CHERRICE TELES This Institution is intended to furnish a thorough and elegant Educa tion, equal to the best that can be obtained in the Eastern Cities or in any part of the Union.

MR. & MISSES BURNS are how prepared to receive pupils and to give instruction in all the branches of a politic education. The present time of embarrassments and reverses of fortune is certainly enough to convince every parent, who feels a proper solicitude for the welfare and happiness of his daughters, of the propriety of so educating them that they may be; in some measure, armed against the viewsitudes of life-that they may be useful (is well as ornamental) in any position in which it may plenase theaven, to place them. The accomplishments of a refined education appear none the less aniable when accompanied by quali-vised real utility, "The only true politeness, is that which promotes the conflort and happiness of those with whom we come in content." Nor are the real pleasures of life less pleasing because accom-panied by the knowledge that we are prepared to meet the frowns of fortune. The numerous instances that may be seen in every direction of families reared in a filuence—who now have to encounter the bold blasts of powerty without the means whereby to gain a respectable support—should remind parents that while they are educating their daughters in all the refinements and luxuries of life, they should also such that a fast as may be, against the numerous ills that human nature is "here to." The course of instruction pursued in this Institution up real ornament, no proper accomplishment will be neglected—but at the same time things of a more useful nature will be enjoyed proper attention. The 'First abject aimed at in the literary and scientific exercises will be to crolve, chilyute and strengthen the intellectual powers, and to form and refine the taste. The studies of the younger pupils will be so arranged as to task chiefly, the powers of memory, but care will be taken that the youthful memory be not burdened with rules and principles unitelligible to the novice in study. Great importance is at-tached to the right commencement of the pupil's literary education, and throughout her scholastic course, to the adaptation of the subjects of her study to the gradual developing of her mental powers. It will be the aim of the teachers to inquire in the pupil a love of study, and to inculate the idea that ' learning is a pleasing employment and not a tedious labor. The various exercises of the institution will ' be an institute as to relieve can enother and prevent that weariness which is so great a foe to study.
