Threshing machines, WIRE COLVED SERVING NEW LOTES OF THE SERVING WILLIAM .

Morse Power. THE great encouragement which the subscribers received during the last year in the sale of their Mareceived during the last year in the sale of their Ma-chines, indiced them to make extensive preparations to meet, the iscreased domains for their article. No time, labor or expense has been spared to procure the very best materials the country-can afford. Their workfuen are experienced and of the first character, and they have no hesitation in assuring the Farmers that they are now able to finy sist them with an article not only count law the static process.

that they are now able to line all them with an article but only equal but decidably superior to any other manufactured in this part of the country.

For specify and clean threshing, with case to the borses, they believe their Machine to be anequalled. Their price is the same as last year, viz. 140 dollars, to their price is the same as last year, viz. 140 dollars, which a not will be required. The mechines are insured for, twelve months, or until they shall have threshed two thousand bushels of grain. They have threshed two thousand bushels of grain. They have now several machines and ready for sale, and will at all times be ready to furnish them on the shortest motice. Orders from a distance will be putentally attended to. For the drilling sum of FOUR DOLLARS, in addition to the price of the Machine and Power, they furnish the farmer an addition that will enable him to shell his Cloverseed.

To the Public.

The subscribers, being desirous of publicly counteracting the chorts which are secretly made to injure the character of their machine, by persons who apper to be actuated by unfriendly feelings towards them, respectfully submit the following GERTIFI-

them, expectfully submit the following GERTISI-CATES to the public.

Tecrtify that I, last year, used one of the Threshing Machines manufactured by J. B. Brady & Co. and during the season, there was threshed on it about four thousand bushels of grain, and about two hundred and twenty five bushels of clover seed, and I am fully satisfied that, for the Farmer's rize, it is superior to any other Machine I have ever seen in this part of the country. I further certify that Mr. Henry Hurst, one of the neighbors, had six wagon loads of clover seed stiff cleaned at a clovermill, and the yield was 22 hushels; and the very -mill, and the yield was 22 bushels; and that the same-quantity-of-stuft-was-threshed on my-machine, and the yield was 22 bushels. Mr. Flurst is of the opin-ion that the stuff he hadled to the mill, was the better lot of the two. FREDERICK KARPER.

May 15, 1838.

Tecrtify that, in August last, I purchased from J. E. Brady & Co. one of their threshing machines, which I used for threshing grain for different Parmers, till some time in March last. During that period I threshed about fifteen thousand bushels of wheat, rye threshed about fifteen thousand bushels of wheat, rye and oats. My expense for repairs of both the Mochine and Horse Power, did not exceed five dollars, and when I sold them, (which was in March, the machinery, appeared to be nearly as good as it was at the time I bought them. The wheels in the horse power, were perfectly sound and substantial, and upon a close examination, I could not discover that the eggs had worn in the slightest degree.

All orders from a distance addressed to the substantial that the eggs had worn in the slightest degree.

All orders from a distance county, will be promptically and faithfully attended to. that the cogs had worn in the shightest degree. I had, for several years previous, been engaged in threshing with three different kinds of machines, which I-fully tried, and I unhestatingly certify that for durability, service and speedy and clean threshing, I have never used or seen my that, in my opinion, will at all compare with the out I had hist year, unless it be one of the same kind.—If attention is given three services are the constitution of the same kind.—If attention is given to the machinery, it appears to me almost impossible for any part of them to get out of order.

- S.Y.MUEL-HOLLINGER.

- May 17,1838.

I, last year, purchased two of the threshing machines of J. E. Brady & Co. (one of which I still have,) and fully tested them. For speedy and clean threshing they are, erginally, a superior apricle, and one that is of givent service to the Parmer. Tesusider it the best article of the Bind Phave ever seen in this part of the country. I take great pleasure in reommending it the Parmer. DANIEL W. ROYER.

May 1, 1838.

I certify that Mr. Andrew Davison and I purchased, last November, one of J. E. Brady & Co's threshing machines, which we fully tested, having threshed wheat, rve, oats and clover seed on it. I am fully satisfied that it is preferable to any other I have seen in operation, and it is an article that will repay the Farmer amply, for its price. It threshes clean, is not liable to get out of order, and is, upon the whole, an article that I can, with great confidence, ABRAHAM S. DAVISON.

Mr, Benjamin Hamilton and I; last year, purchased one of J. E. Brady & Co's threshing machines, with which there was threshed not less than 4000 bushels of grain. It is an excellent article, superior, in my opinion, to any of the kind-Phave ever seen. One of its chief excellenceis, that it is not liable to go out of codes. There are hesitation in recommending it to order. I have no hesitation in recomm JOHN HUMPHREYS.

Is has for many years been a great desiderature among European and American Dentists, to manufacture Teeth from incorruptible materials which should imitate the natural living Teeth.

Many have devoted years to unsuccessful eptriments, and others have succeeded in manufacturing teeth of materials similar to the porcelain ware, but generally they have an opaque white appearance, by which they are easily distinguished from the human teeth.

If carlous Teeth are properly treated at a seasonable time, the progress of the decay may be entirely arrested.
