seme thing in disease. Many a time the doctor says of a man whose condition is dopeless, "If you'd begun in time you might have been cured."

This is especially true when the disease affects the lungs. Delay is dangerous. The timely use of Dr. Pierce's colden Medical Discovery will result in a quick cure of deep-seated coughs, tonchitis, and weak lungs. Even when been orthings have been frequent and profuse "Golden Medical Discovery" has been used time and again with the result of a perfect and permanent cure. Mr. McCauley, of Leechburg, Armstrong Co., Ps., had eighty-one hemorrhages, and after other medical aid had failed be was completely cured by the use of "Golden Medical Discovery,"

Accept no substitute for "Golden Medical Discovery,"

Accept no substitute for "Golden Medical Discovery,"

There is no other medicine justice Mr. Elmer

icine just as good for "weak" lungs.

"I was in poor health when I commenced taking Dr. Pierce's medicine," writes Mr. Elmer Lawler, of Volga, Jefferson Co., Ind. "I had stomach, Etdney, heart, and lung troubles. Was not able to do any work. I had a severe cough and hemorrapy of the lungs, but after using your medicine which all the lungs and the severe cough way. Took about at bottles of the Golden Medical Discovery' then, sed last spring I had orippe and it settled on my lung, leaving me with a severe cough. I had the doctor, but he didn't seem to help me any; so I commenced your medicine again and took three or four bottles of the 'Discovery' and two vials of Dr. Pierce's Pelicts, and that straightened me up. I feel like a different person. I gladly recom-

measurements. It should be carefully constructed, so as to be water tight, and should be strengthened by four iron bolts or rods across the ends, one each at the top and bottom. A good double acting force pump may be ob-tained from any of the leading pump manufacturers at a cost of from \$10 to The more economical spray tips on the amount of liquid required are the different styles of cyclone nozzles, the best form of which is known to the

The Danger of Making a Specialist paratus on Large and Small Scales-Main Points of Its Use. of a Beginner. It is generally to the interest of an Successful results in spraying require the breaking up of the liquid into a line mist. The essential features of such an apparatus are a force pump, several yards of one-half inch cloth renforced hose with bamboo hoisting rod and a spray tip. The size of the apparatus will depend on the amount of vegetation to be treated. For limited garden work and for the treatment. tted garden work and for the treatment specialist, a prig in his teens, cocksure of low plants the knapsack pumps or the small bucket force pumps are suitable, the former costing about \$14 and the latter from \$6 to \$0. Ready fitted pumps—knapsacks and others—for the application of insecticides are now made by all the least

cides are now made by all the leading pump manufacturers of this country pump manufacturers of this country and also large reservoirs with pump attached for extended orchard operations, the purious of the letter which to place a lad are not the big establishments, but the small ones, where every class of work is done and where trons, the price of the latter ranging from \$25 to \$75. The cost of a spraying outfit for or- those replete with every appliance and minutely subdivided into sections and

chard work may be greatly reduced by minuted groups.

The large state of the character of t The best training for a lad today is tures with a home constructed tank or barrel to be mounted on a cart or wagthat which he can evolve for himself. The greatest evil that can befall him about 150 gallons is a very satisfactory size and may be conveniently made 4 more while in his teens. Yet that is feet long by 21/2 wide by 2 deep, inside what must happen if he spends several years tending machines or doing repetitive, unvarying tasks in one big es-The best training, therefore, today is

that gathered by the peripatetic youth. If a lad cannot gain experience in one place, he should move about, gathering as much as he can accumulate with one firm, then on to another, and attending training schools as opportunity offers. His views become broadened, he becomes self reliant, and in time, having found his true work, he may settle down as a specialist.

