Interesting Facts.

CURIOUS FACTS IN NATURAL HISTO-RY .- It is but a little more than twenty years since the first crow crossed the Genesee river westwardly. They, with with the fox, the henhawk, swallow, and many other birds and insects, seem to follow civilization.

The locust borer is not of more than thirty years introduction into the United States, and has not yet reached the native groves of the locust tree at the south and west: It commenced its ravages on the east side of the Genesee river in IS-30, and it was seven years before it cross ed to the west side.

. The grain worm, or weevil, began its course of destruction in Vermont, about the year 1828, and it progresses in the course it takes from ten to fifteen miles a year. It has not yet reached Western New York toany extent, but the destroyer is on its march, and desolation will follow its track in this great wheat-growing

Rose-bugs have been so common i some of the Eastern States, that coulbo sea-shore they have floated in winrows on the sands, having been driven into the sea by winds, and drowned. They have only made their appearance in this region, in any quantities, within two or three years.

The cedar or cherry bird was first noticed-west of the Genesee river in 1828, and now it is so great a pest as to induce many to give up the cultivation of cherries, especially if near woodland.

The plum-weevil, or curculio, which is indigenous to America, being unknown in Europe, was first discovered by Mr. Godsell, the first editor of the Genesee Farmer, since which time it has disseminated itself over the whole continent.

The gopher, a species of ground squir rel with pouches on the outside of its cheeks to carry the dirt from its hole, is very plenty on the west side of the Mississippi, in Missouri and Iowa, but has never yet crossed the river into Illinois or Wisconsin. It only, works in the night, burrowing in holes and run-ways under ground-subsisting on the roots of trees, grasses, and vegetables. There are persons who have suffered by their depredations twenty years, who have never been able to catch or even see one of these nocturnal depredators.

· The cut-worm is of recent origin. The st it was noticed as doing much dame age, was during 1816 and 1817, noted as the cold years, when the whole northern country approached the very brink of famine. They are now universal.

The Hessian fly was introduced, it is supposed, by the foreign mercenaries in 1777, on Long Island, from their baggage, or in the forage for their horses.

Suggestions for SAFETY IN THUNDER STORMS .- Sedulously avoid all conductors of electricity. Do not shelter under trees, nor go near them; the great may jority of accidents arise from want of this precaution. Do not handle or be very close to metallic bodies; a servant cleaning a silver fork at a window, during a thunder storm, the prongs being outwards, was struck, but not killed; a young lady, during the same storm, sewing near a window, was thrown from her seat and experienced a blow. The centre of a room, if a metallic lustre is not pendent, is safer than any other part of the apartment. It is not safe to be between the window and the door, or fireplace, where there is a current of air. A bed is the securest retreat; so all ye who fear, and fail to derive pleasure mingled with awe in beholding this, the grandest of nature's meteors, ensconce yourselves within the woolen folds, and, sunk into your downy couch,if ye cannot fall into a gentle slumber, think at least that you enjoy comparative safety.-[Dr. Thompson's Meteor ology.

CURIOUS FACTS ABOUT RAIN .- There is one remarkable fact connected with the fall of rain, which has never yet received satisfactory, explanation: Over any given spot more rain falls at the surface of the earth than above it. Heberdon made some experiments to ascertain this fact, in the following manner: He fixed a rain-guage on the square part of the roof of Westminster Abbey, away from the western towers, which might obstruct the clouds, another on the roof of a neighboring house, and a third on the ground, in the garden of the same. The number of inches of rain caught on the Abbey was 12, on the house-top 18, and in the garden 22. The illustrious French astronomer, Arago, has for many years noticed the fall of rain, at different heights. at the Observatory in Paris, and his re sults, with which hundreds of others a gree, are like those of Heberdon. It is well known that the quantity of rain which falls at the foot of a mountain is considerably larger than that deposited on

its' summit. Many explanations have been offered of this curious fact, but none to which the scientific have given sanction.

MILS new and valuable Medicine, now used by the medical profession with such astonishing efficacy in the cure of Pul monary Consumption, Scrotula, Chronic Rheu-matism, Gout, General Debility, Complaints of the Kidneys, &c. &c., is prepared from the liver of the COD FISH for medicinal use, expressly for our sales.
(Extract from the London Medical Jonrnal.)
"C. J. B. Williams, M. D., F. R. S., Professor of Medicine in University College, Lon-

don, Consulting Physician to the Hospital for consumption, &c., says: I have prescribed the Oil in above tour hundred cases of tuber-culous disease of the Lungs, in different stages, which have been under my care the last two years and a half. In the large number of cases, 206 out of 234, its use was followed by ouses, 200 out of 234, its use was conowed by marked and unequivocal improvement, varying in degree in different cases, from a temporary retardation of the progress of the disease and a m.tigation of distressing symptoms, up to a more or less complete restoration to apparent health.

"The offect of the Cod Liver Oil in most of the complete restoration of the control of the contr

the onect of the Cod Liver Oil in most of these cases was very remarkable. Even in a few days the cough was mitigated, the expectoration diminished in quanty and opacity, the night sweats ceased, the pulse became slower, and of better volume, and the appetite, flesh and strength were gradually improved. "In conclusion I repeat that the pure fiesh oil from the liver of the Cod is more beneficial in the treatment of Pulmonary Consumption than ony agent, medicinal, dictotic or regime-nal, that has yet been employed." As we have made arrangements to procure the Cod Liver Oil, fresh from head quarters, it can now be had chemically pure by the single bottle, or in boxes of one dozen each.

