Boggs & Buhl ALLEGHENY, PA.

A RUNAWAY PRINCESS. By Curran Richard Greenley. Copyright, 1903, by T. C. McClure.

"It is useless, your highness, to protest against the things that are." The baroness smoothed down her hair with a little hand upon which gleamed innumerable rings.

The baroness was on the point of rebellion, when Marie Amalie before her protesting eyes poured a generous dose into the chocolate and bade her swallow it.

A lawyer deferring a promissory note went to lunch, leaving his book and citations on the table in the court room. The opposing counsel slipped back into the room and changed the places of all his bookmarks.

"The way of the world," remarked the proverbs man reflectively, "we looked forward to the time when we could have a summer home."

"A Form of Hog Cholera." "A form of hog cholera not caused by the hog cholera bacillus, and apparently identical in all particulars with the acute type of hog cholera."

"The Farmer of Today." "The 'New Fashioned' Man as Compared with the 'Old Time'."

FARMER'S GARDEN THE CORN KERNEL. Its Structure and the Composition of Its Different Parts.

An Iowa experiment station has made a thorough study of the structure of the corn kernel and has advocated the possibility of selecting seed corn for improved chemical composition by a simple mechanical examination of sections of kernels.

1. Tip Cap.—This is a small cap covering the tip end of the kernel and the horn part of the kernel.

2. Hull.—This is a very thin outer covering of the kernel. It consists largely of cellulose, especially fiber or cellulose, although it also contains a small percentage of other constituents.

3. Horny, Glutinous Part.—This part lies immediately underneath the hull. It constitutes a second covering of the kernel, usually much thicker than the hull. For short it is called horny starch, although it is, of course, not pure gluten.

4. Horny, Starchy Part.—This part lies next to the horny gluten, on the back and sides of the kernel. For short it is called "horny" starch, although it is not pure starch.

5. White, Starchy Part.—This part occupies the crown end of the kernel above the grain, and it also nearly surrounds the germ toward the tip end of the kernel.

Prevention of Egg Rotting. The quickest cure for the habit of egg eating in birds is disinfecting the table, but oftentimes a fowl is too valuable for this treatment, and it may be worth while to prepare a nest-like one shown in the illustration.

Keeping Cabbages. Late cabbages laid in shallow trenches, roots up, will keep well if not placed too close together in the trench.

Paper Wrappers for Fruit. The influence of paper wrappers on the keeping qualities of apples in any kind of storage is well known by all who have kept fruit in any way.

Agricultural Notes. The Trenton Interstate fair had a fine display of hog hogs.

Discretion. An example that can never be overlooked when the right of an ambassador to exercise his own discretion in question is that which occurred in the career of Lord Lyons when he was our ambassador to the United States.

Blissful. Unlike Napoleon, Blaise was a hard smoker. He once told this story to illustrate his love of the weed.

Blissful. Unlike Napoleon, Blaise was a hard smoker. He once told this story to illustrate his love of the weed.
