

THE BUTLER CITIZEN.

WILLIAM C. NELEY, Publisher

THURSDAY, JUNE 14, 1906.

\$1.00 per year in Advance, Otherwise \$1.50

REPUBLICAN TICKET.

Governor,
Edwin S. Stuart.

LIEUTENANT GOVERNOR,
Robert S. Murphy.

ATTORNEY GENERAL,
Robert E. Young.

SECRETARY OF INTERNAL AFFAIRS,
Henry Houck.

Congress,
R. H. Pillow.

ASSEMBLY,
J. M. Dight.

Ira McJunkin.

JURY COMMISSIONER,
Ade Thorne.

WASHINGTON NOTES.

On Friday last the Senate decided to send the Bill back to Conference.

On Monday the majority of the committee on privileges and elections of the United States Senate reported to that body in favor of depriving Senator Reed Smoot, of Utah, of his seat. The report was signed by Senators Burrows, Holliver, Dubois, Pettus, Bailey, Overman and Frazier. In brief, it was found that Senator Smoot had forfeited his right to sit in the Senate because he had taken the endowment oath to avenge the blood of the Mormon prophets on the Nation and because as a member of the hierarchy of the church he was responsible for its action in sanctioning polygamy.

The minority report declared that Smoot is entitled to his seat, that the testimony to him having taken the endowment oath was given by witnesses of bad character and that he was not shown to have been a polygamist himself or to have sanctioned the violation of the Federal law against it. The minority report is signed by Senators Foraker, Beveridge, Dillingham, Hopkins and Knox.

POLITICAL.

The Democrats of Westmoreland Co. held their primaries last Saturday, but did not name a man for Congress; leaving that to their Co. Committee which meets next week.

At Dover, Del., Addicks was again defeated for U. S. Senator. This time by Col. Dupont—20 to 10.

Time for New Regime.

It is not surprising that many of the Republican newspapers of the state are condemning the methods which were used in nominating a Republican governor. They should be condemned by the true Republicans of this Commonwealth. Of course the ticket will be condemned by the Democrats, but this criticism means little, what would have been criticized. The Democrats are looking out for their interests, and their boss, Col. Gandy, will slate their nominee for them. And they will pipe to his fiddle.

But the Republicans of this state have yet before them a contest within the party. It will be a contest for the tactics which made possible the nomination of Stuart. Few of the delegates to the Harrisburg convention knew anything of this candidate until two days before the convention. They had been promised an open convention and a square deal. They did not expect that the Philadelphia machine would have the nerve to use the party machinery of the state to rehabilitate itself. Yet this combination made up of maladoreous factional leaders discredited in Philadelphia, named the ticket which was forced on the Republicans of the state.

There were enough delegates under the control of Penrose and responsible to him or their leaders for political existence and their jobs to go along. All credit should be given to those Republicans of the state who refused to wear the Penrose collar, and showed their independence and who expect to remain in the party to make possible the defeat of such methods and such outrages on the future.

The Republicans of the state have an important duty to perform and we are not so sure but they will perform it. And let the consequences which will come to those leaders who disregarded the rights of others, be what they may. It is time for a new regime—a new leadership.—Washington Observer.

Oil and Gas Notes.

The Market—Remains at \$1.64.

Connoquenessing—Walker & McCandless' No. 1 on the Rose, which played up in the 100-foot is showing up good in the Snee or Blue Monday.

W. Va.—A monster gas well in Ritchie county is burning, set fire by lightning, and the flames are rising 500 feet.

Indian Territory—Two hundred oil well derricks were wrecked near Dewey last Saturday night by a tornado.

Galley—Eisler and O'Briens No. 11. Stacks struck good pay in the 100-foot, yesterday.

Greater Pittsburgh.

By a vote of 37,505 to 17,382, only about five-eighths of the voters going to the polls, Pittsburgh and Allegheny became one city, last Tuesday. The vote of the two cities was as follows:

For Greater Pittsburgh, in Pittsburg 30,997

For Greater Pittsburgh in Allegheny 6,508

Total 27,505

Against Greater Pittsburgh, in Pittsburg 5,537

Against Greater Pittsburgh, in Allegheny 13,006

Total 17,382

Votes for Greater Pittsburgh, in Pittsburg 63,399

Decrease in Pittsburg vote cast yesterday 26,875

Votes for Pittsburgh and Logan in Allegheny majority contest 23,992

Decrease in Allegheny vote cast yesterday 5,479

QUESTION—If a railroad official or clerk accepts a gift of stock with an unmentioned outlook toward the supply of cars, or a "commission" of so many cents per ton on sales to the railroads, the official who really pays it? On the face of the transaction the coal producing and shipping company pays it, and some courts might decline to go deeper than the surface. But in view of obvious ground for belief that the donor did not make the gifts for the next view, for which there is strong ground, it is that it was at the cost of the shareholders. It is possible to go deeper and assert that the cost of these levies came out of the shipper's pocket, who could not gain or a square deal on contracts, and ultimately out of the consumers, who pay in the end not only for artificial restraints on coal production, but for the increased cost of fuel to the railroad.

