he also designs to put a supplysof, in imany of the public places, in and out of the County. A trial of its quality, will east but little. Like all other paints it does best with flax seed oil; but for weather beaten timpier, on three it answers very well with flat oil; milk, or even water. It adheres more closely than little; or any other paint. Several gates, &c in the neighborhood have been painted for a year past; some with milk, others with water, and are now as brighn as when it was first put on. In either, way it is, great preservative of timber, possessing great tenacity.

Plead the following from Mrs. Wm. Phillips, who has long resided at the Falls. The facts are well known to all the old realdebts in that part of the city. Messays. A. B. Sands. K. Co.—Sins. Most gratefully do I embree this opportunity for stating to outhe great relief I obtained from the use of your Sarsaparilla. I shall also, be happy, through you, to publish to all who are affected, as I lately was, the account of my unexpected, and even for a long while depair of citre. Mine is a primit story, and trying and sinkening as is the rangalive of it, for the sake of many who may be surely relieved, I will briefly yet accurately state it.

Nincteon veint ago last April a fit of sickness left me with an brysipelas cruption. Dropsical collece with an Erysipelas cruption. Dropsical collec-onsimmediately took place over the entire surface tions immediately took place over the entire surface of my holy, causing such an calargement that it was necessary to add a half yard to the size of my dresses around the waste. Next followed, upon my limbs, ulcers, painful beyond description. For Fears, both in summer and winter, the only rhitigation of my nleers, painful beyond description. For years, both in summer and winter, the only filtigation of my suffering was found in pouring upon those parts cold water. From my limbs the pain extended over my whole body. There was literally for me no rest, by day by by hight. Upon lying down these pains would shady through my system, and competed me to ariske, point, for hours together, walk the house, so that I axis hannet entirely deprived obsleep. During this time the Erysipelas continued active, and the alcers enlarged, and so deeply have these earlier, that for two and a half years they have been subject to bleeding. During these almost twenty years I have consulted many physicians. These have called my disease—as it was attended with an obstinate cough and a steady and netive pain in my side—h dropsical consumption; and though they have been skillful practitioners, they were only able to afford my case a partial and temporary relief. I had many other difficulties too complicated to describe. I have also used many of the medicines that have been recommended as infallfule cured for this disease, yet these all failed, and I was most emphatically growing worse. In this critical condition, given up by friends, and expecting for myself, relief only in death; lewas by the third with your, to me, invaluable Sarspaprilla. A single rhouter giver me an assuming of health, which for twenty years liad not orice felt. Upon taking the second my in largement diminished, and in washer for each year and serious as any rever enjoyed when in period health. Besides, I was, in this short time, but in period health.
