HAVING MADE EASY.

Handling the Hay Crop Without Hired Help on a New York Farm.

Having a hay crop that is a first class mow. Get to work at cutting in the morning as soon as the dew is off. Nothing is gained by laying down a heavy swath of hay wet with dew.

It will show the city as it was before the earthquake, the breaking of day just preceding the latter, the earthquake and buildings toppling in every direction, which is followed by the breaking out at various points of the flames, the destruction of the city and then the ruins. It is promised that this will be one of the most realistic performances of its kind ever given and will be accompanied by the presence of new and interesting sights while all of the old favorites in the way of amusement, including the Ferris wheel, the "Trolley Trip Through New York" carrousel, roller coaster, the pines and steam launch, which will make trips on the three rivers, will all be found at their accustomed places.

An extraordinary attraction is announced that is certain to attract a vast attendance from every direction. This is the engagement for one week of Roy Knabenshue and his wonderful airship. It was in this vessel that Mr. Knabenshue recently ascended New York and made a successful trip, which was possible to navigate the air in any direction. Weather permitting he will make a number of trips to the clouds, starting from the Exposition, and a descent to thoroughly demonstrate the safety of his airship.

An interesting exhibit at the Exposition will be that of the United States government. It will be in the shape of a complete outfit such as is used by the meteorological department and will show in actual operation all of the instruments used at the various stations throughout the country as well as a number of those in less common use. The latter will include a barometer which is used to a great height to determine principal atmospheric conditions. On reaching a certain height it carries, releasing a parachute which bursts very delicate instruments up to the station where they descend. An enormous plate glass map, the duplicate of those sent out by the local stations, is also shown in operation. The exhibit is a attendant for the purpose of explaining all apparatus, the purpose of the government in making the exhibit in operation. With the exhibit in the exhibit is the same as was shown at the St. Louis and Portland World's fairs and will occupy the same amount of space, facing the main aisle of the main building, as it did at these places.

One of the handsomest displays ever made at the Exposition will be that of a local concern. It will be in the shape of a miniature Italian garden with a pergola, benches and a fountain. It will be surrounded by a stone railing, and will contain a number of tables and chairs, all of a Romanesque pattern. Throughout it will be brilliantly lighted and at intervals the railing will be broken by columns and statues, which will carry mosaic glass globes containing lights.

The passenger agents of all the railroads operating in this district have already held a meeting and practically agreed on the good excursion rates for the coming season. The rates will be the same as heretofore, single fare for the round trip with 25 cents added.

MARKING OF MONEY. It is Done With a Pin and Not With a Pen, as Supposed.

"How is money marked?" repeated a headquarter of a reporter's query. "Well, it is not marked in the manner that the public thinks it is.

"The average person no doubt believes that money is marked by private marks placed on the bills with pen and ink. Perhaps some employers thus mark the bills they place in the cash drawer which is being robbed by a dishonest clerk, or the course marked money of this kind is good evidence in court on the trial of a man upon whom it has been found, but a check mark in ink, unless very expertly put on, is better evidence than the good money for the accused, be shown to have been perhaps accidental, and thus would the ever sought reasonable doubt of the accused's participation in the robbery be raised.

"There are several different ways of marking money by police experts to the end that they may establish the positive identity of a bill previously dropped without taking breath. Thus, holding the empty mug to the disappointed young fellow, he said gravely:

"You say your father's beer is as better as mine? Well, you smell dot mine!"—Lippincott's Magazine.

EXPO OPENS SOON MANY NEW FEATURES MAKE THE GREAT PITTSBURGH SHOW BETTER THAN EVER.

The eighteenth annual season of the Western Pennsylvania Exposition society opens on August 29, and closes October 20, the season being of the same length as last year's. But like all of its predecessors it is promised that this year's Exposition will be better than ever and judging from the announcements already made it is quite evident that there is sufficient in sight to justify this promise.

In the way of music, which has always been a feature of the big show, making the attraction which will cause more wonderment than ever. They include Creators, whose magnetic influence over his band of 50 artists has been the cause of much discussion both here and abroad; Theodore Thomas orchestra of Chicago, one of the finest musical organizations in the world; Sousa and his band, who have just finished the most successful tour of this country in band history, and Pittsburgh's own favorite, Victor Herbert and his orchestra. Creators opens the season, remaining for 10 days and the others follow in the order named, each marking a new musical attraction.

The musical attractions that follow will be announced later.

One of the features of this season's Exposition will be the exhibition of the new building which will be entirely new. This building is being erected in Machinery Hall, taking up almost half of it. It will be perfectly decorated and built with light and will have a seating capacity of 1,200. The stage will be 60 feet wide and the proscenium arch about 50 feet high. All seats will be on one floor, to which there are numerous box entrances and which will be the highest class performers of an acrobatic nature. Several performances will be given each day.

In the gallery just over the main foyer there will be shown the "Destruction of San Francisco." It will be an electrical and scenic exhibition of the fearful catastrophe which this year almost entirely destroyed the Golden Gate city and which is now being constructed at an enormous cost.

It will show the city as it was before the earthquake, the breaking of day just preceding the latter, the earthquake and buildings toppling in every direction, which is followed by the breaking out at various points of the flames, the destruction of the city and then the ruins. It is promised that this will be one of the most realistic performances of its kind ever given and will be accompanied by the presence of new and interesting sights while all of the old favorites in the way of amusement, including the Ferris wheel, the "Trolley Trip Through New York" carrousel, roller coaster, the pines and steam launch, which will make trips on the three rivers, will all be found at their accustomed places.
