#### Threshing machines, TEETLA CEVOLENT COULLEGE MERW Morse Power.

THE great encouragement which the subscribers received during the last year in the sale of their Machines, induced them to make extensive preparations to meet the increased demand for their article. No shines, induced them to make extensive preparations to meet the increased demand Tor their article. No time, labor or expense has been spared to procure the very best materials the country can inferd. Their workinen are experienced and of the first character, and they have no hesitation in assuring the Furmers that they are now able to firmish them with an article not only equal-but decidedly superior to any other manufactured in this part of the country.

From speedy and elecan threshing, with case to the horses, they believe their Machine to be unequalted. Their price is the same as last year, viz: 140 dollars, 70 dollars in cash and the balance in six months, for which a note will be required. The machines are insured for twelve months, or until they shall have threshed two thousand bushels of grain. They have now several machines and ready for rade, and will at all times be ready to furnish them on the shortest notice. Orders from a distance will be procumily attended to. For the trifling sum of FOUR DOLLARS, in addition to the price of the Machine and Power, they furnish the farmer are addition that will enable him to shell his Cloverseed.

#### To the Public.

May 15, 1838.

I certify that, in August last, I purchased from J. F. Brudy & Co. one of their threshing machines, which I used for threshing grain for different Farmers, till some time in March last. During that period I threshed about fifteen thousand bushels of wheat, rye, and oats. My expense for repairs of both the Machine and Horse Power, did not exceed five dollars, and when I sold them, (which was in March,) the machinery appeared to be nearly as good as it was at the time I bought them. The wheels in the horse power were perfectly sound and substantial, and upon a close, examination, I could not discover that the cogs had worm in the slightest degree. I had, for several years previous, been engaged in threshing with three different kinds of machines, which I fully tried, and I unhesita ugly certify that for durability, service and speedy, and clear threshing, I have never used or seen only that, in my opinion, will atall compare with the one I had last year, unless it be one of the same kind.—If attention is given to the machinery, it appears to me almost impossible for any part of them to get out of order.

Nay 17, 1838.

I between purposed two of the threships machine.

May 17, 1838. rchased two of the threshing machin I, last year, purchased two of the threshing machine of J. E. Brady & Co. (one of which I still have, and fully tested them. For speedy and clean threshing they are, certainly, a superior article, and one that is of great service to the Farmer. I consider it the best article of the kind I have ever seen in this part of the country, I take great pleasure in recom-mending it the Farmer.

DANIEL W. ROYER.

May 1, 1858. May 1, 1858.

I certify-thatMr. Andrew Davison and I purchased, I last November, one of J. E. Brady & Co's threshing machines, which we fully tested having threshed wheat, rve, oats and clover seed on it. I am fully satisfied that it is preferable to any other I have seen in operation, and it is an article that will repay the Farmer amply, for its price. It threshes clean, is not liable to get out of order, and is, upon the whole, an article that I can, with great confidence, recommend to the Farmer. recommend to the Farmer.
ABRAHAM S. DAVISON.

June 18 1838.

Mr. Benjamin Hamilton and L. last year, purchased one of J. E. Brady & Go's threshing machines, with which there was threshed not less than 4000 bushels of grain. It is an excellent article, superior, in my opinion, to any of the kind I have ever seen. One of its chief excellenceis, that it is not liable to go out of order. I have no hesitation in recommending it to the Farmer.

Licertify that I, last year, used one of the Threshing Machines manufactured by J. E. Brady & Co. and during the season, there was threshed on it about four thousand bushels of grain, and about two hundred and twenty five hushels of clever seed, and I am fully satisfied that, for the Farmer's use, it is superior to any other Machine I have ever seen this part of the country. I further excity that McTiener Hurst, one of the reciphors, had six wagon louds of clover, seed stuff cleanedat a clover mill, and the yield was 22 hyshels. Mr. Hurst is of the opinion that the stuff he handed to the mill, was the better lot of the two.

Nevertheless, these counterfeiting druggists have done & are doing the character of the Genuine a great deal of injury; but it is hoped that individuals will not allow themselves to be decived by designing persons, whose only object is to make money, and who are perfectly careless of consequences. It is a matter of no importance to them whether the poor child is rescued from a bed of sickness and restored to the yearning arms of its parents, or whether him on whom a large family rely solely upon for support, is prevented from filling an early and untimely grave. The time may come when the greatness of their guilt shall become clear to their benighted understandings, and then it is hoped they will endeavor to make some amends by the after purity of their lives.

Every authorized agent has a copperplate certificate of agency, and has it exhibited in his store. Never purchase unless this is seen; and have some regard also to the character the agent bears among his fellow citizens.
