Wednesday Morning, July 26, 1843.

CPVOLNEY B. PALMER, Esq., the Phila delphia Agent for this Journal, has removed from his late Office in Third near Walnut Street. Philadelphis, and is now located at No. 59 Pine Street, below Third, two squares south of the Exchange. 2 o'clock in the afternoon. Persons in Philadelphia desiring to advertise with us, will please call on Mr. PALMER, who is authorized to act as our Agent.

By The Editor of the Herald is temporarily absent from his post. His absence at the time of the issue of the last number will account for som irregularities in its appearance.

OF Won't some of our influential citizens get 'out a petition praying the Council to mend our pavements, and place railing round our Squares This is a matter which should interest every lady and gentleman of Carlisle. Let the pavements b mended and the Squares beautified, and, our word for it, there will be a corresponding improvement in the morals of our youth.

#### Balloons!

We have been requested by several citizens to call the attention of our constables to the spirit of ballooning so prevalent at present among the in the last stage of pulmonary consumption, who archius of our borough. Evening after evening numbers of these cerial messengers can be seen hovering over our town; some of which, taking fessional, under a solemn pledge that he would refire, descend in the vicinage of barns and stables to the great annoyance of property holders. We store her to health; but the Albians, believing him to be a humbug, gave him notice to quit, and have no disposition to interfere with the innocent

amusements of our young gentlemen; but we tar and feathers. The bride, who was obliged to think our borough guardians should keep their sit in a chair while the vows were pronounced eyes open concerning this matter.

Improvement in whaterer regards the happiness and welfare of our race is constantly on the march to perfection, and with each succeeding day son-new problem is solved, or some profound search re-vester, having an important and direct bearing over man's highest destinies. If we take a retrospective view over, the past twenty years, how is the mind struck with wonder! What replicit strices has solence made in every department of civilized life! parti-cularly in that which relates to the knowledge of the bitman system in health and discuss. How valuable

alarty in this which relates to the knowledge of the human system in health and disease. How valuable and indispensable are the édirative means recently dissovered through the agency of chemhetry! How does the imagination kindle and our admiration glow does the imagination kindle and our admiration glow at the ingenuity, the near approach to the standard of perfection, of the present time! Through the elaborate investigations of Physiolegy, or the science of Lirz, and the Pathology of prevalent diseases, much valuable practical knowledge has been gained. In consequence of becoming nequainted with the or-ganization, the elements of the various tissues and structures of the system, remedies have been sought, after and discovered exactly adapted to combine with.

structures of the system, remedies have, been sought after and discovered exactly adapted to combine with, neutralize and expel morphife matter, the cause of discuse, and substitute healthy action in its place.— The beautiful simplicity of this mode of treatment is not only suggested. by the pathology of discases, not only suggested by the pathology of discases, not only grateful to the sofferer, but perfectly in con-sonance with the operations of Nature, and satisfac-tory to the view and reasonings of every intelligent, reflecting mind. It is thus that Sand's Suraparilla, a scientifue-combination-of essential-principles of the-most vkluchle vegetable substances, operates upon the system. The Sursaparilla is combined with the most shattery productions, the most potent simples of the vegetable kingdom ; and its unprecedented success in the restoration to health of those who had long pined under the most distressing chronic maladies,

in the reatoration to health of those who had long pined undef the most distressing chronic maladies, bas given it an exaited oblaristics, furnishing as it does evidence of its own intrinic value, and recom-mending it to the afflicted in terms the afflicted only can know. It has long been a most important de-sideratum in the practice of medicine to obtain a remedy similar to this-one that would act on the liver, stomach and bowels with all the precision and potency of mineral preparations, yet without any of their dieleterious effects upon the vital powers of the system.
