Nasal Catarrh quickly yields to treat-ment by Ely's Cream Balm, which is agree-ably aromatic. It is received through the nostrils, cleanses and heals the whole sur-face over which it diffuses itself. Druggists sell the 50c. size; Trial size by mail, 10

cents. Test it and you are sure to continue

the treatment. **Announcement.** To accommodate those who are partial to the use of atomizers in applying liquids into the nasal passages for *catarrhal trou- bles*, the proprietors prepare Gream Balm in liquid form, which will be known as Ely's Liquid Gream Balm. Price including the spraying tube is 15 cents. Druggists or by mail. The liquid form embodies the med-icinal properties of the solid preparation.

By OTHO

That is only the final syllable of the name. When we are married I'll have to write my name on the records Nebuzaradon Nye.' Happy was silent. "Does it seem so very dreadful to you, Happy? I am sorry, but I cannot

help it. And you don't know how I have suffered all my life with that abominable name." "Yes, I do, dear Don," cried Happy, laughing hysterically, "and the fates "That's one time when Shakespeare

have surely brought us together, for my name is Kerenhappuch!" That evening Don questioned his mother. "Did you know what Happy's name really is?"

The young man's tone was that of ne resenting a personal affront. His mother smiled understandingly. "Yes, I did, but I knew you wouldn't even go to call if you knew, and I liked her so well. Happy is just as lovely as if her name were Mary Ann. Besides, 'Was that when he said, 'What's in a iron pins in upper side the proper dis-"Of course," with aggrieved empha-

Don," with a mischlevous laugh, "they are both Scripture names." "Won't they look great on the wedsis, "I don't want to find fault with you, mother. You're the best mother ding cards," exclaimed Don-"Keren-happuch Ness Holmes and Nebuzaraever a fellow had, but I'd give my next year's salary, even with the expected don Nye! But what's in a name"ncrease, if you had named me some-"Then you are willing to admit that Shakespeare was right"thing else-John or Tom or any other

"I admit nothing. He didn't know; he simply stumbled on to the truth. He "I don't like the name of Nebuzaradon myself, but you know, Don, you couldn't know, for he had never seen were named for your father's uncle, Happy.' and he was seventy years old then and

Saved \$2,000 on a \$1,000 Salary. Three commercial tourists were swapping yarns around the table at a downvn hotel recently, and the talk drifted to expenses.

"My firm has always been liberal in the matter," said the first drummer, "but they got taken in badly once. They needed a man for the western part of the state and took on a young fellow from away down east, who put up an elegant bluff and signed a year's contract with them for \$1,000 and \$5 a day expenses. He couldn't sell gold dollars for a nickel apiece, but he saved \$2,000 that year and started in business for himself and is now one

of our competitors." "Our people don't care what a man's expenses are so long as he sells the goods," said salesman No. 2, "but once in awhile they register a kick on prin-ciple. Last year, about this time, I got in from a short trip through Ohio and in cut) holds it in place. The distance Kentucky. It was new ground to me, and I did fairly well. When I handed A and B is five inches. Put the bolt and r did harry well, when r handed in my expense account, the funior part-hole through A one and one-half inches rer said to me, 'See here, old man, I made that trip myself two years ago for \$25 less than it cost you, and I charged up a fifty dollar overcoat."-Philadelphia Press. Of course the best way of keeping up soil fertility is by using manure. The

Fertilizers are principally used wher it is impossible to obtain manure

Use all the yard manure you can be ling. After seed

fore seeding. After seeding use noth-ing but bone, muriate of potash and nitrate of soda or their equivalent. Thereafter fertilize every crop whether first or second. The second crop should be cut just before frost and the field

kept clean for winter. Fields well cared for and kept clean will never winter kill. Grass fields should never be pastured. No part of the grass stand can ever be recovered except by reseeding. Eternal vigilance is the price we pay to get the best results in grass culture. My first experimental crop on sixteen acres was over sixty-fou and for many years the same field in two crops produced over 100 tons. The outside cost of hay produced by this method does not exceed \$5 per ton for well dried hay in the barn. Intense cultivation had done it. It will work

No. 5.

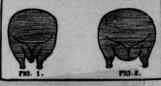

This year less than eleven acres of This year less than eleven acres of land formerly as poor, rocky and bad as any in the county produced over 167,000 pounds of well dried hay in two crops, over seven and a half tons per acre. For eighteen years it has pro-duced a similar amount.—G. M. Clark in Address Before Agricultural Stu-dents of Rhode Island.

Goats at the World's Fair

Chief F. D. Coburn of the world's fair department of live stock has received an application from John W. Fulton, an application from John W. Fution, secretary of the American Angora Goat Breeders' association, for a date for a public sale of Angoras under the aus-pices of that association during the pe-ried of the displays of goats at the Louisiana Purchase exposition. The world's fair classification gives the Angora goat much larger recognition than has been accorded to it at any previous show, allotting to the breed \$3,410 for 133 cash prizes. It is possible for a single buck to win \$230 and to aid in winning \$320 additional of exposition money, togeth-er with diplomas, special prizes, etc. A more active interest in the milk goat has been developed through the atten-tion paid to that animal in the world's fair live stock classification. It has been suggested to breeders that the exposition's shows at St. Louis will afford an opportune occusion for the organization of a milk goat register as-sociation. This has so far received the unanimous approval of the breeders concerned, and a preliminary organiza-has been made.—National Stockman.

In Poultry Breeding

If one is to keep poultry it is just as well to have it as good as possible. To get it so be careful in the selection of breeders. For instance, select hens and males a cross section through which would be like Fig. 2 and not like Fig. 1. Why? Because in Fig. 2 there is a large quantity of white meat running from the breast clear back between the

and legs well apart. That is one point in breeding good poultry. Another is in selecting birds with breasts not only full, but deep down through, and an-other is in selecting birds with wide backs. The narrow bird can carry little flesh.-Farm Journal.

Things Said by Others

Growth of the Human Heart. A scientific analysis of the growth of the human heart demonstrates the fact that the increase is greatest and most That the increase is gratest mathematical the increase is gratest mathematical terms and the increase of the second year being exactly double what it originally was. Between the second and seventh years it is again doubled in size. A slower rate of growth then sets in and continues during the period of maturity of other portions of the body. After the fifteenth year up to the fiftieth the annual growth of the heart is about .061 of a cubic inch, oats and rye combined. Science must step in to keep up the supply. We must the increase ceasing about the fiftieth year.

The Deluge. In answer to a correspondent a news-paper says: "The deluge mentioned in the Bible was threatened in the year 1756 B. C. and began on Dec. 7, 1656 B. C., and continued 377 days. The ark rested on Mount Ararat on May 6, 1655, but Noah did not leave it until Dec. 18 following." Any reader who forth, up and down, over and under, and at the same time keep the surface true that we may cultivate to an even depth. This process reduces all sod or other vegetation to plant food, sprouts and kills out foul germs and lets in Dec. 18 following."
