Agricultural.

ON THE IMPROVEMENTS IN AGRICULTURE AND THE USEFUL ARTS, THAT GROW OUT OF CONCENTRATION AND POPULATION.

BY J. S. SKINNER.

These improvements are in nothing more obvious than in the use which has been made of STEAM, the great discovery and the great labor-saving power of modern times.

Go into a factory in the towns, where "men do congregate," and see the variety of purposes to which steam is applied, from the lifting of the till-hammer to the polishing of a needle. Then go into the fields of the husbandman and ask what it is doing for him. Almost nothing.—Behold how perfect, how wonderful is the machinery employed in the conversion of the raw materials into the thousand forms that prepare them for use, in towns and factories where men readily combine all their powers, intellectual and physical; but what has steam yet done in the work of PRODUCTION of the fruits of the earth? Look at the farmer's implements! The simple axe he uses fells a small tree, only after a thousand strokes—but only get that tree to the river shore, where it can be reached by the man who lives in a concentrated population; and see what he will do with it!

By steam, against wind and tide, you shall see him drag it on board his vessel, from which he delivers it again to the man of the town, who has invented a steam saw-mill to cut it up into planks of any thickness even that of a wafer, and with a power and expedition over that of the secluded farmer's axe of 1000 to 1.—This hitherto unwieldy block of timber, as it came from the hands of the country-man, (whose business has not been improved by the genius which concentrates excites and rewards,) being thus in an instant ripped up into boards, you shall see each board passed with the speed of thought, and between planes that shave and groove and tongue it, and prepare it with perfect precision for the use of the carpenter and the cabinet maker; and they again, if need be, with labor-saving machine that looks miraculous, will cut the tenon and mortice, and the huge tree is thus, by the inventive arts that flourish wherever men can combine, sliced up and fitted for its final uses with mathematical exactness and the celerity of magic. Thus it is, farmers, with everything else—where the policy of a country draws men together, there improvement of all sorts ensue, and the march of discovery is steady and rapid. The young men can afford to get married, and the daughters have no difficulty but to decide between rival admirers. Population increases and prospers. But where the barbarous policy is to break up the useful industries—to send the products of the plough to foreign looms, to shut up the coal-pit and put out the fire in the furnaces and scatter our population to the far West, to make MORE wheat and MORE corn and MORE meat, of all of which we have already a surfeit; and the stimulus to invention is withdrawn, and invention ceases, and with it improvement in all the arts, population diminishes, and nothing increases but ignorance, poverty, and old maids.

To show the wonderful difference in the contrivances for industrial purposes, where men live wide apart and where concentration whets the genius—take for example, your own field of Indian corn, or of wheat—your FARM is your factory—yet how rude and comparatively inefficient are all your implements and appliances compared with those in the hands of the mechanic and the manufacturer, and hence how slow and laborious are all your processes, except such improvements as have been invented for you by mechanics—not in many cases, either exactly for you, but to meet the more earnest and remunerating demands of the manufacturer and the commercial man, and only incidentally turned to your advantage.

Look at your axe, and your hoe, and your scythe, and see how simple and how laborious in their form and their uses until the grain reaches your barn, where, as in Mr. Bolling's and a few others it meets the power of steam, not originally applied for your benefit or any stimulus offered by your ACTIVE AND VIGILANT SOCIETIES but to meet the sharp-sighted requisitions of men who live in concentrated communities.

Does any body believe that if commerce or manufactures had needed a machine like Hussey's for reaping wheat, as agriculture has done since the time of Noah, that it would not have been perfected centuries ago? compare it with the thousand more complicated machines to serve the use of the arts pursued and practiced in the towns—compare it with the machine for making cards!

Well, let us follow your wheat to the great merchant-mill and see how incredibly expeditious and beautiful are all the operations it there undergoes, and yet how incomparably more expensive is the machine of production, than any such as are employed in fashioning the natural products of the land and of agricultural industry—the timber tree or the grain crop.

