> been working on these lines alone, varying my temperatures from the ex-treme cold produced by liquid air to pipe, and I have been repaid. A fortnight ago I discovered how it was that I had erred, and since then I have succeeded in everything I have tried. I have formed the proteids, the fats and the carbohydrates which go to make up protoplasm, and with these for my solid foundations I have made every minute and complicated organ of the body. I have done more than that-I have put those component parts to-

He lifted a sheet, which was thrown over a heap of something on the table, and I started back with a strange mixture of awe and horror, for stretch-ed out on that marble slab lay a naked body, which, if it had never been a man, living and breathing as I lived and breathed, then I would have sworn

By HARLE OREN CUMMINS.

The thoughts which began to come into my mind probably showed in my face, for the professor said: "You doubt? You think that I have lost my reason and this thing is some man that I have killed. Well, I do not blame you. A year ago I myself would have scoffed at the very idea of creating such a man. But you shall see, you shall be convinced, for in the next part of the experiment I must have your help. I will show you how I have made this man or I will make another before your eyes. Then you and I, we will go further; we will do what no one but God has ever done before-we

experiment, and right with your help I What we have to do is as much of a siddle to me as it is to you. It is purely and simply an experiment. I am going to pass through that lifeless day the same current of electricity which if sent through a living man would produce death. Of course, with a man who had died from the giving and of some cital function I could not large to merceed, but the organic of this may which I have made are in a perwould decine a living man will living