Its wonderful efficiety has induced numerou spurious imitations. As its success depends entirely on its purity, too much care cannot be entities on the party, to make the cannot be used in procuring it genuine.

Life Pills and Physix Bitlers, & These Medicines have now been better the pub-lic for a period of FIRTEEN YEARS, dud-daring that time, have maintened a high white re-ingulancest every part of the globa for their owns of dinary and immediate power of restoring permet health to persons suffering under noarly every kind of disease to which the human frame is liable.

IN MANY THOUSANDS

of certificated instances, they have even general sufferers from the very vergoof an intimely grave, after all the deceptive nostrions of the dry bad or terly failed; and to many thousands they have a considerable secured that uniform enjoyment of terly failed; and to many thousands they have permanently secured that, uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariable-and-infallibly-proved, that it had appened scarcely less than miraculaus to those who yere acquainted with the beautifully philosophical frinciples upon which they are compounded, and apon which they consequently act. It was to their munifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

newed tone and vigor, that they were indebted for their name.

Unlike the host of peruicious quackeries which ben't of vegetable ingredients, the LIFE MEDI-CINES are pirely and solely vegetable; and contain neitler Mercury, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever. They are antirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical climits, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily editencious a combination.

The first operation is to toosen from the coats of the stomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened facers which collect in the convolutions of the small unestines. Other medicines only partially cleanse these, and leave such collected masses behind to produce habitual Costiveness, with all its tripoof oxile or subhutual is the later and or constantly all its tripoof oxile or such collected masses behind to produce habitual Costiveness. collected masses behind to produce habitual Costive-ness, with all its train of ovils, or sudden Diarrhoa with its imminent dangers. This fact is well known to all regular anatomists who examine the buman bowels after death; and hence the prejudice of these well informed men against the quack medicines of the age. The second effect of the VEGRTABLE LIFE MEDICINES is to VEGRTABLE LIFE MEDICINES is to cleanes the kidneys and the bladder; and, by this means, the liver and lungs, the healthful notion of which entirely depends upon the regularity of the urinary organs. The blood, which takes its rediction of the liver and lungs, before it passes into the heart, being thus partied by them, and nearished by food coming from a clean stomach, courses freely through the venus, renews every part of the system, and triumphantly mounts the banner of health in the blooming check.

The following are among the distressing variety of human desiases in which the VEGETABLE LIFE MEDICINES are well known to be infabilities.

DYSPEPSIA, by thoroughly cleansify the first and second stomachs, and creating a low of space healthy life, instead of the stale and arral kind; FLATULENCY, Loss of Appetite Hearthurn, Headache. Restlessness, 'Ill-temper, Anziety, Languar, and Melincholy, which are the general symptoms of Dyspepsio, will vanish, as a natural-Costiveness, by cleansing the whole length of the intestines with a solvent process, and without, violence: all violent purges leave the bowels of vivo

Diarrhosa and Cholera, by remaking the large arid fluids by which these complaints are consistent, and by promoting the lubricative secretion of the mucous membrane.

Fevers of all kinds, by restoring the blood to a regular exculation, through the process of perspi-

region carollaton, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others

Life Medical Regions have been known to cure RHEUMATISM permanently in three weeks, and GOUT in half that time, by removing local inflammation from the mindless of the processing the such as the process of the proc ocal inflammation from the muscles and ligaments Dropsies of all kinds, by freeing and strength-

ening the kulneys and bladder: they operate most delightfully on these important organs, and honce have ever been found a certain remedy for the avoret cases of GRAVEL.

Also Worms, by dislodging from the turnings of the bowels the sliny matter to which these reatures adhere.

Asthma and Consumption, by relieving the air-vessels of the lungs from the macous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseases.

Scurvy, Vicers, and Inveterate Sores, by the perfect purity which these LIFE MEDICINES give to the blood, and all the humons. Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all cruptive complaints, fallow, cloudy, and sions all cruptive complaints, ballow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will offect an outire cure of SALT RHEUM, and a

striking improvement in the clearness of the skin. COMMON COLDS and INFLUENZA will always be cared by one dose, or by two even in the worst cases. PILES. As a remedy for this most distressing PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundred in this city, that the former proprietor of these valuable. Medicines—was—himself—afflicted—with this complaint for upwards of runary rive years; and that he tried in vain every remedy prescribed within the whole compaiss of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was coverd in a

now offered to the public, and he was cared in a very short time, after his recovery had been pronounced not only improbable, but absolutely impossible, by any human means. FEVER AND AGUE.

For this scourge of the western country these Medicines will be found a sale, speedy, and certain remedy. Other medicines leave the system subject to a roturn of the disease—a cure by these medicines is parmanent—TRY THEM, BE SA-TISFIED, AND BE CURED.

Bilious Fevers and Liver Complaints. General Debility, Loss of Appetite, and Diseases of Frinales—these medicines have been used with the most beneficial condition in cases of this used with the most beneficial confes in cases of this description:—Kinn's Evil, and Scrowlla, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Night Sweats, Neavous Debilett, Neavous Complaints of all kinds, Palaitation of the Healet, Painter's Colic, are speedily cared.

MERCURIAL DISEASES. Persons whose constitutions into become impaired by the injudicious use of Mercury, will find these Medicines apperfect care, as they never full to cradicate from the system all the effect of Morcury infinitely sooner than the most powerful attoroury infinitely sooner than the most powerful preparations of Sansaparilla. A single trial will place them lievend the reach of competition, in the estimation of every patient. estimation of every patient. —
