TATEON: THE HEART.

BY ELIZA COOK.

THE HEART, the heart! oh let "the As kindly warm, as nobly free,

Oh! keen it like a miser's gold, Shut out from all beside: But let its precious itores unfold In Mercy far and wide.

That beats for self alone.

"As eagle's nestling wing.

The heart—the heart that 's truly blest, Is never all its own; No ray of glory lights the breast

The heart—the heart! oh, let it spare A sigh for others' pain;

And though it throb a gentl touch, On sorrow's faintest call, YTwere better it should ache too much Than never ache at all.

The heart-the heart! that 's truly blest, Is never all its own; No ray of glory lights the breast That beats for self alone.

ADDRESS OF THE STATE TEMPERANCE CONVENTION.

The by the learned at Salamanca—and all the power are liable to great danger from this sense of the presence and approbation of this truth. They sprang not from logical Genius is also distinguisted in activity. serenity of soul, which conduce restly to

These institutions of genius are too often confounded with the visions of fancy and utterly disregarded in the culture of the mind. So it is with Artists when they be take themselves to classic lands to seek the power which can exist only in themselves. Not so with Hogarth, who found in the coarsest scenes of every day life material all time. The life of the Scottish peasant Poetry. By this, too, did Woodsworth

to the common scenes and events of life, in an age when monstrosities alone were ought-when men went abroad for Moseign lands the power for which they should have looked into their own hearts. Again we see this influence in the too great value we attach to constitutions and systems in the States. We look for politi- argues thus: or painting or any other work of art-but in the character of the Nation's life,

> ters to the good of the State. Mr. FURNISS then proceeded, in pointing out other characteristics of genius, to and growth; that it exists in a countless causes, but by the original constitution that nature has given them. Some men seen. to think that by a right construction and arrangement of the circumstances by which he is surrounded, any man may become a model of humanity; but this is clearly false and the effort vain. The efficiency of evunder which he lives. This is justified by observation, and by the analogy of all na-

tinguish the presence of high genius, some difficulty will be found in giving a satisfactory answer. Upon this point the world has evidently been at fault; and men of the greatest power have lived in obscurity, and not until death have they received the hor or due to them. Events, when they or cur, are not seen in their true importance: and of this Sir James Mackintosh mentions a memorable instance. In 1454, the En- light. glish evacuated Paris, an event which was deemed of the first importance-far greater than any other of the age, At the same time, in Strasbourg, was going on law-suit about some copying machinesbut those machines were printing presses; while the other is almost forgotten. Time, then, would seem to be the truest test of

Sometimes nature vindicates herself the whole of the Earth a huge whispering of commerce, with a rapidly increasing popeven against all this; and we see the great gallery, where the feeblest man may make ulation. The Sandwich Islands are filled puffing, too, than which few are more ingenious, now often thrusts forward a bag of are entirely independent, too, of the great air, and sends it to the empyream where it progress in Science, of the vash improveseems to take the place of an everlasting ments in Steam power, and of the still star. So close at hand now is the means greater power of the Press. If then withof thus making one's self heard, that ere out any miraculous interposition, so much long the real wonder-the rara avis-the has been accomplished in 150 years, that real progidy, will be the man who has read should, this progress be continued 150 years books, but never written them. Publicity longer, something very like the Millenium can now be taken as no evidence of greatness. We must look further and higher than this. If we would be safe, we must whose astronomical lectures have excited trust only to the awards of time, and look considerable attention, has also expressed to those upon whose greatness ages have his opinion that the commencement of the

THE MILLENIUM.

MUMBER XVI.

A sermon on the Millenium was recently preached by Dr. Tomlinson, of Augusta College. Dr. T. inculcates the opinion that the commencement of the Millenium will take place one hundred and fifty five for pictures which shall endure through years hence. He defines the Millenium as a period in which the Christian religion was thought tame enough till Burns lived shall be universally triumphant; not only in it and found it a Man's life and made it pervading, but actually extending its reforming and purifying influence throughout make good his claim to the possession of every portion of the habitable globe. Preshigh genius, by lending dignity and touth ident Junkin, however, according to the Cincinnati Chronicle, says that the Millenium will commence in 1866, twenty-four years from this time, and the editor of the em or Corsair heroes and sought in for- paper just named says that if the world were to go on improving for one hundred and fifty-five years as it has done for that' length of time past, something very like the Millenium would be produced. He

MORE INDÁRITANTS THAN THE EARTH NOW nas, provided the soil can maintain them. But the Arts, of agriculture as well as all others, have so increased that it is perfectly reasonable to suppose they can be maintained. If Schools, Colleges, Churches, fers in different men, not from accidental Bible, go on-as they have done, they will be the most enlightened and Christian people, by far, that have ever lived.

2. Within 150 years 100,000,000, of Hindoos have been conquered by British Arms, and the Press and the College been planted in the midst. It is therefore, almost. nay quite inevitable, that in 150 years ery man is determined by his own forma- every foot of Asia will be under the dotion, and is not dependent on the conditions minion of the Anglo-Saxon race. In the mean time, the Press, the College, and the Bible will there produce their natural ture. The early lives of Mozart, Rutten- and benign effects upon the Asiastic mind. house, and other great and gifted men, all Long before that period, then, we may expeet, upon common historical grounds, by process of more arithmetial calculation to see Idolatry lose its hold on the human mind, and the nations of Asia, as those of Rome did, forsake their heathen gods, and murch under the banner of Christianity.

3. Mahomedanism is already expiring, and soon Constantinople will be a Christian city. Jerusalem will be re-inhabited by its ancient people, and the Zion of the Jew and Christian re-illuminated with holy

4. The last fact, to which we shall advert, is the vast discoveries made within recent years, in the islands of the Sea. and the effect of those discoveries on the civilization and advancement of mankind .-The Island of New Holland, is of itself and that slight event vet moves the world equivalent in magnitude to a continet. New Zcaland is another vast acquisition. The course of the Niger has been turned, and the interior of Africa lies exposed to the approaches of civilized man. In connection made their guardians, were left to grow up your families? It never will. The fruit the rescue of a brother from the dominion of memory, they strive to attach branches true worth. Once men carned the renown with this we see colonies in New Holland of your traffic will be bitterness to your of this degrading vice; and many a daught of knowledge, so as to give the whole the they enjoyed by the products of their and New Zealand, began as places of exile

These are a part of the extraordinary transactions, of the last 150 years. They must be produced."

By the way, if I mistake not, Mr. Locke, and will be much more easily managed their Maker; producing that calmness and
