Consultation free and strictly confidential. Write if you cannot call.

Office hours—From 9 a. m to 8:30 p. m. On Sunday from 1 to 3 p. m. only.

The Publisher's Claims Sustained

UNITED STATES COURT OF CLAIMS

The Publishers of Webster's International Dictionary allege that it "is, in fact, the popular Unabridged thoroughly re-edited in every detail, and vastly enriched in every part, with the purpose of adapting it to meet the larger and severer requirements of another generation."

We are of the opinion that this allegation most clearly and accurately describes the work that has been accomplished and the result that has been reached. The Dictionary, as it now stands, has been thoroughly re-edited in every detail, has been corrected in every part, and is admirably adapted to meet the larger and severer requirements of a generation which demands more of popular philological knowledge than any generation that the world has ever contained.

It is perhaps needless to add that we refer to the dictionary in our judicial work as of the highest authority in accuracy of definition; and that in the future as in the past it will be the source of constant reference.

CHARLES C. NOTT, Chief Justice.
LAWRENCE WELDON,
JOHN DAVIS,
STANTON J. PEELLE,
CHARLES B. HOWRY,
Judges.

The above refers to WEBSTER'S INTERNATIONAL DICTIONARY

THE GRAND PRIZE (the highest award) was given to the International at the World's Fair, St. Louis.

NATIONAL BISCUIT COMPANY

The Butler German Coach Horse Association

Offers to the breeders of Butler Co. their celebrated coach stallion

Loehr 744.

He will be at the barn of Adam Cradle, one mile north of Butler, Mondays and Tuesdays, and the balance of the week at the barn of John F. Smith at Herman, Pa.

TERMS---$15 for a Living Colt.

Season begins April 16th.

J. F. SMITH, Keeper.

DOCTOR RICHARDS 26689.

The highly bred and handsome stallion Doctor Richards will stand for service at Butler Fair Grounds in charge of the undersigned. He is a beautiful golden chestnut, stands 16 hands high, has excellent conformation, with action and carriage equaled by none. Doctor Richards inherits the blood of Abdallah 15, both through Nutwood (sire of 175 performers) and Robt. McGregor (sire of the world's champion trotting stallion, Cresceus, 2:02¼, and 107 other performers,) and his pedigree in every detail, represents the blood that has produced world's champions

Call and look him over, or inquire

TERMS $25.00 to insure a living colt.

H. A. MOORHEAD, Butler, Pa.

VENDETTA BOY 35266.

The Wilkes stallion Vendetta Boy and the Percheron Stallion Brilliant No. 27865 will be found at my barn during the summer of 1906. Vendetta Boy is a beautiful, rich, bay, standing 16½ hands high and weighs 1280 pounds. He is by a producing son of the Great Wilkes Boy 2:24¼ and sire of 94 in the 2:30 list. His first, second and third dams are all producers of standard speed. His second dam being in the great brood mare list. He is a perfect type of trotting bred coach horses, combining as he does the best and fastest blood in the world. He has shown 2:20 speed himself at the trot. Grandsons of George Wilkes have sired Dan Patch 1:56¼, the world's champion stallion; also Dariel 2:00¼, John R. Gentry 2:00½ Anaconda 2:01½ and four others better than 2:04.

Breeders will please compare his breeding, size, style, action and terms with others and Judge for Themselves. Terms--$15.00 to insure.

BRILLIANT 27865

Is a beautiful dark dapple gray stallion, weighing about 1800 lbs. He is a perfect model of the Percheron draft horse and has proven himself a sure and remarkably fine breeder, which his colts over the country will show.

Terms--$10.00 to Insure.

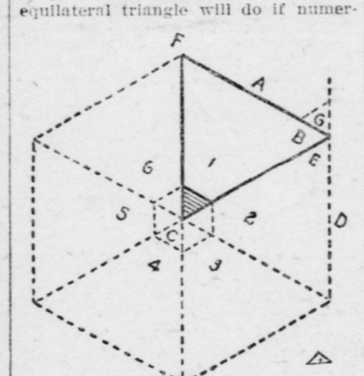
FARM AND GARDEN

PENNING THE CHICKS.

Labor Saving Arrangement of Mother Hen and Family.

In the necessary daily moving of the chick pen time and annoyance may be saved by having the pen made of inch thick twelve foot boards, at least a foot wide and securely fastened together at their ends, preferably with screws and iron braces. Pieces of 4 by 4 scantling beveled to form an equilateral triangle will do if numer-



PEN AND COOP.

ous nails are used to fasten all together. But such coops cannot be "knocked down" and stored from season to season in a pile, as the braced style can if the screws are removed. The ends of each board should be beveled to form half a right angle, or forty-five degrees.

In one corner a coop may be made consisting of a removable roof to fit over the sides of the pen and of a height sufficient to accommodate the hen, goose or turkey mother. This top should slant to shed rain and from its front slats may extend downward into the pen to keep the mother in when desired.

In use the time saving management consists in the method of moving as well as in the feature of "knocking down." The coop is placed in the center of a grass plot at least twenty-four feet across in each direction, and when moving time arrives the chicks are attracted to a little food at B, while the operator lifts the pen at A and, using C as a pivot, carries the point A around to D. In order to make the chicks move forward from B when the coop is moving the food should be placed close to the side of the pen and some more on the other side—namely, at E. After a few movings the chicks learn to go forward promptly. Each day the pen is moved in the same way until it occupies the place marked 6. Then it may be moved to new ground by turning on one of its other corners, say, F, so that, for instance, the coop will be at G, as indicated by the dotted line. From this point as a new center the daily movement may continue as before.—American Agriculturist.