Take for instance, your 1000 bushels of wheat, manufactured with a year's labor on one hundred acres of land, for which you would ask $2000. Then calculate the amount of manual labor in tediously ploughing, and harrowing, and sowing, and reaping and threshing, and cleaning, and taking to market. If at the end of a whole year, one-eighth of the crop remains clear profit in your hands, it is more than many get, though they may not and do not choose to know it. See then the miller, with his light and comparatively inexpressive machine of conversion, when he takes your crop, how he will in a few hours pass it through the mill—fan, grind, bolt, cool and pack it, and after taking as much of it for the labor as you bestowed months upon it, he hands it over again to the merchant, who makes you pay again first for inspecting and then for selling it—selling it to the man who in Manchester is weaving your wool—or your cotton—that is if you can there meet the competition of the commercial world in the markets of the world as Governor Wright and the Patent Office Commissioner recommend we shall prepare and strive to do, instead of compelling the Manchester spinner to come and spin your wool and your cotton here in your own country, where he would be sure to eat your flour and your meat.—And why not carry your wheat and corn too, to be ground too in England, as well as your wool and cotton? If you want the miller here to take out a part of his toll in the corn he has need of, why not require the cotton spinner and ironmonger of England to come here and take of your cotton and wool a part of what is needed for them to wear?

How much better then, in a word, says common sense, how much more natural—more profitable to compel the loom to come to the cotton fields and the sheep-pastures, and the lap-stone to the hides, and the mill to the corn, and the anvil to the plough, than to force, as our wise tariff policy does, the planter and the farmer to be dragging their raw and bulky produce in all directions all directions all over the world, to be fashioned for use by the foreign capitalists who never buy our produce, even after it has encountered the expenses of transportation across the ocean, unless we can work hard enough and mean enough to undersell the half starved pauper laborers on the Rhine and the Black sea, who go half clad, and live on black rye-bread called PUMPERNICKLE. Let then the policy which prevents concentration in the old States be called the PUMPERNICKLE POLICY!

Watches and Jewelry!

Stoves! Stoves!! Stoves!!!

At No. 97, South Second street, Philadelphia.

C. J. TYNDALE, respectfully invites an examination of his large stock of Stoves, embracing some of the best and most elegant patterns of Pennsylvania, New York, Peekskill, Troy, &c., together with a beautiful assortment of Fancy Sheet Iron Stoves and Radiators, for parlors, dining rooms, chambers, or kitchens. He believes that his assortment will compare to advantage with that of any other establishment. He has also a splendid stock of Orr's celebrated Air-tight Stoves, for which he has been agent for many years in this city, in the manufacture of which for excellence and cheapness, he refers to his numerous purchasers, and for beauty of patterns he believes himself unrivalled.

For Stoves, whether of Wood or Coal, his assortment is complete. He returns his thanks to his old customers, to whom, and to the public he renews his invitation to give him a call at the old stand, No. 97, S. Second street, Philadelphia. [sep20

G R CROOKS

Sickly Season.

THERE is not a man, woman, or child, but should take medicine at this season of the year, but more especially at this present time: for there probably were never so many causes existing at one period as there are now, so likely to produce a state of sickness. The repeated changes in the atmosphere,—by acting as they do upon the constitution and quality of the blood itself, give occasion for the most fatal and malignant disorders. The bile becomes (and often without any warning) in a most acrimonious condition from these repeated changes, and if the stomach and bowels have been neglected previously, the first symptoms require immediate attention—Even those who have a healthy disposition of body, are subject to sickness under these circumstances. Therefore, to prevent any danger, we ought carefully to guard against a costive state of our bowels. Once or twice they should be evacuated in twenty-four hours. There are many causes which produce unhealthy blood: sometimes it may arise from grief, at others when the system is in a state of fullness it can take place from sudden joy; close application to literary undertaking can produce it—in all cases where many persons have to be seen and spoken to, which producing nervous excitement, is a fertile source of unhealthy blood occasioning that slow nervous fever which has carried off some of our best men, men martyrs to their reputation, but which a knowledge of the powers of Brandreth's Pills would have prevented. Those who desire to secure their health, under almost any adverse circumstances, can do so by having BRANDRETH'S PILLS on hand, and at once resorting to them when the first feelings of disorder take place in their bodies. As this advice is used so will the health be. The time will yet be when a man that makes a good medicine shall be honored more than he who is an adept in the art of war.

Be exceedingly afraid of COUNTERFEIT PILLS. The Agent is the only person from whom Brandreth's Pills should be purchased.

The BRANDRETH'S PILLS are sold for 25 cents per box, at Dr. B. Brandreth's Principal Office, 241 Broadway, New York, and by the following duly authorized Agents:

Wm. S. Powell, New Cumberland.
J. G. Miller, Lisburn.
M. Bitner, Shippensburgh.
J. & L. Reigel, Mechanicsburg.
Geo. W. Singiser, Churchtown.
A. & D. Leidigh, Boiling Springs.
D. L. Bentman, White House P. O.
Rosenburg & Welling, Centreville.
James Kyle, Jacksonville.
Edward Scull, Shippensburg.
R. L. Sentman, Newville.
Sold in Carlisle, by CHARLES BARNITZ.
Sole Agent for the Counties of Cumberland and Perry.

