TOPATMENT OF SCARLET POUR BY INDING TION.—From the first day of the illness, and as soon as we are certain of its nature, the patient must be rubbed morning and evening ever the whole body with a piece of bacon, in such a manner that, with the exception of the head, insance that, with the exception of the heat, i covering of fat is everywhere applied. In order to make this rubbing-in somewhat easier, t is best to take a piece of bacon, the size of he hand, choosing a partistill armed with the tind, that we may have a firm grasp. On the soft side of this piece slits are to be mude, in order to allow the obtaing out of the fat. The rubbing must be thoroughly performed, and not toe quickly, in order that the skin may be regularly saturated with the fat. The benefi-cial results of the application are soon obvious; with a rapidity byrdering on magic, all, even the most painful, symptoms of the disease are allayed, quiet, sleep, good humor, appetite re-turn, and there remains only the impatience of the sick room.
