Gen. Taylor's Message - Mr. Cass' Speech. A Disumon Speech in the House.

WASHINGTON, Jan. 22, 1850. The President's message in answer to the call of the House, has been received with general approbation, and has pro duced a decided impression in both branches of Congress. It does not comport with the extreme policy of either of the opposing interests, while it maintains a highly conservative, safe and patriotic ground, to which the North and South may rally with equal honor and advantage. If there is any disposition to adjust the slavery question, upon equitable and pacific principles, the recommenda tions of this message afford the easiest and best mode of settlement. It does not propose to deprive either section of any right, or to disturb any constitutional guaranty. It only asks that Congress will not rashly and unnecessarily precipitate a dangerous issue upon the country and allow time to work a cure, which legislation may not be able to effect. If these suggestions are adopted, agitation may be easily composed, and the danger which now menaces may be permanently averted. But it requires courage and independence to meet the issue boldly and to throw aside the merely local considerations which have been permitted to distract the public mind. The territory lying east of the western limits of th proposed state of California is now free under the municipal law of Mexico, and must remain so until Congress revokes it, by the adoption of a statute imposing slavery. So far as the practical question of slavery is concerned, the territory will remain under this restriction, whether territorial bill containing the proviso be passed or not. If then nothing is to be gained but excitement and sectional dis cord by the agitation of such a measure and the territory is not to suffer from the charce of slavery being carried within its jurisdiction, why should it be perti naciously urged, when no good result can possibly follow, and when the most serious consequences may be entangled

Gen. Cass has at length concluded hi

constitutional speech-as his waggish friends insist upon calling it-on the Wilmot proviso. It was characteristic of its author, and ponderous, prosy and prolix. Two days were required to get rid of what finally proved to be an abortion-a child of many fathers; made up of extracts, shreds and patchwork. I bore hard upon the General's physical energies to go through the last hour and a half of delivery. He was evidently fatigued and worn with the subject, and came near exhibiting the same symptoms of ennui and exhaustion that the sleeping galleries and empty benches display ed. If the General from Michigan designed this speech as his bid for a secon nomination, he has succeeded in demol ishing his own prospects even more decidedly than the people did at the ballot in November. He concluded by informing the public of what it had been previously apprized through this correspondence, that in the event of the Provisc being brought to the Senate, he would return his commission as Sunator into the hands of the Legislature. He cannot perform this part too soon for his own ame, since no public man has played the demagaque with more assurance as with less effect. The House went into Committee of the Whole on the President's message, and Mr. Clingman took the floor, nominally on that subject, but particularly with reference to the question of slavery. His speech was characterized by reflection and ability, but exhibited a degree of ultraism which the course of that gentleman on the memorable occasion when the 21st rule was adopted if separated from his recent correspondence with Mr. Foote, would have hardly warranted one in anticipating. He pictured the advantages that would accrue to the South from dissolution, and seemed to cherish it as a political blessing to be sought by that section, rather than deprecated. Mr. Howard, of Texas, a Northern renegade, tollowed with a violent denunciation of the North.

The discussion is likely to occupy the House a long time, and it would not surprise me if a month was squandered in speech-making. Independent.

## FROM HARRISBURG,

Taxables of Pennsylvania-The Slavery Reso -Message from the Govern

HARRISBURG, Jan. 22, 1850. The Governor communicated to both branches of the Legislature the list of taxables of those counties which had no been transmitted by him. Pike county has not yet made any return. The number of taxables in the year 1835 in the whole State was 317,300; in 1842, 387, 417; and giving Pike county—which in 1842 had a taxable list of 889—a list now of 1078; the number of voters in the State now is 487,417-showing an increase of 100,000 taxables during the last seven years. The ratio for a Senato will be 14,770; for a representative 4874. The Apportionment Committee of the House have commenced the labor of dis-

tricting the State.
The resolutions offered in the Hous some days since on the subject of slavery were made the order of the day for Fr day last, and on that day a motion was made by Mr. David, (Whig) of Crawford to proceed to their consideration. Upon this motion the yeas and nays were called, and it was voted down, the Locos almost to a man, voting against it. If Mr. David, or any other whig, by any means, can bring the other party to sho their hands on this deeply interesting question, he will deserve the thanks not only of the whole Whig party, but of the whole North. The Locofoco party have

whole North. The Locofoco party have already betrayed the confidence reposed in them by the people on the subject of the tariff, and they now, stand ready to betray them again when the issue is between slavery and freedom.