Succotash Hay.

Some of the Michigan farmers grow what they call "succotash hay." One of them says he sows a bushel of oats, a peck of spring wheat and a peck of beardless barley to an acre. This mixture is sowed about April 15 to 25, and disked in if on stubble ground. If on cornstalks he cuts the stalks with a stalk cutter and plows them under, so that there will be no trash on the ground when he mows and rakes the hay.

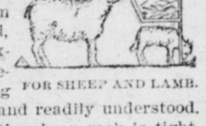
The crop is cut just after the oats get out of the "bloom." He mows it with a common mower and leaves it to "cure" in the same way hay is cured. It is then raked and stored away in the barn or in a great many cases is stacked like meadow hay and keeps in excellent shape. This farmer claims that as a horse or cattle feed succotash hay is unequaled.

Stuck In Spring Mud.

When one wheel drops down into a mudhole and sticks the team, don't put the third horse on ahead, advises Farm Journal. Hook a chain around the axle close to the sunken wheel and bring it across the load to the other side of the wagon. Hitch the third horse to this chain and pull almost at right angles to the wagon in order to lift the wheel upward and out of the hole. Then start the other team and go ahead.

Feeding Sheep and Their Lambs.

The common feed arrangement for sheep permits the lambs to pass through the slats and stand on the hay the sheep are eating, soiling the feed and making the feeder a great deal of trouble. The cut, from Farm Journal, shows a very excellent arrangement, this being a cross section and readily understood. The bottom of the sheep rack is tight, and under this, through narrow slats and openings in front, the lambs may be fed in a small trough of their own. They are thus out of the way of the sheep and can be fed their own ration apart from the sheep.



FOR SHEEP AND LAMB.

What Nodules Do.

From the results of various experiments and observations at the Michigan experiment station it is concluded that, while nodules on the roots of soy beans and cowpeas on fairly fertile soil may not noticeably increase the yield, they may increase to an important extent the relative and absolute amounts of nitrogen in the plants and thus add to their value as green manures and as food.

When and How to Sow—Pure Seed and Inoculation.

By GEORGE A. BILLINGS.

Alfalfa seed can be sown either in spring or late summer preferably—in the first case, the last week in April or the first of May; in the second, from Aug. 1 to the 15th. The advantage of August seeding is that the land can be thoroughly fitted and cleaned. Moreover, the weeds do not grow vigorously or mature, and what do grow serve to protect the young plants. In either case do not seed less than thirty to thirty-five pounds per acre, preferably broadcasted in two directions to insure an even stand.

Care should be taken not to seed too deeply, though the depth depends upon the character of the soil, usually two or three inches, lightly covered with a harrow or weeder and rolled.

Essential Points.

Pure seed is essential, and only that which is bright, plump and free from impurities should be used. Dodder, a common impurity, is a parasitic growth, which thrives on the juices of the plant. The alfalfa seed, therefore, ought always to be recleaned to free it from this parasite.

New fields planted to alfalfa frequently require inoculation of the soil with alfalfa bacteria, although there are soils on which the plant will grow vigorously with an abundant formation of tubercles without such inoculation and notwithstanding the fact that no crops of alfalfa had previously been grown upon them. Usually a thrifty, dark green plant indicates that it is well provided with tubercles, and a yellow, sickly plant indicates that it is not receiving the aid of bacteria in gathering the free atmospheric nitrogen.

Nature's Way is Best.

The function strengthening and tissue building plan of treating chronic, lingering and obstinate cases of disease as pursued by Dr. Pierce, is following after Nature's plan of restoring health.

He uses natural remedies, that is extracts from native medicinal roots, prepared by processes wrought out by the expenditure of much time and money, without the use of alcohol, and by skillful combination in just the right proportions.

Used as ingredients of Dr. Pierce's Golden Medical Discovery, Black Cherrybark, Queen's root, Golden Seal root, Bloodroot and Stone root, specially exert their influence in cases of lung, bronchial and throat troubles, and this "DISCOVERY" is, therefore, a sovereign remedy for bronchitis, laryngitis, chronic coughs, catarrh and kindred ailments.

The above native roots also have the strongest possible endorsement from the leading medical writers, of all the several schools of practice, for the cure not only of the diseases named above but also for indigestion, torpor of liver, or biliousness, obstinate constipation, kidney and bladder troubles and catarrh, no matter where located.

You don't have to take Dr. Pierce's say-so alone as to this; what he claims for his "Discovery" is backed up by the writings of the most eminent men in the medical profession. A request by postal card or letter, addressed to Dr. R. V. Pierce, Buffalo, N. Y., for a little book of extracts from eminent medical authorities endorsing the ingredients of his medicines, will bring a little book *free* that is worthy of your attention if needing a good, safe, reliable remedy *of known composition* for the cure of almost any old chronic, or lingering malady.

Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic.

The most valuable book for both men and women is Dr. Pierce's Common Sense Medical Adviser. A splendid 1008-page volume, with engravings and colored plates. A copy, paper-covered, will be sent to anyone sending 21 cents in one-cent stamps, to pay the cost of mailing *only*, to Dr. R. V. Pierce, Buffalo, N. Y. Cloth-bound, 31 stamps.
