

REARL & EXPOSITION

Wednesday Morning, June 4, 1845.

JOHN DUNN BROTHERS JONATHAN.—We have received from the New York publishers, a most magnificent newspaper, sheet for the 4th of July containing some fifty of the fifty large National Engravings, and an illustrated Declaration of Independence, with engraved signatures of the fifty signers. The contents comprise historical incidents, anecdotes, songs, and romances of the revolutionary war, and of the last war, notices of remarkable revolutionary characters, &c. Washington's reception by the ladies of Trenton, a beautiful picture, occupying half a page of this stupendous newspaper, is worth double what the paper itself costs, which is but 12 1/2 cents per copy.

They will be for sale at Knickerbocker.

LOOK OUT FOR BURGARS!—Several daring attempts have been made within the last two weeks to enter dwelling houses and offices, which indicate that our burgars have been pounced upon by a gang of desperadoes and midnight prowlers whose object is plunder and villainy. So far their attempts have been frustrated by speedy detection, but it would be well for housekeepers to keep a vigilant eye to their premises. It is thought that many of these attempts have been induced by the mistaken belief that large sums of money are now retained in stores, offices and private houses since the close of business in the Bank, which were formerly deposited there. This, however, we opine, is a mistake, as our citizens will of course avail themselves of neighboring institutions in the absence of one here, to make deposits of value.

Our respected senior brother of the U. S. Gazette, as we know he would, makes the subjoined *amende* for his unintentional depreciation of the merits of the late Solicitor of the Treasury. The lending of our columns to the vindication of Mr. Penrose in the present case, had nothing to do with his late political course. But the ability which may earn for any of our citizens a high character abroad we look upon as the common fame of our town, which it is our duty as well as pleasure to cherish and defend.

As to the ability displayed by Mr. Penrose in his late office, it is within our knowledge that were the written testimonials of Mr. Forward, Mr. Spenser, and others of President Tyler's Cabinet desired to point out "the law officer of the government," they would be cheerfully and unhesitatingly given in favor of Mr. Penrose. We take the following from the *Gazette of Saturday last*:

Our respected contemporary in Carlisle suggests that in referring to a dismissed official at Washington, as the late Clerk of the Treasury Department, injustice was done to C. B. Penrose, Esq., late Solicitor of the Treasury, who was able and willing to discharge all the duties of his office. We can assure our friend that no injustice was intended in writing the article, and no thought entertained of any deficiency in ability, industry, or personal application of Mr. P. We had some occasion to notice the constant application of Mr. Penrose to his office business, as Solicitor of the Treasury, and are bound to bear testimony to the courtesy with which he received and assisted applicants at his office.

THEORY OF STORMS.—We have been favoured by Professor Eady with a copy of his first report on Meteorology, made to the Surgeon General of the U. S. Army. Prof. Eady is well known as the author of a theory in relation to storms, which although it has been much ridiculed by many, has nevertheless arrested the attention and enlisted the firm convictions of some of the most learned men of science both in this country and Europe. We do not profess to be able to speak of the merits of this theory, in which it is asserted among other discoveries, made in the course of the investigations, that "a fall may be produced in calm weather, in time of drought," and that "great storms may be prevented." If these propositions be demonstrated, their importance to those engaged in agricultural and commercial pursuits, cannot too highly be estimated. In making his investigations into the course of storms, Prof. Eady seeks the assistance of individuals through the country, to communicate their observations to him at Washington.

Prof. Eady's first report consists chiefly of charts, exhibiting by various symbols, the winds and barometric fluctuations and changes of temperature, which accompany storms as they pass from the western to the eastern part of the United States; for it appears that all storms in the United States travel towards the east. We shall endeavor hereafter to present some of the results of his observations.

THE FAIR OF AYA.—Mr. Marchal, the renowned performer of Hindoo Miracles and legendaries, has been giving a series of entertainments here within the last week, and has set many of our good citizens, old and young, quite beside themselves with astonishment at his wonderful performance. Of course his audiences have been a "perfect jam."

EXAMINER OF INVENTIONS.—The State Treasury has issued a circular to the different counties of the Commonwealth, proposing that the amount of State Tax levied in each county shall be known to the State Treasury prior to the 1st of August next. Should this proposal be carried out, the interest on the State Debt due on the 1st of August next will be promptly met, and besides that, each county availing itself of the offer will effect saving of fifty per cent, which will be deducted from the amount of Tax due from each county. A notice from the Commissioners of this matter in relation to the matter, will be found in our advertising column.