In Philadelphia.

Extensive Furniture Rooms.

JACOB FETTER & SON

WOULD respectfully call the attention of House-keepers and the public, to the extensive stock of splendid FURNITURE, including Sofas, Wardrobes, Centre and other Tables, Dressing and Plain Bureaus, and every variety of Cabinet ware and Chairs, which they have just opened at their NEW ROOMS, on the corner of North Hanover and Louther streets, Carlisle. They are confident that the superior finish of the workmanship, and elegance of style, in which their articles are got up together with their CHEAPNESS, will recommend them to every person wanting Furniture. They have also made arrangements for manufacturing and keeping a constant supply of every article in their line, both plain and ornamental, elegant and useful, at prices which cannot fail to suit purchasers. They would earnestly invite persons who are about to commence house-keeping to call and examine their present elegant stock, to which they will constantly make additions of the newest and most modern styles.

COFFINS made to order at the shortest notice, for town and country.

Carlisle, Sept 6, 1848

Farm at Private Sale.

THE subscriber offers at private sale a FARM, situate in Mifflin township, Cumberland county, about seven miles north-west of Newville, now occupied by Henry Lore, containing 102 Acres of good Slate Land, about 78 acres of which is cleared and in a good state of cultivation, and the remainder in thriving timber. The improvements are a good two story DWELLING HOUSE, Kitchen, &c., with a spring in the cellar, and a large Bank Barn, with all other necessary outbuildings.—There are two Orchards on the place, containing every variety of Fruit. A fine meadow lies before the door of the house, and a public road leads direct from the Farm to Newville.

Persons desiring to see the Farm are requested to call on the present tenant, or on the subscriber living near Carlisle.

aug9-4t or tf JACOB STAYICK

SHEPHERD'S SARSAPARILLA,

For the Permanent Cure of all Diseases arising from an Impure state of the Blood.

THIS Medicine operates particularly upon the Blood, and cures disease without vomiting or purging. It never fails to cure the most obstinate cases of Rheumatism, Diseases of the Lungs, Coughs, Colds, Bronchitis, White Swelling, Scrofula, Ulcers and Sores of long standing.

It is cheaper than any other medicine in use, there being 32 doses in each bottle, which costs only 75 cents, and to those using it according to direction one bottle will last 10 days. Certificates are pouring in from all parts of the country attesting the virtue of this medicine in cases of long standing, which have been given up by physicians as hopeless and beyond the reach of medicine to cure.

WHOOPING COUGH, Shepherd's Sarsaparilla never fails to cure.

CONSUMPTION cured by the use of Shepherd's Sarsaparilla.

The following is from a gentleman of respectable standing in Baltimore, who was effectually cured of that dreadful disease, Consumption, by a few bottles of Shepherd's Sarsaparilla.

Baltimore, Aug. 29, 1847

This is to certify that I was fast sinking under symptoms of Consumption of the Lungs, until I was recommended to try Shepherd's Sarsaparilla, which fortunately I did and am under the strongest conviction that it saved my life. I am now rapidly recovering and hope in a short time to be restored to perfect health, and under no consideration would I be without the medicine.

DAVID RICKETTS,
No. 23, Hill street.

Shepherd's Vermifuge, or Worm Destroyer.

We challenge the world to produce a medicine better adapted to the expulsion of worms from the human body than Shepherd's Vermifuge. It has been used by thousands with entire satisfaction. It has the advantage of most other Vermifuges, as it never sickens the person using it. It has cured children that have been subject to fits for years, and that had been given up by physician, parents and friends. It should always be used as a purgative for children, as it strengthens them, and at the same time carries off the coarser particles of food, and worms, if they are troubled with them.

The following certificate has been handed to us by Judge Koons, of Luzerne county, Pa. It speaks for itself:

Town Hill, Pa, Jan 20, 1847.

JOHN KOONS, Esq.

Dear Sir—You will please send me 4 bottles more of Shepherd's Vermifuge. The three bottles purchased of you a short time ago have been used with the happiest effects. They were given to three of my children—in one case 65 worms were expelled, in another 164, and in the last 67. I am anxious to give the rest of my family the benefits of this medicine and therefore order as above. This is decidedly the best article for destroying worms that has ever been in this part of the country. I have tried Orrick's, Reaker's, Merrick's and Miller's, but without any good effect.

