One hour with Thee, when hay day begins Herinever easing round of bustling care. When Funus meet with toil, and pain, and sins, And through them all thy cross must bear, O, then, to arm me for the strife, to be Faithful to death, I'll k need an hour to Thee.

One hour with Thee, when rides the glorious sun High in mid-heaven, and panting nature feels Highest and overnowered, and man has done For one short hour with urging life's swift wheel in that deep pause my soul from care shall fee, To make that hour of rest one hour with Thee.

One hour with Thee, when saddened twilight flings Her southing charm o'er lawn, and vale, and grove, When there breathes up from all created things The sweet enthralling sense of thy deep lave: And when its softening power descends on me. My swelling heart shell spend an hour with Thee.

One hour with Thee, my God! when softly night

# Interesting Lacts.

Signs of the Weather.

Red clouds in the west at sunset, especially when they have a tint of purple, portend fine weather. The reason is, that the air, when dry, refracts more red or heat making rays: and as dry is not perfectly transparent, they are again reflected in the horizon. A copper or yellow sunse: generall foretells rain; but as an indication of wet weather approaching, nothing is more certain than the halo around the moon, which is produced by the precipitated water; and the larger the circle the nearer the clouds, and consequently the more ready to fe' When the swallows fly high, fine reather is to, be expected or co-mued; but when they fly low are close to the ground, rain is almo surely approaching. This is—plained as follows:

Swallows is sue the flies and gnats, and flies ar gnats delight in warm strata of and as warm uir is lighter and usually moister than cold air, when the warm strata of air is high, there is less chance of moisture being thrown down from them by the mixture of cold air; but when the warm and moist air is close to the ground, it is almost certain that, as the air flows into it, a decomposition of water will take place.

Is THE EARTH FULL OF SEEDS ?-The fact that earth or soils brought up from different depths of the earth have, when exposed to the sun or air, become covered with vegetation, has led men to suppose that the whole earth, from centre to circumference is full of seeds. This cannot be the case - but there are, nevertheless, remarkable instances of the fact above named. We once threw up a lot of coarse gravel, late in the fall, from a depth of nearly ten feet, and early the next spring it was covered with pig weeds which grew very luxuriantly.-The greatest depth we ever heard of seeds being buried we find in a recent exchange paper. In boring for water, lately, at Kingston upon the Thames, some carth was brought up from the depth of three hundred and sixty feet. This earthwas carefully covered with a hand-glass, to prevent the possibility of anyother seeds being deposited upon it; yet, in a short time, plants vegetated from it .-English paper.

OUR RIVERS .- Professor Rodgers has commenced his Geological Lectures at the Smithsonian Institute. In the course of his remarks, he states some very interesting facts relative to our great rivers. It appears that the Mississippi drains an area of 300,000 square miles; and the total amount of water discharged per annum, in cubic feet 8,092,118,940,000. The amount of sedimentary matter in the Mississippi water is estimated at about one twelve hundredth-part, in measure, of the whole volume discharged per annum; and since the alluvial deposits in the delta are estimated to have a mean depth of fifty feet and to have been wholly deposited by the Mississippi and its . tributaries, the least possible time upon these hypotheses, required for the deposition of the delta would be 13,648 years. The water discharged in the same time, would fill a sea S50 milds square, and one mile deep.

INCCULATION. The introduction of inoculation for the small pox into America, was by the well known Cotton Mather, in 1721. During that year thesmall pox raged in Boston with unparalleled fury and fatality. Mr. M. having -read in the Transactions of the Royal Society of London an account of the new mode of mitigating the violence of the disease by inoculation, as practiced in Turkey, communicated, it to the physicians of the place, and urged their adoption of it. With the exception of one individual, it was upanimously opposed by the faculty. That individual was Dr. Zabdial Boylston, who commenced his operations upon his own children and servants. The controversies which ensued were of the most forocious character.-Such was the tempest of popular indignation raised against the practice, that both Mather and Boylston were in dan. ger of losing their lives. It is gratifying to know that, although opposed and slandered at home, Dr. B., was appreciated abroad. In 1725, he visited England, and was received with the highest favor and attention by the most distinguished characters in the Nation, and even by Royalty itself. He was elected a fellow of the Royal Society, being the first instance in which that honor was conferred upon an American,

It is stated that the human life can be estimated by the pulsations a man performs. Thus allowing 70 years for the common age of man, and 60 pulses

Signature and the

in a minute for the common measure of pulses in his whole life would amount to 2.207,520,000. But if, by intemperance, he forces his blood into a more rapid motion, so as to give 75 pulses in a minute, the same humber of pulses may be completed in 56 years, reducing his existence 14 years.

