Letter to C E Miller.

Dear Sir: If you buy paint by the gallon, look out for short measure There are great businesses founded of ten per cent short. It is queer that man or concern'll expose his or it nakedness so; but he does, and it does But that isn't all to look out for Some give full measure, and cheat in the quality. What do you paint for the looks? or to keep your house from rotting? Both of course.

The acme of scenic splendor was reached when John Robinson produced the great spectacle of Solomon, his temple and the Queen of Sheba.

No court was greater in all that pertained to magnificence than Solomon's and as historically reproduced with dozens of calcium and Vari-colored lights on the brilliant costumes and scintillating armor, it has received unscintillating armor. scintillating armor, it has received un-stinted praise from all who have been fortunate enough to witness the grand

fortunate enough to witness the grand spectacle.

The circus has been characterized as the most interesting in its unexceptional features and in the general excellence of its ring performances. The menagerie is large and comprehensive and in cludes living specimens of the rarest beasts, birds, reptiles and amphibit.

The colossal Roman hippodrome is in itself a feature that has no duplication and carries the spectator back to ion and carries the spectator back Imperial Cæsar's day.

The show will exhibit at Butler. Friday, May 30, Decoration Day.

Eye Glasses are not worn as an ornament but they need not be the reverse—Ill fitting glasses are nearly always disfiguring, perfect fitting ones never. The skilled optician takes into consideration the size and shape of the wearers face and reduces the objectionable feature to a minimum. Perfect fitting glasses cost no more than ill fitting ones. I allow no misfits to leave my hands. Examination and advise free.