Yours with esteem,

SAMUEL SNYDER.

Shepherd's Sarsaparilla and Vermifuge are for sale by the following respectable merchants of Cumberland county, Pa, and by Dr. Wm. C. M'Pherson, Harrisburg:

G. W. HITNER, Carlisle; John Fulweiler, Shippensburg; John Diller, Newville; Robert Elliott, Newburg; M D & J B Lackey, Bloomfield; A Richards & Co, Plainfield; Dunlap & Bar, Kingston; S. & S. A. Coyle, Hogestown; Wm. Alexander, Paperstown.

April 26, 1848

mar 22-6m ORRICK & CAMPBELL.

Atwood's Empire Cooking Stove.

IN again calling attention to this unequalled STOVE, the proprietor has the pleasure to inform the public that (externally) it has undergone an entire change—the pipe and hearth placed opposite each other, and a SUMMER HEARTH AND BOILING APPARATUS, being added, thus rendering it faultless, and unless there is another faultless Stove in the market, this is unquestionably the best, as it now embraces every valuable improvement possessed by any other Stove, in addition to some peculiar to itself, secured by Letters Patent.

The success of this Stove, since its introduction is unequalled. Nothing has ever been offered for culinary purposes that has given such general satisfaction. Stoves have been copied after its form; some dealers have even used its fundamental principles, but the proportions were so unlike the original, that they bear the relative value that a counterfeit does to a genuine coin.

Complete COOK and other COOK STOVES in great variety. Persons desiring these admirable Stoves, are requested to call at the Stove and Tin-Ware manufactory of the subscriber, on Main street, Carlisle, who is agent for Cumberland county.

CURE YOURSELF.—From time immemorial there has existed in larger cities and populous towns, a species of disease, the dependence and propagation of which results from the violation of divine and moral laws. To those AFFLICTED, the AMERICAN COMPOUND is presented, as being the most certain, speedy, and valuable specific ever offered to the unfortunate. It has wherever known acquired a reputation that daily experience continues to strengthen. Thousands have been cured by its use, and as it leaves no odor on the breath, requires neither restriction in diet or business, nor contains either mercury or noxious drugs in the least injurious to the system, it is boldly presented as the best remedy for such diseases yet offered. It is used by physicians and pronounced superior to any known remedy. Full directions accompany each bottle.

Harrisburg, march 29, 1848

Dr. Keeler's Panacea,

FOR the removal and permanent cure of all diseases arising from an impure state of the blood and habit of the body, viz:

Chronic diseases of the Chest, Pleurisy, Bronchitis, Catarrh, etc. Scrofula in all its forms, Tetter, Scald head, Cutaneous affections of the face and extremities, chronic Rheumatism, and Hepatetis, chronic Enlargements of the Joints, White Swellings, Syphilitic Affections, Constitutional disorders, arising from debility, Mercurial and Hereditary predispositions, &c.

☞ In every change that is taking place in the body, it is manifest that it is brought about by something having a substantive existence. If we suppose the organs of our body originally perfect, they must continue perfect unless changed by the intervention of something that bears an unhealthy relation to it. In all cases of disease, there must be the interposition of some new ingredient which by playing its part as a cause, served to modify the properties before connected with the body. It is absurd to talk of spontaneous disease taking place in organs previously healthy, without the interposition of some morbific agent; as well might we expect a piece of chalk to transfer itself spontaneously into Plaster of Paris, without the aid of Sulphuric Acid. In all disease there is a prior cause which must be removed, thro' the agency of the Blood. For this purpose there is no remedy superior to the Panacea. In evidence the following is submitted to the public:

Philadelphia, June 7, 1847.

Having been apprised of the nature of the Panacea, it affords me much pleasure to be able to recommend it as a valuable remedy for all those chronic, constitutional and glandular diseases, to which it is especially adapted. To those who are afflicted, and require medicine as an alterative, they cannot obtain it in a more agreable, active and uniform state than is to be found in the Panacea. I have used it in several instances with decided and signal success. Yours, &c.

CELEBRATED FLUID LAMPS,

which he has lately introduced, and which are found to be by all that have tried them, the most economical and desirable article in every respect now in use. Also the

The Pekin Company's Teas.

He has been appointed sole agent in this place for the sale of the above Teas, to which he would invite the special attention of the lovers of good Teas. The manner in which they are put up is such, as that the flavour is preserved for any length of time, being incased in lead or tin foil. Families can be supplied with any quantity put up in this manner.