AMERICAN GUANO FRIGATE.—The city of Philadelphia was visited by another destructive fire on Tuesday last which destroyed between 60 and 70 houses, 30,000 or 40,000 worth of property, and rendered about 700 people homeless. The houses were principally occupied by industrial and working laborers. The fire was caused by the public that the fire will not affect the business of the city in the least.

COMMENCEMENT

The literary exercises and entertainments incident to the annual Commencement of Dickinson College, promise to be of such a character, through the exertions of the Faculty and the Societies, as to give unusual brilliancy and eclat to this occasion this year. In addition to the oratorical exercises of the class of graduates, several other addresses will be delivered by gentlemen of eminence and talents, which cannot fail to make the occasion one of surpassing interest.

On the morning of the 9th of July, the Hon. BENJAMIN F. BUTLER, of New York, will deliver the annual Oration before the literary societies of College. Mr. Butler is a prominent "democratic" politician of that State, but equally well known and esteemed for his exalted character as a man, and his eminent abilities as a writer and speaker.

In the afternoon of the same day, WILLIAM S. WATERS, Esq., of Princess Anne, Md. will deliver an Address, and Mr. N. C. BROOKS, of Baltimore, a Poem, before the acting, graduate, and honorary members of the Union Philosophical Society of College. A treat may be looked for in these performances. Mr. Waters is a former graduate of Dickinson, and left the institution a few years since with a promise of future excellence which his subsequent course has fully sustained; Mr. Brooks has achieved an enviable fame as one of the true Poets of the country.

On Thursday, the 10th, the exercises of Commencement take place; and from the amount of talent comprised in the class of graduates, it is believed their performances will be both creditable and entertaining. The exercises of both days will take place in the M. E. Church, and the public are cordially invited to be present.

In connection with the above we ought to mention the Oratorical Exhibition of the Union Society, which takes place on the evening of the glorious 4th of July. Every one here knows of the brilliant throng of youth and beauty which the semi-annual displays of the Societies never fail to bring together, and the universal interest which is manifested on these occasions, when like at ancient tilt or tournament bright eyes surround the arena, while eloquence glows under the inspiring gaze of beauty, and loveliness is constrained to pay homage to the power of genius.

From these preparations the public may anticipate with pleasure the coming of the literary "trois jours" of July, and the entertainments with which we shall then be favored. It will be a rare time for the friends of Education at a distance, and the toasted denizens of pent-up cities, to avail themselves for a visit to this part of the country; the elevated mental enjoyments which they will find presented, added to the natural enjoyments of free pure air and beautiful scenery, could not fail to make the visit more than ordinarily gratifying as well as salutary to the mind and the body.

MARRIED.
On Thursday evening 13th, 1845 by the Rev. Henry A. Smith, Pastor of the Methodist Church, in the 25th year of her age. Her remains were brought to this place for interment.

DIED.
In this Borough on Monday night week, Mrs. RACHEL LOBACH, widow of the late S. Lobach, aged about 62 years.

WAS FOUND.
Within a few days past, in the care of the subscriber, a small sum of money, and a gold locket, shape of a heart and marked with the initials S. D. L. The owners can have them by calling. G. W. HITNER & CO.

TO THE TAX-PAYERS OF CUMBO CO.
The County Commissioners deem it important to call attention to the provisions of the 42nd Section of the Act of 29th April 1844. By the provisions of that Act, if the whole amount of taxes is paid to the State Treasurer by any County fifteen days prior to the 1st of August, in any year, such county is entitled to an abatement of 5 per cent on the amount of taxes levied for that year. When due and payable under the provisions of said Act, any individual or corporation shall pay his or her taxes, as soon as possible. The State will then be a help on the estate on which it is charged until fully paid and satisfied.

The importance and advantage of paying the tax before it is due, will be obvious to our citizens when it is known that the result will be to place in the county treasury about one hundred dollars of the amount collected for State purposes. Under present circumstances when our citizens will be subject to an increased county tax to the debt incurred in the creation of a Court House, the saving annually would materially decrease the tax required for county purposes—but should even a few of our taxpayers be diligent in paying their taxes in the time specified by the Act, to induce promptness in payment, will be defeated. We are advised by the State Treasurer that the interest on the amount collected for State purposes, will be paid in the several counties of our Commonwealth as prompt in the payment of the State tax. We feel proud in ranking our County with those counties of our Commonwealth which evince a determination to discharge their debt to the State, and credit of Pennsylvania shall remain unimpaired.

R. LAIRD, Esq., Comr. JOHN IRWIN, CLK. Carlisle, June 4, 1845.

JOHN IRWIN, CLK.
The several collections of County and State taxes are requested to pay to the County Treasurer, on the first day of August next, all taxes they may have collected by that time.
