Vegetable Universal Pills. Science should contribute to the Comfort, Heatth

and Huppiness of Mankind."

On the eighteenth of May, 1835, these now trilly celebrated Pills were first made known in the United States, although in Europe they bid been previously before the public nearly a century. The American public naturally viewed them with suspicion, but as on trial they were found what they professed, it was soon displaced by the greatest confidence. Dr. Wim Brandreth was so fully convinced of the truth-of the above simple theory, that he spent thirty years in experiments and laborious research into years in experiments and mornous research into the medical properties of the numerous plants composing the Vegetable Kingdom, his object being to compose a medicine which should at once purify, and produce by specific action, a removal of all bad furnors from the blood by the stomach and bowels, as by the continuation o the use of such a medicine, such humors are sure to be carried off, and the blood assume a state of purity, and whoever takes these Pills, and perseveres with them will be satisfied that Dr.-Win. Brandreth fully attained his philanthro-pic object. It is now an absolute and known fact, that every disease, whether it be in the head or feet, in the brain or meanest-member, whether it be an outward ulcer, or an inward abscess, are all, though arising from many causes, reducible

The subscriber does not pretend to say any thing respecting the good qualities of the machine, but would respectfully refer the farmers of this county, to any of the gentlemen whose names are attached to the certificate below, from whom any information respecting it can be had. It is but necessary to say that for cheapness, ease of horse power, and simpleness of construction, it has not been surpassed by any machine yet invented. 60 or 70 bushels of grain can be (hreshed with one horse in a day, and about 100 bushels with

A CONTRAST,

All nations, from the remotest ages, have had ships, bu Columbus only found out the, way to America. Before the time of the great Spanish navigator, people were only einabled to paddle about the shopes. Just so with the Life Medicines. It is but two years since I first ventured upon in, unknown oceth, and I have discovered the precious object I was in search of— [IEALT]!... Vegetableomedicines were indeed known when I commenced my search but their use was not. By the use of them, I have not only passed from the dejected invalid, to the hate, hearty and native man of business, but yound ratively speaking. I have renewed my youth. I can thus, with confidence in my own experience, advise with my fellow-citizens. Does the reader wagnt proof that the VEGIFABLE LIFF. MEDICINES are suitable to bis own cod? DR. W. EVANS MEDICAL PREPARATIONS

in a licalthy and vigorous state, throuh the operations of which the body receives its growth, its will affect and derange these organs with which the blood has nothing whatever todo. Thus the stomach may be utterly debilited in one moment, by affright, grief, disappointment, heat of

the weather, or any other nervous action, and be wholly unable to digest its food. Is the blood to blame for this !-- A NERVOUS ACTION of long n flacid, prostrate, weakness; and an undue quantity and continuance of purgative medicines, quantity and continuance of purgative medicines, by producing the same effects, will put this organ almost out of use for digesting wholesome solid food, and thus impoverish the blood and the whole system. Is the blood to blame for this?—Again, with regard to the Lungs, it is well known, that a slight cold, occasioned by damp feet or by a correct of air, will inflame the bronchia, all down through the branching air tubes of the lungs, and create either excessive nucuums; or that dreadful insidious disease, Consumption, with pustules and suppuration of the lobes, which, though timely remedies may prevent no earthly skill can cure. Is the blood of the far and bloom-prescriptions of the ablest physician, acing victim to blame for this? So the liver, when prostrating causes have withered away or paralyzed it with distention, becomes unable to carry off the bile from the circulation, and instead of dis-charging it through the gall bladder, leaves is to come through the skin in jaundiced and sallow fluids, and to rush upon the stomach in irregular

and excessive quantities. Is the infortunate blood to blame for this? No! these vital organs He aims to keep the Stomreh, the Lungs, and the Lion having been attempted to be imposed on the public by a counterfeit imitation of great fountains of health and life. For this pure this extraordinary article. pose he prescribes his beautifully efficacious AP-ERIENT PILLS (acknowledged by medical men who have analyzed and recommended them, to be equal to any in the world) in cases which require the cleansing of the stomach and bowels; and his celebrated CAMOMILE or TONIC PILLS, in cases of nervous irritability, stomachic weakness, or general debility. A vast majority of human diseases having their origin in the general sympathy of the principal viscera with the nervous sysem; he thus seeks disease in the most subtile fibres of its roots, instead of vainly hoping to extirpate it by plucking off its leaves afid more dis-tant branches! His APERIENT PILLS will do all that any purgative medicine can do, that is thoroughly cleanse the stomach and bowels; and is CAMOMILE or TONIC PILLS, combining a

nown in medicine, will do, have done and are continually doing more to strengthen, restore and sustain the human constitution than any other medicine that has yet been discovered. Of this he has innumerable proofs, and this no man can deny without falsehoud. Il Stomach and Nervous Disgases. CONSUMPTION CURED. The Indian Specific,

For the prevention and cure of Coughs, Colds, Asthmas, Consumptions, spitting of Blood, and diseases of the breast and lungs,

S the enjoyment of health depends on preserving the complicated functions of the specific, resided upwards of four years among the different tribes of North in a healthy and vigorous state, through the open American Indians, and with unwearied diligence used every means in his power to re-quire a knowledge of the different remedies rations of which the body receives its growth, its nutrition, and its support. It can no longer be astonishing that when these visceraftre deranged and cannot perform their proper functions, the whole system should suffer and become disordered. The blood is made from the contents of the stomach; has its red color and vitality given to it by the action of the lungs, and as it performs its duty in circulations, through the veins and arteries, has its yellow or billious excrement, which may be termed its refuse or work out sediment, collected and discharged by the liver. These of all weathers, many of their complaints may be termed its refuse or worn out sediment, collected and discharged by the liver. These viscera, then, are the antimonial mechanism or ap paratus by which the blood is manufactured and preserved; and it is therefore obvious that the state of these should be the first consideration of the physician. Now there are various causes that will affect and derange these organs with which the blood has nothing whatever to do. Thus the

consumption.

So happy are they in their knowledge of remedies, and so certain of their effects—when applied in time, that it may be said "a true consumption is a disease never known continuance, will-produce settled DYSPEPSIA or heard among them." The truth of this with head-ache, bile, mental and physical debili observation must be corroborated by all who ty, and funeral retinue of other evils. Is the blood to blame for this? Intemperance, by inor heard among them." The truth of this,... laming the coats of the stomach, and leaving it asked why they are exempt from these complaints? The reason is obvious 3 because they immediately seek for relief, and prevent those complaints which insensibly dermine the constitution, and bring on incu-rable consumption.

Bills of direction accompany, each boltte of the Specific, pointing out in a conspicuous manner, all the symptoms in the different stages of these distressing discases; also particular directions respecting Diet and Reg-inen, and how patients are to conduct themcompanied with the most powerful medicines climate, sedentary habits, intemperance, or other if his directions are not faithfully adhered

The public are informed that the depositions of two hundred and eighty seven persons have been taken before the proper and thorities of the city-of Lancaster, Pa, all completely cured of the most desperate cases of consumption, some of which are detailed are never affected by the blood, until after the in the bills accompanying the bottle. blood has been affected by them; they are the makers and masters, and it is merely their work SPECIFIC is One Dollar, and each envel. cping the genuine Specific is signed by Dr. knowing this to be a sound and demonstrated Clarkson Freeman, and the initials C.