Early next morning a house on same hill, and but a few hundred feet distant was destroyed in almost the same manner. A rubber hose in Alonzo Hutchins' hands burst, and the water gushed out, filling up with the room. When Mr. Hutchins entered the kitchen, the gas was out, and the explosion wrenched the house off its foundation. It reached the light in the dining room, and the explosion wrenched the house off its fire, and so badly burned Mr. Hutchins that he was taken to the hospital.

ACCIDENTS.

The Cunningham Brothers—Founders of Butler.

J. A. Cunningham met with a serious accident at George Harvey's in Clinton township, Monday. He was tearing down an old log barn at the time, a log fell across his breast, breaking six ribs and, perhaps, injuring him internally.

Frank Bartley of Evans City, formerly of Brush, aged 32 years, was found under a freight train near Callery last Saturday night. When the engineer stopped at Callery for orders, he heard a groan under a car and an investigation disclosed a badly mangled body of a man not yet dead under the trucks. He was placed in the Butler Hospital, but died on the way. His body was taken to Evans City. He was a son of These W. Bartley, and is survived by his wife and five small children.

A star named Gladia had a leg broken at the Car Works, Sunday night.

E. D. Comstock, G. P. A. of the "Boss" had a leg broken by a fall from a car, at Greenville, Monday.

A boy named Orriel left the Park skating rink Monday night, broke an arm, and is now at the Park, and is now at the Park.

The Flood.

The downpour on the night of June 6th, 1905, in the Connoquenessing Valley, caused the most remarkable of late years—though how many inches fell was not measured.

We saw of farms being washed, in sand and leaves, of corn, oats and potato crops being damaged; of roads being washed out and township bridges being destroyed; of several railroad washouts; of telephone lines downed and telegraph wires broken (on the Winfield branch) being destroyed.

The Slipperyrock, Connoquenessing and Buffalo were all flooded, and even low down, the Centre avenue and railroad bridge embankments forming a dam there, and the railroad and county bridges and embankments next the car works another. The creek which the creek had been gradually being filled with refuse.

Much damage was done in Butler, and in several townships to the north of Butler, and more than ever known, the new homes of these dead will be marked by suitable grave stones placed at their head. Among them will be that of John Cunningham, whose name appears on the deeds as giving two of the three lots composing this old burial ground, and who died in Butler in the year 1805, and was buried upon one of the lots he, in part, gave. The removal of his dust, last October or November, came just about one hundred years from the time of his burial there. Of him, who was he and what he did for the town and county of Butler, in conjunction with a brother, is the desire and principal object of the writer of this to give some account, as he has learned the same by tradition, and has handed down to him from father to son. Two brothers, John and Sam Cunningham, were the first white men who came to and settled within the limits of the present borough of Butler after the Indians had left this section. As General Wayne's army advanced, two of the two classes or degrees of denaturation, viz., the "completes" and the "incompetes," according to the purpose for which the alcohol so denatured is to be utilized.

The German system is accomplished by the addition to every 100 liters (265 gallons) of spirits, (water, 100 parts), half a liter of benzene, and denaturant.

The American system is accomplished by distilling bone oil or coal tar with the addition to each liter of 50 grains of oil of lavender, and adding 100 parts of the above "standard" and 2 liters of benzene, with every 100 liters of alcohol.

Alcohol to be used in the manufacture of paint must be of a certain quality, white lead and zinc oxide, white lead and zinc bromide gelatins, photographic papers and plates, electropatents, colloid, salicylic acid and salts, organic chemicals and for a number of other purposes.

The price of pure alcohol is \$1.00 per liter.

The best results can be obtained only when the paint is pure. Lead and Pure Linseed oil are required with the requirement of the particular job in view.

For the manufacture of linoleum, which is a mixture of linseed oil, benzene and turpentine, is denatured by the addition of oil of turpentine or animal oil, and for the production of kilogram of ester oil, alcohol is added to produce oil of lavender, and by adding 5 liters of oil of lavender to each hectoliter of spirits.

The price of denatured alcohol varies in the different States and provinces of the Empire in accordance with the cost of production and market prices of pure grain and other materials.

At the present time alcohol of 95 per cent purity, which is the quality ordinarily demanded, costs \$1.00 per liter.

For the manufacture of paint, the best results can be obtained only when the paint is pure.