OAK NECESARY TO BUILD ONE, SHIP .-By the report of the Commissioners of Land Revenue, it appears that a seventyfour gun ship contains about 2000 tons, which at the rate of a load and a half a ton, would give 3000 loads of timber, and would require 2000 trees of seventy-five years' growth, ... It has also been calculated that, as not more than forty oaks. containing a load and a half of timber in each, can stand upon one acre, fifty are required to produce the oaks necessary, for every seventy-four gun ship.-RAIL-WAY MAGAZINE.

C. INHOFF'S.

A FRESH supply of Cod Liver Oil

In Philadelphia

Life Pills and Phonix Butters. These Medicines have now been before the public for a period of FIFTEEN YEARS, and during that time have maintained a high character in almost every part of the globe for their extraordinary and immediate power of restoring perfect health to persons suffering under nearly overy kind of discess to which the human frame is liable. IN MANY THOUSANDS

Medicines.

MOFFAT'S.

of certificated instances, they have even reacued "sufferers from the very verge of an untimely grave, after all the deceptive nestrums of the day had utiterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blazing. So creat indeed, has their effects inverted. permanently secured the health, without which life itself is but a partial health, without which life itself is but a partial bleaning. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquaintell with the beautifully philosophical principles upon which they are compounded, and upon the way to their acquainted with the beautifully principles upon which they are compounded, and apon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their near

manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicous quackeries' which boast of vegetable ingredients, the LIFE MEDI-CINES are purely and solely vegetable; and contain noither Mercury, nor Antimony, nor Arsenie, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altorgether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially, cleanise theae, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrhoca with its imminent daugers. This fact is well known to all regular anatomists who. examine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleanes the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible.

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure boutly, hile, instead of, the stale and acrid kind; KLATULENCY, Loss of Appetite, Heartburn, Heardache, Resilesness, Ill-temper, Anxiety, Langaor, and Melancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

Coativeness, by cleansing the whole length of the intestines—with a solvent process, and without

the intestines with a solvent process, and without violence? all violent purges leave the bowels costive within two days. rithin two days.

Diarrhosa and Cholera, by removing the harp acrid fluids by which these complaints are coasioned, and by promoting the lubricative secre-

tion of the nuccus membrane.

Forers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases; and the thorough solution of all intestinal obstruction in others.

The Life Medicines have been known to cure RHEUMATISM permanently in three weeks, and GOUT in half that-time, by removing local inflammation from the muscles and ligaments of the joints.

Dropsies of all'kinds, by freeing and strengthening the kidneys and bladder: they operate most delightfully on these important organs, and honce have ever been found a certain remedy for the worst cases of GRAVEL. Also Worms, by dislodging from the turnings of the bowels the slimy matter to which these

reatures adhere. Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not re-moved, becomes hardened, and produces these readful diseases

dreadful diseases.

Sourvy, Ulcers, and Inveterate Sores, by the perfect purity which these LIFE MEDI-OINES give to the blood, and all the humors.

Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all cruntive complaints allow, cloudy, and ions all eruptive complaints, sallow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a

striking improvement in the clearness of the skin.

COMMON COLDS and INFLUENZA will COMMON COLDS and INFLUENZA will always be cured by one dose, or by two even in the worst cases.

PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic becommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of THERT-TIVE TEARS and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time, after his recovery had been pro-

for others to the public, and he was cured in a fery short, time, after his recovery had been pro-nounced not only improbable, but absolutely im-possible, by any human means. FEVER AND AGUE.

For this scourge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SA-TISFIED, AND BE CURED.

Billous Fevers and Liver Complaints.
General Debility, Loss or Appetite, and Discases or Females, these modicines have been used with the most beneficial results in gases of this description:—Kino's Evil., and. Scrovila, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Night Sweats, Nervous Debility, Nervous Complaints of all kinds, Palettation of the Heart. Painten. Colic, are speedily cured.

MERCURIAL DISEASES. RERUUKIAL DISEASES.

Persons whose constitutions have become impaired by the injudicious use of Mercury, will find these Medicines a perfect cure, as they never fail to cradicate from the system all the effect of Mercury infinitely seemer than the most powerful preparations of Saranparilla. A single trial will place them beyond the reach of competition, in the catination of every patient.

BE CAREFUL OF COUNTERFEITS.
