior queens thus, but often with no queen at all at the wind up of winter. Such care of course worthless unless we can procure queens for them, which is difficult to do at this season of the year. We may save the bees by uniting them with other colonies, and this is the proper thing to do with them, and the hive with empty combs or honey should be placed away securely from robber bees, concludes A. H. Duff in Kansas Farmer.

Seeds Coming Up Irregularly.

It is a common experience for seeds to come up irregularly—some in a few days after sowing, others not for weeks. Meehan thinks it evident that this peculiarity is in the seeds themselves and has little reference to their treatment by the cultivator.

Agricultural Brevities.

Sow clover on late, light snowfall.

Clean up the cellar, sort over remaining produce and get rid of decaying roots, vegetables and fruit.

Watch well the plants under glass. Frosts gives many surprises.

Test clover seed in a homemade germinator—a double piece of flannel, dampened, placed between two plates and kept in warmth of an ordinary living room.

Pruning is in order for trees, bushes and vines.

Forcing peas in pots under glass is a new wrinkle.

The potato is the natural plant to follow forest and grass lands.

EUROPE WANTS FLAX.

America's Opportunity to Supply It, Prices Exorbitant.

There never was a more opportune time to introduce American flax into Europe than the present.

The annual flax markets in December at Breslau, Germany, and Trautenau, Bohemia, were largely attended, but very little business was transacted on account of the exorbitant prices of raw flax. Russian raw flax is going up in price daily, and it is evident that the material on hand in Europe will not cover the demand for consumption.

The flax harvest of Russia this season is probably 40 per cent less than that of last year, although the harvest of 1899 fell short of being an average one. The worst feature about Russian flax of this season is now disclosed—it is not only wanting in quantity, but also in quality. The price of the raw material this year has increased threefold compared with previous years.

It has been said by growers and dealers that four years of good harvests in Europe will be necessary to bring flax down to a normal price.

At the present time Russian flax meets with no effective competition in Europe. The flax spinners of Germany, Belgium, Austria, France, Great Britain and Italy are chiefly dependent on Russian flax, the production of raw flax in those countries being only an insignificant percentage of their consumption.

The spinners of Germany, Austria, Belgium and France have made an agreement that on and after Jan. 1, 1901, only 85 per cent of their spindles shall be operated.

Austrian flax spinners have united and bought one of the largest Bohemian mills, with 12,000 spindles, with the positive agreement that the machines are to be sold and that the mill shall never again engage in the spinning of flax.

All this trouble arises solely from want of raw flax. European flax spinners hope that American growers will take advantage of this opportunity to introduce flax into Europe.

It is certain that American flax could at all times successfully meet Russian competition. It was only the other day that I learned from a German flax expert that the American flax fiber on the average is much superior to the Russian.

So reports W. K. Herzog, consul at Zittau.

The Popular Maple Sirup Package.

What is the most popular style of package for sirup and sugar? Through wide acquaintance with the wholesale trade an Orange Judd Farmer correspondent answers: The gallon can for sirup is the general favorite, preferably full measure and with a screw top. Consumers expect the sirup to be of good body and good color. In some of the western markets these cans are packed in barrels in sawdust and in this way save a little in the cost of package and freight. The half gallon can is a good seller in New York city and also in Chicago and some points of the northwest, yet it is not the standard size. Sirup packed in bottles—quarts or five to the gallon—are not special favorites.

So far as sugar is concerned, wholesale dealers as a rule prefer the tin buckets containing about ten pounds and bricks weighing about one pound. The brick of fair size is in more general favor than any other one shape.

PERCHERON STALLION.

BRILLIANT 1942.

Brilliant is a beautiful black-grey 5-year-old stallion and will make an 1800 lb. horse at maturity, bred by Wm. Pader, Greenville, Pa. He is full blood Percheron, a grandson of Dunham's Brilliant and out of the imported mare Antoinette. He is one of the finest young stallions to be found anywhere, and is a sure and fine breeder.

STORM BIRD 9459.

Sire Lord Russell, full brother to Maud S 2:08¼. Dam Storm 2:26¼, dam of Typhoon 2:28, Gale 2:27 and Storm Bird 2:35 at 4 years, out of Green Mountain Maid, dam of 9 in the 30 list and the great Electioneer. He is a beautiful bay stallion 15½ hands high and a perfect model of a blooded horse. He has proven himself a very fine breeder, having sired some of the finest drivers in the county.

These two fine stallions will be found at my farm during the summer of 1901, near Isle, Franklin twp., where horsemen are respectfully invited to call and see them.

TERMS—$10 for either horse.

ALONZO McCANDLESS.

San Jose Scale.

