This may certify that I have had in my Mill one of Mr. Howd's direct water wheels for the space of one year. It is a five feet wheel, and I have had a reaction in the same place—I have also had Wheeler's Union Wheel, yet I think Mr. Howd's will do more business with less water than any other I have tried. It does well in back water. I have had from 5 to 6 feet head. I think we could do as much work with half the water as we used to do with the undershoot wheel, which has also been in operation in my mill.

We have just heard of an important ourse of Asthma, which has been effected by the use of it in a neighboring town—the case was that of a female who had for a long time heen under the care of a physician, but had received no relief, and her case was beginning to be considered hopeless. We have no hesitation in saying this preparation of Dr. Jayne, for the cure of coughs, colds, including the court of the American public.—There is no quackery about it—Dr. Jayne is one o, the most skilful practising physicians in Pennsylvania; and wherever his preparations have been thoroughly tested, he is looked upon as a great public tenefactor.—[Somerset (Mc.)
