RECOMMENDATIONS have been published frequently, in the papers, from Physicians and Clergymen, Members of Congress and State Legislatures, respectable private citizens, and among them many of the most distinguished members of churches and other institutions, in reference to Dr. Leidy's Medicines, and it is hop-

od, from the numerous certificates and recommenda-tions, having been published far and near; that all that is now necessary is to keep them before the public, that they may be reminded of them, where they may obtained genuine, &c. &c. One of the most vuluable is

"The Life of the Flesh is in the Blood."
Levitiens, ch. XXII, v. 11.

Be ye purified in your Blood, Be ye purified in your Blood,
And health will attend you.

The great principles advocated by Dr. Leidy, and
In which he is supported by scripture, are
1st. That vitality is contained in the Blood.
2d. The Blood, becoming vitated or incurregives
rise to numerous diseases of the organs of the body,
the storfisch, the liver, the heart, Sc. Ro.
3d. That whatever has the effect of purifying the
Blood, passes with power of re-establishing healthful action to the body.

4th. That Purgation and Starynion, or, in other
words, purging to the extent that is the frequently
done, and at the same time enjoying low diet, and
abstinced from food whomst entirely, are productive
of much more mischief than is generally supposed,
and in most of it will only remark that
By Purgatio — The human system is more or less
debilitated, for the very simple reason that in the
process of purging all is carried off from the stomach
from which nourishment is derived and distributed

throughout the system.

By Starvation—Nourishment is absolutely with-

By Starvation—Nourishment is absolutely withheld from the system so necessary to it, both for sustaioling vital action and aiding nature in bearing up
against that progress of disease.

Hence the consequences of too much purging, and
a continued det must be to produce such a condition
of the system as will enable disease to make more
rapid progress, and extend itself the more casily, and
in a brief time throughout the system.

Admitting the foregoing, it becomes necessary to
unquire how is the Bi hot to be purified? and in employing the means, how is the system to be guarded
against any serious consequences?

THE CAUSE OR CONSUMPTION—Simple as these complaints are usually considered, no one can deny their being: the most common cause of this fatal and distressing disease. It is, indeed a melancholy truth, that thousands fall victims to Consumption every year from no other cause than neglected colds. Yet we find hundreds, nay thousands who treat such complaints of with the greatest indifference, and let them run on for weeks and even months without thinking of the danger. At first you have what you may consider a slight cough or coldy ou allow business, pleasure or carclessness to prevent you from giving it any attention; it then settles upon your breast, you become hoarse, have pains in the slde or chest, expectorate large quantities of matter, perhaps mixed with blood, a difficulty of breathing ensues; and then you find your own the contrary they strengthen the stomach and of the danger.
