FARMER

of this is bent upward to throw away the dirt and to dig up the onion tops. At about the middle of each of these wings is fastened a small wing about three inches high, two and one-half inches wide, which projects about one inch downward and does the weeding near the plants. The front edge is sharp to cut off the weeds. The width between the teeth and wings can be adjusted by a clamp on the handle, also by wrought irons one foot high, which are likewise fastened to the handle. The weeder can be worked very close to the row and will take out all weeds except those which grow nearly in line

Western Forage Crop.

Numerous unsuccessful attempt have been made in central New Jersey to secure a profitable growth of this wonderful forage plant. The seed germinates promptly, and often a quick growth of the plant follows, to be smothered by weeds or to turn yel-low and dwindle away. No more per-sistent experimenter is known than John P. Nelson, who owns a farm in Monmouth county, on which he has spent \$1,500 in experimenting with alfalfa. After repeated failures on the farm he abandoned field experiments and resorted to a garden plot, where he could watch the plants and study them more closely. Here he learned two things which perhaps constitute the key to success. Liming the small piece of ground heavily, he changed the time of sowing to July. A growth of seventy-two inches resulted, and Mr. Nelson thought he saw the way clear to a farm crop of this desirabl fodder

He sowed in August, 1902, a field of two and one-third acres after heavily liming it, using thirty pounds of seed Afterward a discussion arose at the to the acre, and the next spring added to the acre, and the next spring added 400 pounds of bone dust. In 1903 he over thirteen tons, weighed when ready "Hoots, mon, ye're a' wrang," broke for the barn. A later growth of twen in the impatient piper. "Did ye no see the chiels this mornin" whilst I was

steers a year from one and twelve from the other at an average of \$25 per head he is doing well. Yet what Lady Kitty's aily can live on it? Recom mended for potato blight, blos som rot in tomatoes, apple rust and scab, brown rot in peach, etc.: Copper sulphate (blue vitriol), four pounds fresh lime, four pounds; water, fifty gallons. Dissolve four pounds of copper sulphate in two or three gallons of water by placing the sulphate in a sack and suspending in the top of a jar or tub of water. Do not put this in tin or iron vessels, as it will rapidly di solve them. Before mixing dilute this

to about twenty gallons. Slack four pounds of fresh lime by adding a small amount of water and after slacking is finished add about twenty gallons of vater. Stir the lime and water thor ughly and strain before mixing. Pour these two solutions into the barrel tank at the same time and stir vigo ously while mixing. This may be diluted to fifty gallons .-- Oklahoma Station Formula.

#### Why They Come Back to Land. It is surprising how many city people are thinking, talking and actually go-ing into farming nowadays. Men of all ses, from the successful business man to the laborer, are interested. Probably the most potent cause with those who have to earn their living is the increased cost of living in the city. There are thousands of careful, indus trious men in the cities today who are making a living and nothing more with the uncertainty of steady work always before them and the possibility of sickness which would place them in These are an embarrassing position. the people who are vitally interested. and some of them have already solved

the problem by going to the country .-National Stocks EASTERN BEEF RAISING.

New England Farmer Thinks There Is Nothing In It.

Editors Country Gentleman - You have published several articles advising the New England farmer to raise beef. I do not think this is good advice. First, the course generally rec-ommended is to raise baby beef. Now, the fact is that in the New England states the market for baby beef does not exist. "We likes 'um heavy," says the German butcher, "How old did you say? Not three! Oh, I don't beve I care to look at it. Well, you might try Jones. He buys most anything.'

You try Jones. "What!" he asks, with a scornful snort. "Want steer prices for pig beef? We like 'em four years old. Heavy beef is the best. But I'll tell what I will do. I always trade generous with neighbors. I will stretch a point and give you 3 cents if physician: "The poor I cure for nothvou'll trade it out."

But, even supposing there is a good market, it will not pay a New England I think, caused by an inability to focus them. The speech comes with diff-culty, and in one case that I saw the sector of the speech comes and four acres of hay. Now, on the speech comes are that I saw the speech comes and four acres of hay. Now, on the speech comes are that I saw the speech comes are the speech comes and four acres of hay. Now, on the speech comes are that I saw the speech comes are the speech come to be present t mental coherence was as obviously at fault as the physical. - Landor's a living from beef, or even on a "Linassa." in the function of the func

He floated ashore and froze to death, and the rats eat him up alive!"-Harper's Lady Kitty did not answer. Her Weekly. lips were half parted, and she looked

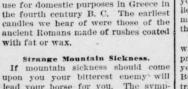

## Lobster Mortality High

A lobster lays thousands of eggs, most of which hatch, but few ever live to grow up. This is not the fault of the mother, for she carries them about with her for nearly a year and with admirable instinct guards them as she does her own life. When the young are set free her duty is done, for they must then shift for themselves. Though hardly larger than mosquitoes, being about one-third of an inch long, the little ones leave their parents on the bottom and swim toward the light-to the surface, where from one to two the surface, where from one to two months, if fortune favors them, they lead a free, roving life. The open sea is a poor nursery for such weakings, which become the sport of every sform and the prey of numberless hungry mouths. Out of a brood of 10,000 it would be a rare chance for more than would be a rare chance for more than one or two lobsters to reach maturity or finally to end their career in the kitchen or the chafing disfi-St. Nich-

## An Idle Jes

"Pa, what is an 'idle jest?" "One that the newspapers haven't yet got hold of and worked to death." --Cleveland Leader
