Insurance Companies

Equitable Life Insurance, Annuity and Trust Company.
Office, 234 Walnut street, Philadelphia. — Capital, \$2,000,000—Charter perpetual. — Make Insurance on lives at their office in Philadelphia, and at their Agencies throughout the States, at the lowest rates of premium. — Rates for insuring \$100 on a single Life.

EXAMPLE.—A person aged 30 years next birthday, by paying the company \$2 cents would secure to him \$1000 should he die in seven years; or for \$15 annually for seven years he secures to him \$1000 should he die in seven years; or for \$20.00 paid annually during life, he secures \$1000 to be paid when he dies. The insurer pays the cost of the policy, the difference in amount of premium from that of other offices. For \$49.50 the heirs would receive \$5000 should he die in one year.

J. W. CLAGHORN, Pres't
FRED'K. WATTS, Acty.
Dr. D. N. MAHON, Medical Examiner.

The Franklin Fire Insurance Company of Philadelphia.

Miscellaneous

LABOR AND ITS TRIUMPHS.
Who's born for what? To some we find the ploughshare's annual toil assigned; Some at the spinning wheel are busy; Some the swift shuttle whirring throw; Some students of the wind and tide, From pole to pole our committee guide; While some and tongue amidst mankind, In every rank a great or small, 'Tis industry supports us all.

THE GOLD OF CALIFORNIA.
Within a few days, upwards of \$10,000 in gold from the mines in California, has been deposited in the mint at Philadelphia, found to be of unusual purity—from 22 to 23 1/2 carats fine—which is as near as may be to pure gold; and too pure for carving or mechanical purposes.

THE GOLD OF CALIFORNIA.
The discovery of this deposit of gold in California, is exciting a fever that will soon be equal to any mania that has ever fastened upon the cupidity of man. The statements that are given as facts, will send thousands and tens of thousands of adventurers to the desolate regions of that almost uninhabited country, to settle and convert the wilderness into the abode of man; although it is not at all probable that many of them will ever realize their anticipations, or obtain the object that lure them from home and friends. We give below, what information we have been able to collect on this subject.

The discovery of this deposit of gold in California, is exciting a fever that will soon be equal to any mania that has ever fastened upon the cupidity of man. The statements that are given as facts, will send thousands and tens of thousands of adventurers to the desolate regions of that almost uninhabited country, to settle and convert the wilderness into the abode of man; although it is not at all probable that many of them will ever realize their anticipations, or obtain the object that lure them from home and friends. We give below, what information we have been able to collect on this subject.

THE GOLD OF CALIFORNIA.
The discovery of this deposit of gold in California, is exciting a fever that will soon be equal to any mania that has ever fastened upon the cupidity of man. The statements that are given as facts, will send thousands and tens of thousands of adventurers to the desolate regions of that almost uninhabited country, to settle and convert the wilderness into the abode of man; although it is not at all probable that many of them will ever realize their anticipations, or obtain the object that lure them from home and friends. We give below, what information we have been able to collect on this subject.

on the ground now explored. Nor is gold the only mineral discovered here. Platin has been found in one place in some considerable quantity, and very extensive mines of silver ore have recently been discovered within five miles of the saw mill, and are said to be very rich. Iron is also abundant, and will pay about 85 per cent.

The richness of the soil in the immediate neighborhood of the mines is most astonishing. Farms can be made in every direction that will feed all the miners that can be employed. The climate is found to be very healthy and free from the chilly winds that blow around the sea coast. The granite of the mountains is said to be equal to the celebrated Quincy, and a beautiful quarry of marble has been discovered on the consummity river, specimens of which will before many years travel the fronts of public buildings in your beautiful city.

The San Francisco Star, alluding to the excitement produced by the gold fever, says "The gold region, so called, thus far explored, is about one hundred miles in length and about twenty in width. These important explorations contribute to establish the certainty of the place as extending much farther South, probably three or four hundred miles, as we have before stated, where it is believed to terminate about a league North of the point at which it was discovered."

The discovery of this deposit of gold in California, is exciting a fever that will soon be equal to any mania that has ever fastened upon the cupidity of man. The statements that are given as facts, will send thousands and tens of thousands of adventurers to the desolate regions of that almost uninhabited country, to settle and convert the wilderness into the abode of man; although it is
