CARLISLE, PA. WEDNESDAY, MARCH 22, 1848. GEN. TAYLOR'S OPINIONS. To the Editors of the National Intelligencer-GENTLEMAN: Having failed this mor-ning to obtain the unanimous consent of the House to make a personal explana-tion, I'avail myself of this mode of cor-recting an error in your report of the debate of yesterday in Committee of the Whole, from which I would appear to have volunteered answers in regard to Gen. Taylor's political principles. My first answer was in reply to a question Gen. Taylor's political principles. My first answer was in reply to a question put to me personally as chairman of the committee on Manafactures by Mr. Gro-Dixos, of Ohio, as to whether Gen. Tay-lor was in favor of the protective policy ? (This question are entirely omitted adopt the policy of "the first Presidents," Washington, "Jefferson, and Madison, who are all known to have been decided ly in tavor of that policy, all of them ha-ring repeatedly recommended to Con-gress the protection of domestic manufact. gress the protection of domestic manufac-. tures ; and Jefferson even went so far as to recommend positive "prohibitions' in certain cases. I also said that the Gen. was in favor of protection, because he had declared that he was "a Whig in. principle," and I believe there is not a Whig in the Union opposed to protection. To be a Whig and oppose protection is inipossible, whiggery and protection be-ing inseparable. But I added that he was in favor of protection from my own knowledge; and I will now give my rea-

sons for that declaration. I addressed a letter to Gen. Taylor, conveying to him the resolutions of a Whig meeting, of which the following is ene, viz: "REBOLVED, That we have the fullest

curial and Hercelliary predispositions, Ka., 3C7 In every change that is taking place in the body, it.is.manifest that it is brought about by something having a substantive existence. If we suppose the organs of our body originally perfect, they must continue perfect unless changed by the intervention of something that bears an unheal-thy rolation to it. In all cases of disease, there must be the interposition of some new ingrediont which by playing its part as a cause, served to modify the properties before connected with the body. It is abourd to talk of apothaneous disease taking place in organs previously healthy, with-out the interposition of some morbific agoit; as well might we expect a piece of chalk to transfer itself spontaneously into Plaster of Parie, without the aid of Subphuric Acid. In all disease there is a prior cause which must be removed, thro' the agency of the Blood. For this purpose there is no remedy superior to the Pancea. In evidence-the following is submitted to the public?