Three cases were submitted to-day by the Governor to the Legislature. It appears that three murders to which Bridge of Harman, James Hamilton, alias, Jast Thacker, and Andrew Callingham have been convicted, were committed some time since. The readers of the law attached to the crimes of which Bridge have the seried, one would seem to render it continues the pennity of the law attached to the crimes of which they have been severally found guilty should be midicted upon them. The case of Bridge Harman is peculiar. No doubt exists in the mind of the Executive that she killed her child. She had been married some years previous to the commission of the offence, and was described, as is understood, by her husband, who left her with two children, a boy wh

aged three years and a girl aged nine months. aged three years and a girl aged nine months, poor and destitute. On the 11th day of August, 1846, and about half past six in the morning, she went out with her daughter in the direction of a secluded wood, surrounded by hills, about half a mile northeast from Manayunk, returned without her child, and again went in the second direction with again went in the same direction with a shovel in her hand. During the morning, her contradictory tales as to her child induced suspicion that she had killed it, and she ner contradictory tales as to her child induced suspicion that she had killed it, and she was arrested for the murder. In the evening of the same day she was taken to the wood before mentioned, and immediately pointed out the spot in a stream of water where she had drowned the child, end also the place where it was buried. On the foregoing facts she was convicted and sentenced to be hanged by the neck until she was dead. The prisoner is a woman of a weak intellect, scarcely reaching above imbecility. It is very doubtful whether she was conscious of the megnitude of the offence committed, or even aware that it involved the guilt of moral depravity. Her accountabily is seriously doubted. Under these circumstances, the infliction of the extreme penalty of the law upon her would be unwise, impolitic and inhuman and should be avoided; and yet for these reasons, it would seem unsufe to give her liberty which miglut, again be abused. The fact in the other cases are presented, and the Governor concludes. "Feeling the her liberty which miglu again be abused.— The fact in the other cases are presented, and the Governor concludes. "Feeling the The factr in the other cases are presented, and the Governor concludes. "Feeling the importance of the questions involved in the foregoing cases, solicitous for the public rance Register of the Company, thus: foregoing cases, solicitous for the public security, and dreading the results which pardons might produce on the community by dons might produce on the community by the liberation of convicts who have been found guilty of the highest crimes known to the law, I have deemed it proper to refer to the Legislature a brief abstract of the tes-timony in the several cases mentioned, together with such documents in relation thereto as have since reached the Executive department, under the hope that some mode may be devised by which the lives of these criminals may be saved, while at the same time the security of society may not be haz-arded by their liberation."

"C. J. B. Williams, M. D., F. R. S., Professor of Medicine in University College, London, Consulting Physician to the Hospital for consumption, &c., says: I have prescribed the Oil in above four hundred cases of tuberthe Oil in above four hundred cases of tuberculous disease of the Langs, in different stages,
which have been under my care the last two
years and a half. In the large number of
cases, 206 out of 234, its use was followed by
marked and unequivocal improvement, varying in degree in different cases, from a temporary retardation of the progress of the disease
and a mitgation of distressing symptoms, up
to a more or less complete restoration to apparent health.

"The effect of the Cod Liver Oil in most of
these cases was very remarkable. Even in

these cases was very remarkable. Even in a few days the cough was mitigated, the expectoration diminished in quanty and pacity, the night sweats ceased, the pulse became slower, and of better volume, and the appetite, flesh and strength were gradually improved.

