Williamsburg, Sept. 4, 1841.

To Dr. WISTAR—Dear sir, it gives me great pleasure to say; I have found much relief from your Balsam that I have to send to you for more. I have only used three bottles out of the half dozen I purchased, yet it has done me more good than all the medicine I have ever taken before. A neighbour of mine whose wife was very low with Consumption, persuaded me to let him have some of it, and bought three bottles, which she has taken also. I saw her a few days ago and she told me she helieved it was the only thing that had saved her life. She had tried every thing before, but nothing did her any good, and when she commenced taking it was sick in bed; but is now up and locks better than I ever saw her before. As for myself I am sure it will cure me entirely, for I feel better every day. Send me six bottles more by the bearer, as my neighbor wants three more.

And being ware that the people in this place and vicinity, have been much imposed upon by the introduction of new and highly recommended articles which they have been induced to purchase, and which have been so slightly made, and of such bad material, that in a short-time they have failed and become uscless: We, therefore, do not intend offering stoves for sale until they are fairly tried in this community, and pronounced more durable in their construction, better adapted to the purposes of boiling, baking and all the varieties of cooking than any other stove; also, that they are a great saving of fuel as well as labour.

We carnestly invite farmers as well as residents of this place and the neighboring villages, to call on us at S. Wonderlich's hotel, or notify us by letter (postage unpaid) that they are willing to try our stove—and the stove shall be placed in the

Carlisle, Sept. 11, 1841.

Messrs. E. Robinson & Co.—Gentlemen, I have principles of enonomy and convenience for surpassing any other stove which I have ever seen.

The boilers coming in immediate confact with the fire gives it great facilities for boiling, and the oven is heated on such a principle that bread is baked in a great saving of fuel and labour, and would advise all the done at the same time, in a most perfect manner, and with less than one fourth the fuel I have ordinarily used for the same purposes. I have heretofore been of the opinion bread could not heavel baked in a cooking stove, wish to facilitate the operations of the kitchen.

Hays' Liniment.

No FICTION.

This extraordinary chemical composition, the result of science and the invention of a celebrated medical man, the introduction of which to the public was invested with the solemnity of a death-bed bequest, has since gained a reputation unparalleled, fully sustaining the correctness of the lamented Dr. Gridlley's last confession, that "he dared not die without giving to posterity the benefit of his knowledge on this subject," and he therefore bequeathed to his friend and attendant, Solomon Hays, the secret of his discovery.

To Physicians and Patients.

The Blind Piles, said to be incurable by external applications.—Solomon Hays warrants the contrary. This Liniment will cure Blind Piles. Paets are more stubborn than theories. He solicits all respectable physicians to try it upon their patients. It will do them no harm, and it is known that every physician who has had the honesty to make the trial, has candidly admitted that it has succeeded in every case they have known. Then why not use it? It is the recipe of one of their most respectable members, now deceased. Why refuse to use it? Because it is sold as a proprietary medicine? Is this a sufficient excuse for suffering their honest patients to linger in distress? We think not. Physicians shall be convinced that there is no humbug or quackery about this article.—Why then not alleviate human suffering? If they won't try it before, let them after all other prescriptions fail. Physicians are respectfully requested to do themselves and patients the justice to use this article. It shall be taken from the hottles and done up as their prescription if they desire.
