—Winfield Hopkins of Lincoln street has returned from the Beaumont, Texas oil field, where he went to work last June for \$8 a day and expenses. Every-thing comes high there and when Win became sick with malaria the Dr. charged him \$15 a visit. The Beaumont oil field covers an area less than a mile square and the rigs stand almost within touching distance of each other. The wells are all shut in and allowed to gush at but infrequent intervals, the total amount of oil marketed from the field being but 20,000 barrels a day. The big pressure would soon dissipate if it were allowed to gush continually. Five men were killed by gas or drowned in oil before one of the late gas burners was brought under control. The gas is not sulphurous very deadly and unfit for burning. In Louisiana the Standard has control of some very valuable oil-bearing oil territory.
