LAUS DEO.

BY LAWRENCE LAUREE. ALMIGHTY FATHER! Universal God! At whose command Creation sprang to light, How can we cast our mortal eyes abr And view Thy marvellous majesty and might, Nor feel our hearts expand with holy love Toward him who formed the lion and the dove

When erst this globe was but a shapeless hall, Void, without form, and darkness covered all, And light celestial beamed o'er all the world!

Father ! to thee, when shades are on the earth. And hushed each sound of revelry and mirth, Man's fervent prayer ascends; Thou know'st hi

.. beart-The temple whence his holiest feelings start : And Thou disdainest not his prayers to hear. If they but rise devoted and sincere. Even Nature joins her voice, and helps to raise The song of universal love and praise ; The feathered warbler from the leafy tree. Pours forth its richest melody to Thee. The impetuous torrent joins the swelling throng, And adds its thunder to the authem song; Majestic Ocean " shakes his frothy mane," Catches the ceho and repeats again, Till all creation swells the choir to sing The everlasting praise of Heaven's King! Thus unto Thee, O God! great praise is given By all on earth, and all-the-hosts of Heaven!

Our Heavenly Father! when man steps astray Nor let him wander for in Error's maze, A slave to Folly and her luresome ways: Implant within his heart a passion meck, To love religion, and her paths to seek ; That, when his end may come, his soul may fy o hold communion with the just on high!

*Praise be to God,-FUTURE TRIUMPH OF CHRISTIANITY.

The National preacher for August contains a Sermon by Rev. John S. C. Abbot of Nantucket, on the Future Triumphs of

the Gospel.' from Isaiah 11, 5. "And it shall come to pass in these last days, that the mountain of the Lord's house shall be established on the mountains, and shall be exalted above the hills, and all nations shall flow unto it. " Mr. · Abbot says there are many interesting indications that this prophecy is soon to be fulfilled, and invites the attention of the public to some of the most conspicuous evidences that the world is soon to be christianized.

1. The political aspect of the globe in dicates this approaching change.—This Western continent, a little more than two centuries ago, had scarcely been visited by a christian. In a few years the whole new world, from the Arctic Circle to the cliffs of Patagonia, will be inhabited by a professedly christian people. France, England, and America are taking possession of Afri- Book Store, East High street, who are sole Agents ca, and the political movements of nations are crowding into that quarter of the Globe, the influences and institutions of Christen dom. In Asia, the same wonderful movement is apparent on a scale of still more astonishing grandeur. The Turkish Empire, long the terror of the christian world has become its contempt; and the crescent, which now glitters upon the minarets of Constantinople, like the waning moon it symbolises, is a fitting emblem of Mohamed's departing power. China, with her three millions of imprisoned subjects, has and will soon be open to the commerce and intercourse of the christian world. Thus are all the political movements of the nations tending to usher in the universal reign of Christianity.

II. The progress of civilization & the arts indicate this approaching change. Knowledge is becoming like the sun light, every where diffused. Various and powerful causes are operating to bring about the happy time when wars shall ceasesuch as, the rapid extension of piety-the rapid extension of enlightened views of na tional policy—the rapid descent of power from the few to the many-and even the invention of the irrisistible engines of destruction (Torpedoes, Congreve rockets, Paixhan guns and Sub-marine batteries,) which all of those who use must face -all combine to put an end to the ravages and miseries and demoralizing influences of war. Involuntary servitude, too, says Mr. Abbot, is passing away. The doom of slavery is sealed. Its knell is tolled.—
England, France and Spain are saying to the oppressed, go free. Nicholas, of Russia, is endeavoring to elevate his serfs to the dignity of freemen. The religion, the literature, the nonline sentiment of Christians of the dignity of freemen. The religion, the literature the nonline sentiment of Christians of the dignity of freemen. literature, the popular sentiment of Christendom has said of Slavery, it must die .-The wonderful facilties of intercommunication by rail-roads and steamboats, bringing the poles of the earth together, and making neighbors of the most distant nations, are breaking down the walls of pred-

perficial knowledge, have been arrayed as hostile to christianity. Now, with hardly an exception, they defend and establish revealed religion. Astronomy, Geology, Physiology, and Chronology are convertibles and friends. There is not now a single science which makes any pretence even of being antagonist to the Bible.—

