307-THIS Bath took the premium at the Fair of the Franklin Institute, Philadelphia. October 1848, the only Bath that ever took a premium at that institute and also took the first premium at the Fair of the Merydand Institute, November 1848.

bor 1648.

A great and important improvement is made in this Shower-bath over all others, by throwing the water immediately on the body, without wetting the head, unless at the will or pleasure of the bather; but a greater point is gained by being enabled to beshe wifk warm water, which no other Shower-Bath is adapted te—and most of all the Bath can be medicated without injury to the hair.

Many persons cannet take a cold bath—their case is met in this was they can regulate the temperature, of the water to cut their wish, and commence bathing at any season of the year without any unpleasant result. Ladies can have the advantage of bathing without wetting the head or covering the same.

The arrangements are simple and complete, and not liable to get out of order. The Bath can be adjusted to suit any keight, from a small child to the tallest posson. When the door is dosed, the fixtures ore hit and the outside appearance, is that of a neat piece of farmiture.

They have received the appropriation of several medical gentlemen—others are requested to call and examine them. Manufactured by the Patentee.

She was severely afflicted with the scrolula on different parts of the bedieve the afflicted of the neck your greatly the body : the glands of the neck were greatly enlarged and her limbs much swollen. Alt the remedies used, the disease attacked, and below the knee suppurated. Her physician advised it should be laid open, which was done, but without any permanent benefit. In this situation we heard of, and were induced to use SANDS Sarsadarilla. The first bottle greated and favourable effect. tle produced a decided and favourable effecrelieving her more than any prescription she had ever taken, and before the had used six bottles, to the astonishment and delight of her friends, she found her health quite restored. It is now over a year since the cure wa effected, and her health remains good, show ing the disesse was thoroughly eradicated from the system. Our neighbors are all knowing to these facts, and think very highly of Sands' Sursaparilla.

TO BUTTER MAKERS

Mr. Geo. Spangler—Sir: We have been using the Thermometer Churn I got of you for some time, and find it far superior to the old barrel churn for several reasons; first, great saving of time in getting butter, the average time of churning about fifteen minutes, (all weathers); secondly, the butter when obtained is much firmer than when using any other churn; intally, my folks say they would not exchange it for any other churn and twice the original cost of the Thermometer Churn.

Sep. 28, 1818.] G. W. SHEAFFER.

For the benefit of the better part of man (wo For the benefit of the better part of man (woman) I give this certificate. After using the Thermometer Churn made by Mr. Spangler of this place, I would have none other in my family. We have been using the old barrel churn for thirty years past, and I must say it is not to be compared to Crowell's Thermometer Churn, either for speed of charning or convenience; in the old barrel churn it took generally from four to six hours to churn the churning, now in the Thermometer Churn we can churn butter in from fifteen to twenty minutes, by brining the cream to the proper temperature. I can recommend it to the public as no chest.

Dr. Keeler's Panacea,

For the removal and permanent cure of all diseases arising from an impure state of the Blood and habit of the body, viz:

Chronic diseases of the Chest, Pleurisy, Bronchitis, Catarrh, etc. Scrolla in all its forms, Tetter, Scald head, Cutaneous affections of the face and extremities, chronic Rheumatism, and Hepatetis, chronic Enlargements of the Joints, White Swellings, Syphilitic Affections, Constitutional disorders, arising from debility, Mergurian and Hereditary predispositions, &c.

To In every change that is taking place in the body, it is manifest that it is brought about by something having a substantive existence. If we suppose the organs of our body originally perfect, they must continue perfect unless changed by the intervention of something that bears an unhealty relation to it. In all cases of disease, there must be the interposition of some new ingredient, which by playing its part as a cause, served to modify the properties before connected with the body. It is absurd to talk of spontaneous disease taking place in organs previously healthy, without the interposition of some morbific agent; as well might we expect a piece of chalk to transfer interposition of some morbific agent; as well might we expect a piece of chalk to transfer interposition of some morbific agent; as well might we expect a piece of chalk to transfer interposition of some morbific agent; as well might we expect a piece of chalk to transfer interposition of some morbific agent; as well might we expect a piece of chalk to transfer interposition of some morbific agent; without the aid of Sulphuric Acid. I have been afflicted for years with the Piles, and have tried, without anything like permanent benefit, almost everything assuming the name of a remedy. I had as a matter of course, lost all confidence in medicine.—
Under this feeling I was induced—not without reluctance, I conferr—to use Upham's Electuary, and having used it about three works.

reluctance, I confess—to ure Uphem's Electuary, and having used it about three 's ceks,' according to the directions laid down, I find to my surprise, as well as satisfaction, three every symptom of the disease has cit are. I think it due alike to Dr. Upham and myself to make this statement. G. W. McI.E.A.N.

My Dear Sir—I cannoi express to you my sincere and heartfelt thanks for the wonderful curo I have experienced by the use of your truly waluable Pile Electuary. I have been a perfect martyr to the Bleeding Piles for tray years past, so much so, that I became reduced to a mere skeletom, with loss of appetite and general derangement of the digestive organs; my eyes also became uffected, and in fact I was a misery to myself, and was obliged to my eyes also become affected, and in fact I was a misery to myself, and was obliged to give up my office here, which I held in the Custom House some years. I have tried all kinds of medicine, had the best advice the physicians of Bos on and this place could give spent much money and twice submitted to a surgical operation. I had become perfectly fired of life, and at the suggestion of my friends I was induced to five a box of your tired of life, and at the suggestion of my friends I was induced to try a box of your medicine. The first I found relieved me slightly, still I persevered and purchased a second, and

having tried other means to little or no ad vantage, I become very much discounaged and felt as though! I must suffer as long as I lived. But providentially I was informed, by Mr. Mott, instructor of the public school at Staten Island, that I could be cured by your valuable Pile Electuary. Having confidence is his statement, I tunmediately procured some of the medicine and any very happy to inform you that I am now perfectly cared by the use of only one bes. The subscribers having purchased the right of Coumberland county for making Grows oil's Patent Thermometer Churn; they would respectfully inform the Farmers and public in general, that they will make and offer for sale their Churns at the Cabinet Ware-room of Geo Spangler, in N. Hanover street, next door to the office of D. Smith, Eaq.

The principal advantage this Churn has over all others is; that it is so constructed that the top can be taken off so as to give free access to the inside of the churn, which makes it convonient to put in the cream and get out the butter. A Thermometer is attached to the end of the, Churn so as to show the exact temperature of the cream, which experience shows should be 60 degrees to make good Butter. A chamber or space is arranged around the bottom of the churn, for the purpose of admitting cold or warm warter, so as to bring the cream to the desired temperature without mixing the water with the cream. The secret in clurning butter is, to have your cream at the proper temperature; it will produce more and better, butter, and take less time in churnings; it churns equally well in cold-or warns weather—no such thing as having scalded butter. All that is necessary to make good butter all seasons of the year, is to get one off Crowell's Patent Thermometer Churns,—We would most respectfully invite the public to call and examine for themselves.

Mr. Geot Spangler—I have had the Crowell Thermometer Churn you made for me in use at my place, and I do not hesitate to say that no Farmer should be without it. Fifteen minutes is all the time required to make Butter, and the value of this saving of time and labor consists in this, that it requires no more time at any one season than another; and that the temperature of the cream necessary to make butter, is produced with certainty, and without the admixture of warm or cold water with the cream itself.