The public is respectfully invited to call and examine his stock before purchasing elsewhere inasmuch as he feels confident that his variety and prices will be satisfactory to purchasers.

apr6 ROBERT IRVINE, jr.

NEW YORK VARIETY STORE.

J. & M. COLLIER & BROTHERS, beg leave to inform the citizens of Cumberland and adjoining counties, that they have just opened an extensive VARIETY STORE in North Hanover street, in the building lately occupied by Mr. Hunsicker, between Haverstick and Lyon's stores, where they will be happy to receive the calls of all wishing articles in their line. They will at all times keep on hand a well selected assortment of Colored Prints, (French, English and American) domestic and foreign Perfumery, Patent Medicines, embracing nearly every description, and in fact a little of every thing usually kept in an extensive variety store.

They are the exclusive agents for the sale of Dr. Traphagen's celebrated Pulmonic Mixture, and his Balsamic Extract of Sarsaparilla; Dr. Green's celebrated Oxygenated Bitters, for Dyspepsia and Phthysic. They are also the exclusive agents for this county of the NEW YORK CANTON TEA COMPANY, and will keep constantly on hand a large supply of their superior Teas.

In conclusion they beg leave to say, that they are determined to sell at very small profits for CASH, and invite all wishing bargains to give them a call. Orders from country merchants supplied upon the most reasonable terms.

Carlisle, may4

TO BUTTER MAKERS.

THE subscribers having purchased the right of Cumberland county for making Crowell's Patent Thermometer Churn, they would respectfully inform the Farmers and public in general, that they will make and offer for sale their Churns at the Cabinet Ware-room of Geo. Spangler, in N. Hanover street, next door to the office of D. Smith, Esq.

The principal advantage this Churn has over all others is, that it is so constructed that the top can be taken off so as to give free access to the inside of the churn, which makes it convenient to put in the cream and get out the butter. A Thermometer is attached to the end of the Churn so as to show the exact temperature of the cream, which experience shows should be 60 degrees to make good Butter. A chamber or space is arranged around the bottom of the churn, for the purpose of admitting cold or warm warter, so as to bring the cream to the desired temperature without mixing the water with the cream. The secret in churning butter is, to have your cream at the proper temperature; it will produce more and better butter, and take less time in churning; it churns equally well in cold or warm weather—no such thing as having scalded butter. All that is necessary to make good butter all seasons of the year, is to get one of Crowell's Patent Thermometer Churns.—We would most respectfully invite the public to call and examine for themselves.

GEO. SPANGLER,
SAM'L. MYERS.

Mr. Geo. Spangler—Sir: We have been using the Thermometer Churn I got of you for some time, and find it far superior to the old barrel churn for several reasons; first, great saving of time in getting butter, the average time of churning about fifteen minutes, (all weathers); secondly, the butter when obtained is much firmer than when using any other churn; finally, my folks say they would not exchange it for any other churn and twice the original cost of the Thermometer Churn.

Sep. 28, 1848.] G. W. SHEAFFER.

Mr. Geo. Spangler—I have had the Crowell Thermometer Churn you made for me in use at my place, and I do not hesitate to say that no Farmer should be without it. Fifteen minutes is all the time required to make Butter, and the value of this saving of time and labor consists in this, that it requires no more time at any one season than another; and that the temperature of the cream necessary to make butter, is produced with certainty, and without the admixture of warm or cold water with the cream when churning.

FRED'K WATTS.

Carlisle, Aug. 17, 1848.

For the benefit of the better part of man (woman) I give it in certificate. After using the Thermometer Churn made by Mr. Spangler of this place, I would have none other in my family. We have been using the old barrel churn for thirty years past, and I must say it is not to be compared to Crowell's Thermometer Churn, either for speed of churning or convenience; in the old barrel churn it took generally from four to six hours to churn the churning, now in the Thermometer Churn we can churn butter in from fifteen to twenty minutes, by brining the cream to the proper temperature. I can recommend it to the public as no cheat.

JOSEPH SHROM.

Carlisle, Sep. 4, 1848.

GEORGE SPANGLER has also on hand, and will manufacture to order CABINET WARE of every description, such as Bureaus, Secretarys, Sofas, Tables, Bedsteads, and all articles in his line, and will sell as cheap as can be bought any where in the county, and warrant his Furniture of good material and durable workmanship. He would invite the public to call and examine his stock before purchasing