The ripest and most cultivated intellects of the world, disciplined in the school of sciences, are now elucidating and demonstrating the divine authority of God's word.

ry? V. The triumphant advance Christianily is now making, indicate its universal extension .- Revivals of religion are multiplying through all the nations of Christendom. Our cities are shaken by pentigostal power. The most secluded villages are echoing the song of Christian deliverance. Hundreds of thousands of the children of idolators are gathered into Christian schools, and trained up into Christian faith and morals. The Pagan syssems of the world are tottering and hastening to ruin. Who can doubt that the pre diction of the text is soon to be fulfilled and that 'the mountain of the Lord's house shall be established on the top of the moun tains, all nations shall flow unto it.'-N.

Improvement in whatever regards the happines and welfare of our race is constantly on the march to perfection, and with each succeeding day som new problem is solved, or some profound secret re venle, , having an important and direct bearing over man's highest destinies. If we take a retrospective view over the past twenty years, how is the mind struck with wonder! What ravid strides has seignee made in every department of civilized life! parti-cularly in that which relates to the knowledge of the uman system in health and disease. How valuable and indispensable are the curative means recently discovered through the agency of chemistry! How does the imagination kindleand our admiration glow it the ingenuity, the near approach to the standard of perfection, of the present time! Through the claborate investigations of Physiology, or the science of LAFE, and the Pathology of prevalent diseases, much valuable practical knowledge has been gained. NO QUACKERY!!! NO DECEPTION. In setting forth the virtues of this truly great me-dicine, we have no desire to deceive those who are dicine, we have no desire to deceive those who are laboring under affliction, nor do we wish to culogise it more than it justly deserves. Yet when we look around and see the vast amount of suffering and distress occasioned by many of the anseases in which this medicine has proved so highly successful, we feel that we cannot arge its claims too strongly, or say too much in its favor.

Various remedies it is true have been offered and puffed into notice for the cure of diseases of the Lungs, and some have no doubt been found very useful, but of all that have yet been discovered, it is admitted by physicians and all who have witnessed its effects, that none has proved as successful as this. This lady had been consumptive for several years, and during the greater part of this time had received the best medical attention, and tried-all the most attainable remedies, yet nothing could be found to arrest its progress. She became subject to violent in the state of coughing, expectorated large quantities of matter occasionally tinged with blood, and step by step this fearful disease continued its course, until all hope of a recovery was entirely despaired of—while in this distressing situation, lingering upon the very verge of the grave, she commenced the use of this Baksaim, which, to use her own expression operated almost like a charm. In a few days she expectorated freely, the cough was gradually suppressed, and every day appeared to add fresh vigor to her looks, and now, in the place of that emaciated freely of the grave, she is seen mingling in

Lancaster county, July 18, 1841.

Dear Sir—Please send me two bottles of your genuine Balsalm of Wild Cherry. I have been affected with Consumption for the last two years, and suffered very much with a severe cough, pains in my breast, difficulty of breathing, night sweats, &c., and having tried numerous remedies, and also been under several doctors, yet I could not find any thing to relieve me until 1 used some of your Balsalm. I got one bottle from a neighbor of nine who is using it, and have found such wonderful relief from it that I have no doubt it will cure me effectually.

Very respectfully yours, &c. Very respectfully yours, &c.

Dear Sir-I procured one bottle of Dr. Wistar's Balsalm of Wild Cherry, from Thomas Reed, Esq. of this place, and tried it ma ease of obstinate Asthma on a child of Paul Schwebie, in which many other remedies had been tried without any relief. The Balsalm gave sudden relief, and in my opinion the child is effectually cured by its use.
