says:

"From a study of the habits of the plgs pasturing on rape I should say that the best results would be secured by sowing the rape in rows 24 to 3 inches apart at the rate of about three pounds of seed (Dwarf Essex) to the acre. When thus sown, this can be cultivated by horsepower when young and has a tendency to branch out and and has a tendency to branch out and develop a large leaf crop.

develop a large leaf crop.

"It is most interesting to watch the niceness of discrimination exercised by your practiced rape eating pig as he strolls leisurely down the row and selects the juicy leaves that best please his fancy. I have observed, too, that your trained pig is equal to the best of chemists in picking out those parts of the plant most valuable for food. He soon learns to shun the large or old leaves and feasts upon the young, the

der, the juicy." The cost of growing an acre of rape, ncluding rent of land, has been estinated at \$14.17.

The cut shows a plot of Dwarf Essex ape at the upper Michigan station on June 16 last year. Aside m slight damage to leaves by cabage worms, the plants grew to per-ection, reaching a height of 36 inches "If he is a tenor," returned the mer

tubble growing new, thrifty plants tw to six inches high in spite of the light September and the killing October

The first snow fell on Nov. 7, reach ing a depth of 18 inches on Nov. 15. The thermometer had registered as low as 16 degrees, yet on Nov. 16 the new grown plants under the snow, as well as the lower leaves of the old plants on the remaining uncut portion and thrifty, while the leaves above the

and Worked Lumber of all Kinds

A cursing contest.

A professor of languages some years ago on returning from India remarked

upon the paucity phrases among the British working classes when compared with the abun-dance supplied by the orientals of simflar rank. To prove this he gives a case which came under his own notice. He had dismissed a manservant for Two crops that have lately assumed prominence in this country are Canada field peas and rape. In a recent Michigan test the Improved Prussian Blue and the Black Marrowfat varieties of peas were used. The Improved Prussian Blue variety was sown on May 17 and harvested on Sept. 5. The vines were then 19 feet long, and the yield was 32 bushels per acre.

The Black Marrowfat was sown on The Fine he dwelt upon every detail of his anatomy, from the top of o'clock he sought an interview with his

ther caused both varieties to blos-mill harvest time. Both are rec-ended as very strong growers, and men entered the same compartment and interspersed their remarks with the commonest forms of "swearing." The professor politely asked them to desist, whereupon he was told to mind his own - business. He at once con menced to translate into English som specimens of eastern oaths which he had heard a Calcutta merchant's servant use to a missionary's servant. The men sidled from him as if he had the plague and at the next station sought another compartment.-Liverpool Post.

The Common Frog. If a traveler were to announce that he had discovered in some remote part of the globe an animal whose tongue was rooted in the front of its mouth, the tip pointing down the throat, and breathing was so peculiar that the sur-est way of suffocating it was to keep its mouth fixed open, there would be some little curiosity about the "find."
If the discoverer went on to say that the creature began existence as a fish, breathing by means of gills and hav-ing a heart of only two chambers, but had undergone transformation, discard-ing gills and gradually acquiring lungs, free from insects.

Black Marrowfat and so in the truest and most literal The fact that the Black Marrowfat was sown on much lower ground may account for the difference in yield.

As the question of cheap pork production assumes greater proportions, forage peculiarly suited for pigs must certainly come to the front. It is well known that the pig thrives on grass or green feed alone, but the importance and necessity of feeding him on such are very often overlooked. The conditions governing feeding operations,

take precedence over others better adapted to the end in view.

Of the various crops more or less extensively cultivated for pig feed during the past few years one which has given extremely satisfactory results is rape. The variety best suited for forage is Dwarf Essex.

As an element in the production of their famous bacon Canadians are giving it considerable attention. In certain districts it is now largely used as a forage crop for sheep, swine and steers, and undoubtedly still larger areas in the future will be sown for this purpose. One of these farmers says:

"From a study of the habits of the labs of the labs are pressuring an area of the labs are pressuring an area of the labs stored up, nor could the best purpose. One of the babits of the labs stored up, nor could the best purpose of paye graphed.

The Gain In Going Through College.
The benefit that a man who cares for a college education gets by going to college is a benefit that is already his at the time he graduates. During the four years on three years which he spent at college he made himself a richer man for life. The world is a larger, more varied, more interesting place for him. His life will be a broader, more liberal, more satisfying life than it would have been had he not spent a few of his best years in contact with the results of high thought and in the daily performance of invigorating intellectual tasks. The ups and downs of the Stock Exchange cannot take away from him what he has thus stored up, nor could the best fille of the money god have enabled.

"I say, Scribbler," sald Sappy, "how

on learns to shun the large or old twee and feasts upon the young, the cleval of you! Dooced stupid of him, though!" — Catholic Standard and

The Mermaid's Pun Neptune had returned from the mar-ket with a fine fish.

"How many pounds does it weigh?" inquired a mermaid. "He is about a ten-er," responded

at the close of the season.

The greatest portion of the plot was Mcptune was stung by the retort, cut with a mowing machine at various but was much too polite to reply in times between Sept. 20 and Nov. 5, the kind by any allusion to her scales.— New York Marine Journal.

Why is

C. E. MILLER'S Shoe Store So Popular?

SOME REASONS

First. He keeps a strictly upto-date shoe store, always study ing the wants of his customers, trying to please them both in style

and price. Second. While his styles are the very latest, such as a good dresser would want, his prices are very moderate, and you don't have to have all kinds of money to buy

shoes at Miller's: Third. He controls and sells the best lines of Men's and Ladies'
Shoes in the U. S., namely—for Men, the "Walkover" and "Douglass," union-made shoes; and for Ladies the "Delsarte" for \$3.50, * the "Herrick" for \$2.50 and \$3.00 ************************* and Cincinnati goods for \$2,\$2.25,

\$2.50 and \$3.00. Fourth. He gives special attention to the selection of his cheaper grades of shoes. Just call in and look over his 98c line, now stronger than ever. Men's Buff Shoes, congress or lace, tip or plain toe, 98c. Ladies' Shoes in Tan and Black, heavy and light Full bine of Foreign and soles, at 98c. Misses' and Children's Tan or Black Shoes 500 Good Fit and Workmanship 75c or 98c. Boys' and Youths' Shoes in Tan or Black at 98c.
