## THE SABBATH.

County basished his with It was pleasent morning in the time When the Deares half-much the bright sun shore, of As when the morning stars first sing together— So quiet and calmly GU his light Upon a world agreet to There was no leaf In motion, and the loud winds slept, and all ...
Was still. The lab ring herd was graying.
Upon the hills ide, quietly—nucell dilly the harsh voice of man, and distant round. have from the murmuring waterfull, cume not As usual on the ear. I've hour stole on, And then another of the morning, calm. And then broke in the Subbath chime of bells-And the old many and his descendants, went Logether to the house of God. I joined The well-apparel dorowd. The holy man Rose ableranty, and breathed the prayer of faith-And the gray Mint just on the wing for heaven-And the fair minid and the bright-haired young man And the child of curling locks, just taught to close The lash of its blue eye the while ;- all knelt In attitude of prayer—and then the hymn, Sincere in its low melody, went up l'o worship God.

Adie white haired pastor rose And looked upon his flock—and with an eye That told his interest, and voice that spoke In tremulous accents, cloquence like Faul's, He lent Isiah's fire to the truths Of revelation, and persuasion came Like the gushing waters from his lips, till hearts Unus'd to bend were softened, and the eve Unwont to weep sent forth the willing tear.

I went my way-but as I went, I thought How holy was the Sabbath-day of God.

# LIVE NOT TO YOURSELF.

On the frail stem in the garden hongs the opening rose. Go ask why it hangs there? "I hang there," says the beautiful flower, " to sweeten the air which man breathes, to open my beauties to kindle emotion in his eye, to show him the hand of his God, who pencilled each leaf, and laid them on my bosom, And whether you find me here to greet him every morning, or whether you find me on the lone mountain side, with the bare possibility that he will throw me one parting glance, my end is the same. I live not to myself.

Besides you highway stands an aged tree solitary and alone. You see no living thing near it, and you say surely that must stand for itself alone. "No," says the tree, "God never made me for a purpose so small. For more than a hundred years I have stood here. In summer I have spread out my arms and sheltered the panting flocks which hastened to my side. In my bosom I have concealed and protected the brood of young birds as they lay and rocked in their nest; in the storm I have more than once received in my body the lightnings bolt, which had else destroyed the traveller: the acorns which I have matured from year to year have been carried farand near, and groves of forest oaks can claim me as their parent. I have lived for the eagle which has perched on my topfor the humming bird that has paused and refreshed its giddy wing, ere it danced and refreshed its group wing, the interest is all setting tord the virtues of this truly great mediator away again like a blossom of the air—for the insect that has found a home within the fold of my bark; and when I can stand no longer, I shall fall by the hand of man, and I this medicine has proved so highly successful, we shall go to strengthen the ship which makes say too much in its favo him lord of the ocean, and to his dwelling

and so I am hurrying down, running where I can, and leaping where I must, but hastening down to water the sweet valley, where the thirsty cattle may drink-where the lark may sing on the margin-where I may drive the mill for the accommodation of man, and then widen into the great river and bear up his steamboats and shipping. and finally; plunge into the ocean, to rise again in yapor, and perhaps come back again in the cloud to my own native hountain, and live my short life over again,-Not a drop of water comes down my channel in whose bright face you may not read, Surveyor & Sorevenen "None of us lives to himself."

Speak now to that solitary star that hangs in the very verge of heaven, and ask the bright sparkler what it is doing there. Its voice comes down the path of light, and cries il am a mighty world. I was atationed here at the creation. I was among the morning stars that sang together, and among the sons of God that shouted for joy at the creation of the earth. Aye, I was there

And the ords of beauty and spineres, of mane
Prom the void abys, by myrisds came,
In the joy of youth, as they darted away,
Wishrough the widening wastes of space to play.
Their silver roles to chorus rung.
And this was the song the bright one's sing.

Here, among the morning stars, I hold my place, and help to keep other worlds balanced and in their places. I have occans and moved has, and I support myri. eds of immerial beings on my besom ; and when I have done this A send my bright when have demissable a lent my bright

The best medical attendance was obtained, and all the known remedies were tried with but an alleviation of her complaint, which always returned with increased malignity—Having lost all hopes of recovery, she had almost determined to give up the use of any other medicine; she was however, by persuassion, induced to try Oakeley's Depirative of Sarasparilla, the use of five bottles of which has removed the disease, and restored her to perfect health.