DRESS UP FOR SUICIDE.

ozzles are also on the market. The mmon garden spraying and hose nozzles are much too coarse for satis-factory work and are wasteful of the "If I should ever be called upon t furnish indisputable proof of the in herent pride of woman," said a police sergeant, "I would point at once to her formation about apparatus in a recent culletin on important insecticides, furinvariable rule of dressing up in he best clothes when she goes out to com ther advises that a prime essential in spraying, especially where the large mit suicide. In my experience on the force I have had occasion to handle a good many suicides and afterward investigate their personal affairs, and in every instance I have found that the poor unfortunates prepared themselves for death by donning their best bib and

> "The majority of the printed reports of suicides say that the clothes of the dead woman were 'good' or 'well made' ing suicide owns a silk waist, she ears ft. Her broadcloth skirt and silk etticost naturally go with this gar-nent, and she selects her best shoes. "I have looked up the history of many of these respectably clad suicides and have found that they owned but one gown with which they could make a decent appearance on the street and that that one good dress was chose without exception as the appropriate garb in which to make the exit from

this world's stage. It makes no difference what manner of death is chosen, the costume is carefully selected. reservoirs are employed, is to keep the liquid constantly agitated to prevent "Let a woman sleep her life away un der the influence of drugs or burn her the settling of the poison to the bot soul out with acids or sink into the slime of the river, she clothes herself in plished by constant stirring with a pad-dle, by shaking, but preferably by throwing a stream of the liquid back Her instinct of gentility and elegance her most becoming garments and seeks end with apparent tranquillity into the tank. Many of the larger pumps are now constructed with two even in the face of death she shrinks from a public appearance in ting raiment."—New York Sun. discharge orifices with this latter ob-

ject in view or are provided with spe-cial agitators, and the use of such is recommended. In spraying orchard trees it will be The Leibnitz range attains enormor found convenient in going between the rows to spray on each side, half of altitudes above the average level of the noon's surface and is sometimes seen sch tree in the row at a time and finprojected far beyond the regular curvaish on the return rather than attempt to spray all sides of one tree before ture of disk, thus destroying the circ lar contour and giving it a notched or taking up another.

The object in spraying is to coat serrated aspect. Several of the peaks of these southern mountains measure every leaf and part of the plant as lightly as compatible with thorough-30,000 feet in altitude, while one has height of 36,000 feet. All the chief mountains of the moon which can be ess, and to avoid waste in doing this a mist spray is essential. The applica-tion to any part should stop when wa-ter begins to drip from the leaves. A seen from the earth with a telescop have had their heights ascertained. The German observers, Beer and Maedler, light rain will not remove the poison but a dashing one will probably ne resistate a renewal of the application. have calculated the height of no fewer than 1,095 lunar mountains. The Do-riel mountains supply an instance of eading ones being between 25,000 and soda when used in relatively small amounts" has been found to affect 26,000 feet high. Among other lunar peaks may be mentioned Huyghens, 21,000 feet; Hadley, 15,000 feet; Bradley, 13,000 feet, and Wolf, 11,000 feet. earliness of crops in a marked degree. In one experiment with beets "for ev-

ery dollar invested in nitrate of sods nearly \$8 was returned in the increased value of the crop." "Pracdcally," says an undertaker quoted by the Philadelphia Record, every corpse nowadays is embalmed. The presence of the Hessian fly in wheat is reported from an almost un-Perhaps not one body in a hundred is buried without having the fluid injected, and that settles it. You won't read precedentedly large number of states. your obituary notices then. People The production of sugar cane in the Hawaiian Islands is estimated at 310,000 tons for 1900. are coming to realize this more and more, and the old dread of being buried alive is fast dying out. But these Sugar beet factories are now in suc-ressful operation in California, New pervous individuals have got to have Mexico, Utah, Nebraska, New York, Oregon, Minnesota, Illinois, Washing-ton, Colorado and Michigan. some sort of post mortem bugaboo to worry them. If it isn't one thing, it's another, and as soon as you convince Reforestation with oak in France is said to represent at the end of 34 years 6 per cent annually on the investthem that they are not going to be buried alive they get grave robbers on the brain. That's why we are now

making a specialty of burglar proof caskets. Fact, I assure you. Absolute Sero. Absolute zero is the point at which, as has been determined from experiments with gases, matter would be without a trace of heat, could be cooler no farther. This point is 273 degrees below centigrade zero. A degree of cold so intense as this is, however, unobtainable. Even the meteorites which swarm in interstellar space must Mains is \$5,000,000 annually. In ordinary years \$350,000 is paid to farmers be heated to some extent by the radi-
