Butler, Pa.

Dear Sir: Your are an artist, what do you know about paint?

White lead is 2000 years old, and zinc about 50. The Greeks knew white lead.

Lead and oil is old-fashion paint, and zinc is a baby comparatively. But zinc, if properly ground with lead, prolongs the life of the paint from about three years at the most, to six.

Do you know that? It isn't your business to know it: but you are an artist. The sun, that paints for you, destroys lead and oil, but scarcely affects Devoe.

Devoe is the paint that lasts six years; yes, two or three times six years in favorable conditions.

Yours truly.

Yours truly, F. W. DEVOE & Co.
