KEEP IT BEFORE THE PEOPLE! The Washington Union; the "by authority organ of the great locoloco party, gives the trite position of Taylor and Cass on the question of Slavery extension. The editor of the Democrat says we are committing a fraud upon our realters in representing. Gen Taylor be opposed to the extension of Slavery.

But the following extracts from the Union show, that two are obtreet, and that it is the Democrat which is fulsifying the views of Cass and Taylor.

INFLAMMATION OF THE EVES .- Wright's INFLAMMATION OF THE EXES.—Wright's Indian Vegetable Pills will be found a certain cure for the above painful malady; because they purge from the body those corrupt and stagnant humors which are the cause not only of inflammation of the eyes, but of every description of disease. From three to six of the above named Indian Vegetable-Pills, taken every night on going to bed, will in a short time completely rid the body of every thing that is opposed to health; and therefore will assuredly make a perfect cure of inflammation of the eyes, and at the satist-time the blood and other fluids will be of such a healthy quality, that disease of any kind will be absolutely impossible.

I got a hottle of Schenck's Syrup; it did me no good. I then applied two physicians, who presorbed for me sayeral times, but did not exercise. At last my physician advised me to take Dr. Wistar's celebrated lastson of Wild Cherry, which has performed so many remarkable curses. I did so, and I believe that saved my life; my cough left mo entirely, when I had taken a single bottle. I am now enjoying good health. If I ever again have a similar attack, or any of my family, I shall mendiately recort to Dr. Wistar's lalisam of Wild Cherry. The physician who recommended his Balsam to me, was induced to do so from his own personal observation and experience in using if. TO BUTTER MAKERS. TO BUTTER MAKERS.

THE subscribers having purchased the right of Cumberland county for making Crowell's Patent Thermometer Churn, they would respectfully inform the Farmers and public in general, that they will make and offer for sale their Churns at the Cabinet Ware-room of Geo. Spangler, in N. Hanover street, next door to the office of D. Smith, Esq.

The principal advantage this Churn has over all others is, that this so constructed that the top can be taken off so as to give free access to the inside of the churn, which makes it convenient to put in the cream and get out the butter. A

o put in the cream and get out the butter. hermometer is attached to the end of thurn so as to show the exact temperature of Churn so as to show the exact temperature of the cream, which experience shows should be 60 degrees to gake good Butter. A chumber or space is arranged around the bottom of the churn-for the purpose of admitting cold or warmwarter, so as to bring the cream to the desired temperature without mixing the water with the cream. The secret in churning butter is, to have your group at the prepar temperature; it cream. The secret in churming butter is, to have your cream at the proper temperature; it will produce more and better butter, and take less time in churning; it churns equally well in cold or warm weather—no such thing as having scalded butter. All that is necessary to make good butter all seasons of the year, is to get one of Growell's Patent Thermometer Churns—We would most respectfully invite the public to call and exumine for themselves.

GEO SPANGLER, SAM'L. MYERS.

Mr. Geo. Spangler-Sir: We have been using Mr. Geo. Spangler—Sir: We have been using the Thermometer Churn I got of you for some time, and find it far superior to the old burrel churn for reveral reasons; first, great saving of time in getting butter, the average time of churning about fifteen minutes, (all weathers); secondly, the butter when obtained is much firmer than when using any other churn; inally, in folks say they would not exchange it for any other churn and twice the original cost of the Thermometer Churn.

Sep. 28, 1818.] G. W. SHEAFFER.

Mr. Geo, Spangler—I have had the Crowell Thermometer Churn you made for me in use at my place, and I do not hesitate to say that no Farmer should be without it. Fiteen munutes is all the time required to make Butter, and the is all the time required to make Bujer, and the value of this saving of time and labor consusts in this, that it requires no more time at any one season than another; and that the temperature of the cream necessary to make butter, is produced with certainty, and without the admixture of warm or cold water with the cream itself.

FRED'K WATTS.

Carlisle, Aug. 17, 1818. For the benefit of the better part of man (wo-man) I give this certificate. After using the Thermometer Churn made by Mr. Spangler of

Thermometer Churn made by Mr. Spangler of this place, I would have none other in my family. We have been using the old barrel churn for thirty years past, and I must say it is not to be compared to Crowell's Thermometer Churn, either for speed of churning or convenience; in the old-barrel churn it took generally from four Josix hours to churn the churning, now in the Thermometer Churn we can churn butter in from fore to twenty minutes, by bright pring the from fifteen to twenty minutes, by brining the cream to the proper temperature. I can recommend it to the public as no cheat.
