Some Worms Are Curious. The most curious creature of the worm family is the clypeid worm, a slender parasite which infests the gills of several species of fish, particularly the loach. Each individual diplocyst has two distinct bodies united at the middle so as to form a dumb-bell.

knotted head scarf, from under which escapes a thick tangle of hair intertwined with colored ribbons. In the plains of Provence and in the Normandy lands the wealthy still cling to their little lace caps, the intrinsic value of which is sometimes inestimable, made as they are of rare point lace fastened down with quantity of small golden pins, heirlooms in families.

HIS LONG NOSESHIP. Charles V. and the Merry Men. Charles V., in his intervals of relaxation, used to retire to Brussels. He was a prince curious to know the sentiments of his men on subjects concerning himself and his administration. Therefore he often went "incoog" and talked himself in such companies and conversation as he thought proper.
