FOR HORSES.

The Great English Remedy. Dr. Barber's Liniame nt

This most valuable Embragation has been used with wonderful success in the cur of some of the most troublesome diseases with which the horse is affected, (without destroying the hair) such as old strains, swellings, stiff ness of joints, galls produced by the collar and saddle, strains of the shoulders, stiffe, heef, pastern and coffin joints, strains of the whirl bone, inner, and iotlock, pall coll. fistules, curbs, splints, spavin, windgalls, puffs, &c.

It very soon cores old or fresh wounds, cuts, brulses, fistules, poll cill, curbs, otc., and gives instant rehef in the scratches, grease, otc., and the diseases incident to horses having white feet and noses produced by St John's Wort, which so often destroys the hoofs and bones of the feet, and resists the action of subphur and e of the most troublesome diseases with ic feet, and resists the action of sulphur, and vitriol cintments, and other remedies equally werful.

No application has herstofore proved se soful in relaying stiffness of the tendons and oints, and producing such immediate and conclicial effects in cracked heels, brought on by high feeding, splints and sprains.

This Embrocration is highly recommended to farriers, keepers of livery stables, wagoners,

stage proprietors, and private gentlemen own-ing horses, as an invaleable remedy, and should be constantly kept in their stables. —Also farmers, whose horses are so liable to kicks, cuts and wounds, will find it equally advantageous to keep it constantly on hand.— It is equally beneficial in the treatment of working cattle, for galls, sore necks, cuts, ounds, etc.

Lancaster Co., Neffville, Dec. 11, 1846. Dr. Keeler—Sometime last summer your agent left me some of your Infant cordial and Carminleft me some of your Infant cordial and Carmin-ative, urging me to try it. It so happened that I had a case, a young shild about six months old, whose stomach and bowels were in a very disor-dered condition, caused by a deficiency of its mother's milk. The child was a mere skeleton, there was much tormina, tenesmas and constant evacuations. I administered every medicine I could think of, with but a slight alleviation of the complaint. I then thought of giving your medi-cine a trial commencing with small doses. soon however perceived the child could bear full dose as recommended in directions; before it had taken half a bottle, the stomach and bow elshad recovered their natural tone, every other els had recovered their natural tone, every other had symptom - vielded, and the -child rapidly re-

covered.

I have no hesitation in saying that your medicine is the very best for the above complaints I have administered in a 21 years' practice.
