THE HOME MARKET IDEA.

Feeding Crops on the Farm-Frozen Wheat Valuable For Stock. It has med to the Utah station who are engaged in the f hay and grain might, age, add lamb feeding to This would afford a home market for the products of the farm, assist in maintaining the fertility of the soil and would give profitable em-ployment during the winter months. During the summer of 1809 a heavy frost injured a considerable quantity of fall wheat throughout the state. In an experiment by the station frosted

RACK USED IN FEEDING SHEEP. wheat was fed to one set of lambs good wheat to another, and the remaining two sets received mill screenings.

The roughage used in the experiment was the same in all of the sets—a good quality of alfalfa hay.

wheat set.

either good or frosted wheat.

The frozen wheat used in this experiment was of medium grade, neither the highest nor the lowest, and it gave better returns in rate of gain than wheat of good milling quality. This It cures Inflamed or Caked Breasts and Sore Lips or Nostrils. Corns, Bunions, Sore and Chafed Feet, Stings of insects, Meaning Bites and Sunburns.

When to f good milling quality. This result agrees with that obtainable at the Canadian experiment station, where it is often found necessary to dispose of large quantities of frozen wheat.

From the standpoint of composition is a whole, the better grade of taken as a whole, the better grade of frozen wheat ranks little inferior for stock feeding to that fully ripened. The composition of both kinds of screenings shows a high feeding value, though the large percentage of crude fiber indicates that they are less digest-

ible than any of the wheats.

On account of the numerous fine seeds the first screenings contain, they will give better results fed to sheep

than to cattle and pigs.

In Manitoba and other portions of Canada, where there are frequently large quantities of frozen wheat, it has been tested, ground and soaked for 12 hours before use. One hundred pounds of frozen wheat were found equal to 791 pounds of skimmilk in increasing the live weight of pigs. The pork was considered excellent, much superior to that of hogs fed on peas alone. The quality of beef from steers fed on fro-zen wheat was pronounced to be partic-ularly excellent by the butchers and by the members of eight different households who examined it critically

when served as roast beef.

The various feeding trials indica frozen wheat to be practically equal to a mixture of wheat, oats and barley for hog feeding and to stand very high as a concentrated food for fattening

A GOOD MARKER. .

For the marking of tomato ground Farm Journal correspondent uses a marker made as follows: The head feet 7 inches long and 6 inches wide cornered to suit the wood.

These three pieces are bolted to the servants, crockery, fuel and table linen head at exactly four feet from the center to the center of marker boards. At may be interesting to note that the cap the same time bore in the head holes to tain of a war vessel does not eat with suit the markers at 3 feet 31/2 inches; the other officers, but has a separat also put in a stout handle 11/2 inches in diameter and 21/2 feet long, 15 inches from each end of the head, to control only duties are to wait on him. On

the side drift. Let the shafts in at the head so as to give marker boards an in cline back of 15 inches out of th square of the shafts.

The advantages of this marker are that it does not cut the soil to invite washing. The middle marker takes ou all horse foot marks. The outsid marker runs in the last row made. Th back incline of the markers makes it run steady. Now we have the field run steady. Now we have the field laid off and not a horse foot mark ex-

WHAT "JACKY" GETS TO EAT IN UNCLE SAM'S SERVICE.

The American Navy Is Better Fed Than Any Other Navy In the World. What It Costs the Officers to Run the Wardroom Mess.

The United States government gives its sailors only 30 cents a day each to live on, but the American navy is bet-ter fed than any other navy in the world. In fact, "jacky" lives better than the average mechanic on shore. As the appetite of a seafaring man cannot be appeased by angel food the provisions are of the most substantial

All naval vessels are liable to be sent on long voyages or to be station where markets are inaccessible, and the stores purchased for the crew mus be such as will keep for a long tim and not become damaged by change of climate. Naturally salt pork, corned beef, hard tack, beans, flour, sugar, canned fruits and vegetables are car can be made. At sea fresh meat and vegetables are not to be had, but while in port or within reach of a market the navy regulations require the issu-ance on certain days of these desirable additions to the food supply. In the olden days no fresh meat was included good wheat to anome, ing two sets received mill screenings. No. 1 screenings is that which comes from the elevator first, and this contains clover seeds, alfalfa seeds and the seeds from weeds of various kinds, the seeds from the seeds f ostly of cracked, broken and shrunk-wheat. day known as the "harness cask."

The enlisted men are divided into

messes consisting of from 18 to 24 men each. Every month the mess elects one of its number to the position of caquality of alfalfa hay.

The sets on both grades of screenings made better gains than that on good wheat and one of them better and the other almost as good as the frozen the other almost as good as the frozen that the other almost as good as good as the frozen that the other almost as wheat set.

Taking into account both the rate and dust," presumably from his handling the cost of the gains, the results of this experiment indicate that it is more profitable to feed screenings than either good or frosted wheat.

dust," presumably from his handling flour. The ship's cooks then prepare its usually allowed from four to six commuted rations—that is, the caterer is given the value of such rations cash and is thus provided with a fund of from \$36 to \$54 per month with which to buy fruits, vegetables, fish, butter and other items which are not included in the list of articles furnished by the government. To furnish the table still further it is customary for each man to "chip in" a dollar or two each month out of his own pocket.

The old time shellbacks looked with

> the new style navy men, who on holi-days and frequently on Sundays have delicacies like roast turkey with cranberry sauce, celery, oranges, banan-and even ice cream. If "jacky" has one failing in the commissariat line, it is his craving for ples of any constituency or nationality He will eat them on any occasion and in any place. The ship's cook, if he be ambitious, takes advantage of this and makes up a tempting array of pies from materials which he purchases

from the paymaster and retails them to the sallors. The government does not discrim nate in the allowance for food supplies in the navy as between officer and en-listed man—that is, it did not up to a year or two ago, when every man in the ship, from the admiral down to a coal heaver, received 30 cents each day. Now the discrimination is that the coal heaver continues to draw his 30 cents, while the admiral and all other officers except the gunner, carpenter, pharms cist, chief machinists and the naval cadets receive absolutely nothing for their subsistence on board ship. Many who visit naval vessels and are enter-tained at dinner or luncheon are heard to remark that the government pro-vides very good living for its officers, A Horse Marker Which Runs Stead-ily and Takes Out All Hoof Marks. not thinking that the entire cost of the repast has come out of the officers' own

pockets. The cost of an officer's living on of our vessels varies considerably. piece is of pine wood 3 inches thick, 8 a port where much entertaining has teet 7 inches long and 6 inches wide. The three markers are of oak, 1½ priced markets the mess bill, as it is inches thick, 7 inches wide and 2½ feet long. They are beveled at the lower end corners to show three inches on the ground in width, plated with oneeighth inch fron four inches wide and food and the incidental expenses of the mess, as the government furnishes all establishment for himself and is or vided with a cook and a steward who flagships the admiral also eats alone. The wardroom mess usually includes all officers above the grade of ensign and on most vessels consists of fro 10 to 20 members. Junior officers and naval cadets constitute another mess known as the steerage mess.-C. A. Mo
