from the time she left that place, a month before.

An attempt was made to poison Mrs. Stanford at her home in San Francico a few weeks ago, and for that reason she left home, and went to the islands where she seems to have had good health and to have been enjoying herself; and as she had already given away the greater part of the large fortune left her, one wonders what the motive could have been. But Mrs. Stanford seems to have been followed by some implacable enemy, determined that she should not die a natural deth.

have finally agreed upon a sea level cars cross the Isthmus of Panama, the re mmendation being backed by convinc ing data. The estimated cost is slight ly in excess of \$230,000,000, which is \$34 00,000 more than for a canal at the 30 foot level; \$52,000,000 more than at a 60 foot level, and \$79,000,000 above the cos stimated by the first commission with a summit level 85 feet above mean tide The advantages are economy in opera tion, greater freedom of navigation and portunity to enlarge the waterway in the future without interruption to ship ping, and at much less cost than with the canal at a higher level.

OPEN AIR TREATMENT. sons For Its Good Results

The advantages of the open air trea ment for consumptives may be thus briefly summarized: The patient exposed continuously to fresh air gains in appetite, assimilates his food better leeps more soundly and awakens mor refreshed. Free exposure to air is the best antipyretic. Sweating at night formerly so common a symptom, usual ly ceases. Colds are practically u own among patients leading an oper life. Secondary infection, on ac count of the comparative freedom o the air from micro organisms, is much less likely to occur. Tolerance of out side air is very quickly established, and no one who has tried the open air life will willingly go back to the former conditions of stuffiness. I have never seen any one made worse by exposure to fresh air. Even during a thick Lor on fog patients get on better lying in bed on a balcony or in rooms with win dows wide open and a good fire burn-ing than when attempts are made to shut out the fog by keeping the win in London Lancet.