"In conclusion I rement that the pure Scale." flesh and strength were gradually improved.
"In conclusion I repeat that the pure fresh oil from the liver of the Cod is more beneficial in the treatment of Pulmonary Consumption than eny agent, medicinal, dietetic or regimenal, that has yet been employed."

of New Jorsey, of distinguished attainments and exalted reputation:

Dr. A. II. Churstie. Dear Sir. You wish to know of me what has been the result in my own case, of the application of THE GALVANIC BELT AND NEUKLACK.

My reply is as follows:

For about twenty years I had been suffering from Dyspepsia. Every year the symptoms became worse, nor could I obtain permanent relief from any coupse of medical treatment whatever. About fourteen years since, it consequence of frequent exposure to the weather, in the discharge of my pastoral duties, I became subject to a severe Chronic Rhoumatism, which for year after year caused me indescribable anguish. Farther: in the winted of 46 and 48, in consequence of preaching a great dea. In my own and various other churches in this region, I was attacked by the Bronchitis, which won became so severe as to require an immediate suspension of my pastoral labors. My nervous system was now thoraptly protrated, and as my Bronchitis became worse, so also did my Dyspepsia and Rheumatic affection—thus evincing that toral ladors. My nervous system to as now thoroughly protrated, and as my Bronchilis became worse, so also did my Dyspepsia and Rheumatic affection—thus evincing that those disorders were connected with each other through the nedium of the Nervous System. In the whole pharmacoposis there seemed to be no rhmedial agent which could rench and recuperate my Nervous System; every thing that I had tried for this purpose had completely failed. At last I was led by my friends to examine your inventions, and (though with no very sangulme hopes of their efficiency.) I determined to try the effect of this application of the GALVANIC BELT AND NEUKLACE, with the MAUNETIC FLUID. This was in June, 1846. MD—CAP. ANDREW J. F. TOMES of Brooklyn, N. Y., had not been able to walk a stop for near four years, and was so helpless that he had to be fed. The most celebrated physicians gave him up. In five days after he commenced wearing the GALYANG BELT, NECKLACE, AND BRAGELETS, he walked across the room, and in three weeks he had perfectly recovered his health. Captain Tomes is seventy years of age.

Severe Deafness Cured. The following is an extract from a letter lately recei-om a distinguished physician in the State of Virginia from a distinguished physician in the State of Virginia;

"A. H. Chiestri, M. D.—Dear Sir; One of my patients
unknown to me, obtained your Galvanic Bell and Neck
lace, with the Magnetic Pluid, for a serious affection of
Dealness. The case was that of a lady whose Nervous
system was much disordered, and her general health
poor. Much was done previously to the application of the
Belt, but wilh very little auccess, and I feel it only right
to tall you, that since she commenced wearing the Bel
and using the Fluid, but a few weeks ago, she has

IN MANY THOUSANDS of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nestrums of the day had utterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their officacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the heautifully philosophical principles upon which they are compounded, and apon which they consequently act. It was to their manifest and sensible action in purifying the springs and chaunels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Meroury, nor Antimony, nor Arsenio, nor any other mineral, in any foun whatever. They are entirely composed of extracts from read and powerful plants, the virtues of which; though long known to soveral Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coals of the stomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind to produce habitual Costiveness, with all its train of ovils, or sudden Diarrhea with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of

VEGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible

PILES. As a remedy, for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphasic becommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of THIRTY-FIVE YEARS; and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. For this scourge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a roturn of the disease—a cure by these medicines is permanent—TRY THEM, BE SATISFIED, AND BE CURED. Bilious Fevers and Liver Complaints.

General Debility, Loss of Appetite, and DIREARES OF FEMALES—these medicines have been used with the most beneficial results in cases of this description:—Kino's Evil., and Scropula, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Night Swrats, Nervous Debility, Nervous Complaints of all kinds, Palpitation of the Heart, Painter's Colio, are speedily cured. MERCURIAL DISEASES.

Persons whose constitutions have become impalred by the injudicious use of Mercury, will find these Medicines a perfect cure, as they never full to cradicate from the system all the effects of Mercury infinitely sooner than the most powerful preparations of Sarsaparilla.
