Various remethes it is true have been offered and puffed into notide for the cure of diseases of the Lungs, and some have no doubt been found very useful, but of all that have yet been discovered; it is admitted by physicians and all who have witnessed its effects, that none has proved as successful as this. SURPRISING VIRTUES Of this Balaum, that even in the advanced stage of CONSUMPTION, after all the most esteemed remedies of physicians lawe failed to effect any change the use of this medicine has been productive of the most astonishing relief, and neutrally effected oures after all hopes of recovery had been despaired of. In the first stages of the disease, termed "Catarr-hal Consumption," originating from neglected Collar, it has been used with undeviating success, and hun-dreds acknowledge they owe the restoration of their health to this invaluable medicine alone. In that form of Consumption so prevalent amongst delitate youting females, commonly termed debility, or "GOING-INTO A-DECLINE;"

THE EXTLAORDINARY SUCCESS At ending the use of this medicine in diseases of the Langs, and the many singular cures it has ef-fected, having naturally attracted the attention of many physicians, (as well as the whole fraternity of quarks) various conjectures and aurmises have arisen respecting its composition; some physicians have supposed it to contain *Iodine*, other ignorant preten-ders any it mats contain *Iodine*, other ignorant pretensupposed in to contain Johne, other ignorant preten-ders any in mats contain Jercity, and to asme such substance they each attribute its singular efficacy.— As arch opinions are altogether erroneous, and cal cultated to reguldice many persons against it, we PLEDGE OUR HONOR

PLEDGE OUR HONOR That it contains nothing of the kind, or any thing the least injurious on the coutrary, it is composed of the most simple aubstances, the principle of which are the extracts of TAR and Bid Cherry Bark, and the whole secret of its efficacy consists in the mode by which they are prepared. As we have already publi hed numerous certifi-cates from the highest authority, which prove its virtues beyond all doubt, we consider it unnecessary to exhibit a long list of them in this place, and will only mention a few enser, to show what it has done-WHILE LIFE REMAINS

WE HAVE STILL SOME HOPE. A SURPRISING CURE.—Among the many singular cures which this medicine has effected, there is perhaps none in which its powers are so fully shown as in the case of Mrs. Austin. This hady had been consumptive for several years, and during the greater part of this time had received the best medical attention, and tried all the most valuable remedies, yet nothing could be tound to arrest its progress. She became subject to violent fits of cougling, expectorated large quantities of matter occasionally tinged with blood, and step by step this fearful disense continued its course, until all hope of a recovery was entirely despatied of.— While in this distressing situation, lingering upon the very verge of the grave, she commenced the use of this Baladim, which, to use her own expression, operated almost like a charm. In a few days she expectorated licely, the cough was gradually sup-pressed, and every day appeared to add fresh vigor to her looks, and now, in the place of that emaciated form withering to decay, she is seen mingling in society, in better health than she has enjoyed for years. 11-51

of Syphitis, &c. &c. "The Life of the Flesh is in the Blood." Levilicus, ch. XXII, v. 11. Be ye partified in your Blood, And health will attend you. The great principles advocated by Dr. Leidy, and in which he is stopparted by scripture, are 1at. That vitality is contained in the Blood. 2d. The Blood, becoming, vitiated or impure, gives rise to numerous diseases of the organs of the body, the stomach; the liver, the heart, &c. &c. 3d. That whaterer has the effect of purifying the Blood, postestethe power of re-establishing health-ful action to the body. 4th. That Purgation and Starvation, or, in other words, parging to the extent that is too frequently done, and at the same time enjoying loy diet, and abstinence from food almost entirely, are productive of much more mischief than is generally supposed, and in proof of it will only remark that By Purgation—The human system is more or less debilitated, for the very simple reason that in the process of parging lis earried off from the stomach from which nourishment is defired and distributed throughout the system. By Starvation—Notrishment is absolutely with.

This spirit is highly recommended for all sprains, swelling of the limbs, or leaders, sinews, joints and the multicras an outward remedy, it has no equal, and when used with the Rheumatic Medi-cine, will greatly facilitate the cure. The an-nuals of History do not produce its equal, and it is the context production conjust could in the horm which nourishment is derived and distributed throughout the system: By Starvation-Nodrishment is absolutely with-held from the system so necessary to it, both for sus-taining vital action and ilding nature in hearing up against that progress of disense. Hence the consequences of too much purging, and a continued det must be to produce such a condition of the system as will enable disease to make more rapid progress, and extend it system. Admitting the foregoing, is becomes necessary to inquire how is the Blood to b purified? and in em-ploying the means, how is the system to be guarded against any serious consequences?
