The Cure of Crossed Eyes. The Cure of Crossed Eyes.

Fow people realize the importance of early correction of the defect known as "crossed eyes." Yet there is a simple test which everybody can make and which proves conclusively that something should be done to remedy this unsightly and serious malady. Cover the straight eye with your hand and you will find that your sight is either very dim or at least considerably weaker than that of the other eye. Naturally, as a crossed eye is never used for vision and therefore becomes weaker the same as an arm that is constantly worn in a sling would finally refuse to do its service. The earlier this trouble is remedied, the better are the chances not only for correction of the disfigurment

OIL NOTES.

A "Salted" Gas Well-Winfield, Kan A "Sailted Gas Well—Winneld, Kansas, according to the veracious chronlicler of the Topeka Journal, has been
fased to the amount of \$10.000 on an
alleged gas well that resolutely refuse
to "gas." In other words, some prospectors or promoters drilled a well that
apparently had all the symptoms of a
gasser of the gusher order, sold it to the
city for \$10.000, and then left for parts

unknown.

This is certainly something entirely new in the annals of deception, but the results prove that the men engaged in disposing of a "dry hole" at "gas" prices were thoroughly up to date and sequainted with modern inventions. The managers of the fake gas well were prepared to make a winning in any event. Long before the well had neared the sand, they had laid in a stock of calcium carbide, the basis of acetylene gas, and had things fixed to dispose of their venture at a handsome profit. The famous 'Stump Creek mystery' in Jefferson county, Pa, probably fooled more people and cost Bradford oil operators more money than the Winfield gas well cost the people of that section, but it is doubtful if the Pennsylvania promoters made a bigger haul than these gas sharpers of the Sunflower State.—Derrick.