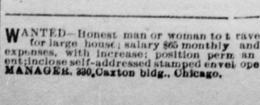
While it can ... undoubtedly be asserted ... be a permanent ... that San Jose scale is ... the menace, it by no means follows that ... profitable growth of deciduous fruits is seriously menaced on this account. The experience in California, covering many years, has abundantly demonstrated that this scale insect can be controlled, and the more recent experience in the east points indubitably to the same conclusion. In other words, according to Entomologist Marlatt, by proper repressive and remedial treatment an orchard can be protected from serious injury and kept in a good paying condition so far as influenced by the San Jose scale.

It is certainly very unwise and wasteful to dig up and burn a large portion of an orchard because it is infested with this scale insect, especially since the replanted stock, even if clean when purchased, would, with little doubt, be in the same condition of infestation in a very short time.

How to Lay Tile.

To drain a wet strip two to four rods wide a Rural New Yorker writer advises:

First, see that you have a good outlet for the water; second, dig a narrow ditch along the center of the wet strip deep enough to drain the land, say three to four feet, according to the nature of the soil. If it is liable to settle down much after the water is drawn



LAYING A TILE DRAIN.

off, it should be deeper than it would otherwise. Trim the bottom of the ditch carefully to a true grade. A string stretched over the center of the ditch is a very efficient help in getting both line and grade.

The line of the tile should be as straight as the circumstances will permit and the tile laid to a true grade, which may be ascertained exactly by measuring down from the string. A sag in the tile is sure to be filled with silt sooner or later, destroying its usefulness.

I would not use smaller than four inch tile. If there are springs, they must be provided for. When the bottom of the ditch is very truly and carefully brought to grade, the tile may be laid to end along the bottom, the joint covered with an inverted sod to keep loose dirt out and the ditch filled up.

Order a pound can with the "BANNER" Recipe Book from your grocer. If he can not supply the ... send your address to B. B. P. Co., P. O. Box 245, Pittsburgh, Pa., and we will mail the NEW Recipe ... 1 of Oct.

No Six O'Clock Dinner Complete Without a

STRAWBERRY CAKE.

To the yolks of three eggs, beaten, add one cup white sugar, one-half cup of butter, one-half cup sweet milk, two cups flour, having in it one measure "BANNER" Baking Powder, the whites of three eggs beaten stiff; bake in jelly cake pans; when cold, and just before eating, place in layers, covering each one with strawberries which have previously been sugared. Whip one pint of cream, flavored with vanilla, to a stiff froth, and add to it the well-beaten whites of two eggs and one-half pound powdered sugar; mix it all lightly and carefully together; spread the whipped cream over the top of the cake, with a sprinkle of strawberries.

R. L. KIRKPATRICK,

Jeweler and Graduate Optician. Next to Court House

Why is C. E. MILLER'S Shoe Store So Popular?

SOME REASONS

First. He keeps a strictly up-to-date shoe store, always studying the wants of his customers, trying to please them both in style and price.

Second. While his styles are the very latest, such as a good dresser would want, his prices are very moderate, and you don't have to have all kinds of money to buy shoes at Miller's.

Third. He controls and sells the best lines of Men's and Ladies' Shoes in the U. S., namely—for Men, the "Walkover" and "Douglass," union-made shoes; and for Ladies the "Delsarte" for $3.50, the "Herrick" for $2.50 and $3.00 and Cincinnati goods for $2, $2.25, $2.50 and $3.00.

Fourth. He gives special attention to the selection of his cheaper grades of shoes. Just call in and look over his 98c line, now stronger than ever. Men's Buff Shoes, congress or lace, tip or plain toe, 98c. Ladies' Shoes in Tan and Black, heavy and light soles, at 98c. Misses' and Children's Tan or Black Shoes 50c, 75c or 98c. Boys' and Youths' Shoes in Tan or Black at 98c.

establishment, will call at your house take away your dirty carpets and return them in a day or two as clean as new.

All on a summer morning—Carpets, rugs and curtains thoroughly cleaned on short notice.

CANCER AND TUMOR INSTITUTE.

Cancers can be cured without the knife. Dr. C. Steinert of 93 Seventh avenue, Pittsburg, Pa., has discovered a new remedy that cures the cancer and tumor. He has cured 900 people without fail, and has treated patients when Dr. Burgoon's hospital at Sewickley and hospital at Rome, N. Y. have not cured, but Dr. Steinert has successfully treated several of them. It makes no difference where the cancer is located—he has cured more than all the cancer quack doctors, and anybody stopping at his office can see the wonderful cures of cancer which he has for safe keeping. Remember that Dr. C. Steinert is the only cancer doctor in Western Pennsylvania and has removed a cancer in 3 to 8 days. Patients can be treated in their own homes. Also piles, liver, kidney, eczema, lupus and all diseases of the human family cured.
