"'All right. I don't want to,' and cast it down. "'You pick that up,' said the sentinel

Dairying That Pays. In a series of institutes in the north-eastern counties of Pennsylvania I found that farmers are specializing to a much greater extent in that section than in many other sections of the state, says L. W. Lighty in National Stockman. Quite a number of dairy-men are putting in plants of their own for buittermaking and are described 'You can't throw things around here.' "'But I don't want the blame thing! 'Go back and get a permit.' for buttermaking and are devoting all their thought and energies along

"'Go back and get a permit." "And he really had to do it to get that four feet of wire ontside of Uncle Sam's fence."--Philadelphia Telegraph. **St. Patrick's Purgsterr.** Mediæval songs and legends, which are rich in all sorts of mythical and fantastical lore, locate the entrance to St. Patrick's funces 'mythical and the island of Lough Derg, Ireland. The opening itself was through a cave, the existence of which was revealed to the saint by Christ, who informed the good Patrick that any one with the moral courage to go down into the cavern would be saved the pangs of the real "purgatory" after death. Patrick built a monastery at the entrance of his

arthly "purgetors" earthly "purgatory" and secured the way to the pit by an iron gate provided with strong chains and locks of peculiar and intricate workmanship. Lough Derg, next to Jerusalem, was the most celebrated spot on earth dur-ing the middle ages. Thousands visited "purgatory" every year, and the whole island had the appearance of a popu-

Reversible Snakes In Indi A snake not often heard of, at least in America, is the liver colored snake with two heads, or perhaps they should be called mouths, though it does not have two mouths at the same time. They are reversible mou ths, occupying the opposite end every six months. It lies with the two ends crossed on each other, as with folded hands. Every six months the change of the seasons reverses the functions of the two ends, the head becoming the tail and the tail becoming the head. The mouth at one end heals or closes up all but a small opening, while the opposite end be-comes the mouth for the next six

months. Breton Children. The Breton children are plous, super stitious, stolid, strong, patient and very thorough. The girls are intelligent and interesting. They are the mainstays of the family. A child of ten undertakes superintend both household work and the farm. The boys are me less stupid, handsome, bronze faced country urchins. Bee culture seems to be the favorite occupation of the Bre ton boy. The insects will come at his bidding and will even cover him from head to foot without stinging. Turning Away Wrath. "I don't believe you love me any more," pouted she. "I couldn't," replied he. After thinking it over she smiled and told him she could make the same old dress do another season.-Houston Post.

details of the business require, it pays handsome profit. Grape Acid Possibilities. Increased profits for grape growers are among the fair possibilities. The American Grape Acid association of California offers \$25,000 for the best formula, with the right to use it, by which grapes containing over 20 per cent saccharin and valued at \$10 per on can be turned into tartaric acid at a price which will permit exportation without loss. Here is a spl ward for some chemist, who, besides the money compensation, will receive the gratitude of the grape growers of

the Pacific coast states. It is also proposed to utilize the acid in the rea from grapes pressed for wine acid, when properly treated, also makes tartaric acid and cream of tartar. As there is a great market for these prod-ucts in the United States, the importance of utilizing grape acid for the purpose is apparent. -- Orange Judd Farmer.

# Are Women Really Stingy

Are women meaner in giving than men? It cannot rightly be urged that they are. Women, after all, in buying they are. Women, after all, in buying or in giving are commonly making use of money that others have earned. They have been trustees of other peo-ple's money for 2,000 years, and long use has made them careful of their trust. Of course the petty meannesses of a certain kind of woman have af-forded infinite opportunities for men's jests and contempt, but those petty meannesses are nothing in comparison with the great meannesses of really sordid men.-London Spectator.

A geographical magazine makes the interesting statement that the Philip-pine Islands have a coast line double that of the main part of the United States. The measurement given is 11,-444 statute miles, while the total area Could Not Guarantee Them "Have you any eggs?" inquired the

"Yes, sir," said the waiter, "I can ring you some eggs, but I want you to nember that this is a ten gent lunch Harper's Weekly. ter."-Chicago Tribune.

Coast Line of the Philippines

is stated as 115,026 square miles. In the Philippines there is one mile of coast line to every ten miles of area; in the United States the proportion is 1 to 555. It is said that 3,000 islands and slets can be counted on the charts.-