Improvement in whatever regards the happine and welling of our race is constantly on the march to perfection, and with each succeeding day some aw problem is solved, or some profound scoret re vealed, having an important and direct bearing over man's highest destinies. If we take a retrospective view over the past twenty years, how is the mind struck with wonder ! What rapid strides has science made in every department of civilized life! particularly in that which relates to the knowledge of the human system in health and disease. How valuable and indispensable are the curative means recently discovered through the agency of chemistry! How loes the imagination kindleand our admiration glow at the ingenuity, the near approach to the standard of perfection, of the present time! Through the laborate investigations of Physiology, or the science of Life, and the Pathology of prevalent diseases, puch valuable practical knowledge has been gained n consequence of becoming acquainted with the organization, the elements of the various tissues and structures of the system, remedies have been sought after and discovered exactly adapted to combine with, cautralize and expel morbific matter, the cause of lisease, and substitute healthy action in its place.-The beautiful simplicity of this mode of treatme is not only suggested by the pathology of diseases, not only grateful to the sufferer, but perfectly in consonance with the operations of Nature, and satisfactory to the views and reasonings of every intelligent, reflecting mind. It is thus that Sand's Sarsaparilla, a scientific combination of essential principles of the most valuable vegetable substances operates upon the system. The Sarsaparilla is combined with the most alutary productions, the most potent simples of the vegetable kingdom; and its unprecedented success in the restoration to health of those who had long pined under the most distressing chronic maladies as given it an exalted character, furnishing as it does evidence of its own intrinic value, and recommending it to the afflicted in terms the afflicted only can know. It has long been a most important desideratum in the practice of medicine to obtain a emedy similar to this-one that would act on the liver, stomach and bowels with all the precision and potency of mineral preparations, yet without any of their deleterious effects upon the vital powers of the

Wonderful Lipects of Sands's Sarsaparilla in Norwich, Conn.

Read the following from Mrs. Wm. Phillips, who has long resided at the Falls. The facts are well known to all the old residents in that part of the city.

Nuncteen years ago last April a fit of sickness left me with an Erysipelas cruption. Dropsient collections immediately took place over the entire surface of my body, causing such an enlargement that it was necessary to add a half yard to the size of my dressessaround the waste. Next followed, upon my limbs, uleers, painful beyond description. For years, both in summer and winter, the only mitigation of my suffering was found in pouring upon those parts cold water. From my limbs the pain extended over my whole body. There was literally for me no rest, by day or by night. Upon lying down these pains would shoot through my system, and compel me to arise, and, for hours together, walk the house, so that I was almost entirely deprived of sleep. During this time the Erysipelas continued active, and the ulcers enlarged, and so deeply have these eaten, that for two and a half years they have been subject to bleeding. During these almost twenty years I have consulted many physicisms. These have called my disease—as it was attended with an obstinate cough and a steady and active pain in my side—i dropsical consumption; and though they have been skillin practitioners, they were coult and they have been skillin practitioners, they many physicians. These have called my disease—
as it was attended with an obstinate cough and a steady
and active pain in my side—a dropsical consumption;
and though they have been skillul practitioners, they
were only able to afford my case a partial and temporary relief. I had many other difficulties too complicated to describe. I have also used many of the
medicines that have been recommended as infallible
cures for this disease, yet these all failed, and I was
most emphatically growing worse. In this critical
condition, given up by frieuds, and expecting for myself, relief only in death; I was by the timely interposition of a kind Providence, furnished with your,
to me, invaluable Sarsaparilla. A single bottle gave
me an assurance of health, which for twenty years!
had not once felt. Upon taking the second my enfargement diminished, and in twolve days from the
8th of October, when I commenced taking your Sarsaparilla, I was able to enjoy sleep addrest, by night
as refreshing as any I ever enjoyed when in perfect
bealth. Besides, I was, in this short time, relieved
from all those exeruciating and unalteviated pains
that had afflicted my days, as well as robbed me of
my night's repose. The ulcers upon my limbs are
healed, the Erysipelas cured, and my size 'reduced
nearly to my former measure.
Sand's Sarsanacilla will also remove and memo-

my night's repose. The ulcers upon my imps are healed, the Erysipelas cured, and my size reduced healed, the Erysipelas cured, and my size reduced healed, the Erysipelas cured, and my size reduced healed, to my former measure.

Sand's Sarsaparilla will also remove and permanently oure diseases having their origin in an impure state of the blood and deprayed condition of the general constitution, viz: Scrofula or King's Evil in its various, forms, Rheumatism, obstinate-outaneous cruptions, blotches, biles, pimples, or pustules on the lace, chronic sore eyes, ringworm or tetter, scald head, enlargement and pain of the bones and joints, stubborn ulcers, syphilitic symptoms, diseases arising from an injudicious, the of mercury, female derangement and oblies imilar complaints.

Thus much do I feel it a privilege to testify to the efficacy of your, health-restoring Sarsaparilla. A thousand thanks, sip, from one whose comfort and whose hope of future health are due, under, God, to your, instrumentality. And may the same Providence, that directed the to your aid, make you the happy and honored instruments of blessing others, as ulseased and despairing as your much relieved and very grittefff friend.
