From the Earm Journal. Spring Wheat.

This grain is already, very important to large farming districts in Pennsylvania ... and may most prefitably be cultivated in many parts of the State where winter wheat in a great measure fails. The objections urged against it generally, are three. I. That it is inferior in quality. 2. That it is liable to smut; and 3. That it is an uncertain crop owing to its being so frequently blighted and shrank by mildew. But from an experience and examinations of seven years I am convinced that these objections are not well grounded. As in all crops, the quality depends much upon the cultivation.-With good cultivation the Italian wheat weighs sixty to sixty-two pounds and yields forry to forty three pounds super-fine flour to the bushel. The flour although not quite as white, makes as good bread as any winter wheat. It has uso ally a slight yellowish tinge. If wheat were not so much judged of by the whiteness of its flour, I doubt not good Italian wheat would soon rank as high in the market as Mediterranean white wheat.

The second objection is entirely obviated by a proper preparation of the seed. I have had no smut for many years except where I have sown wheat without washing and liming. My process is to wash my wheat thoroughly in strong lime, which raises to the surface all oats and other light seeds, which are skimmed off. While wet it is thrown upon the barn floor and finely pulverised quick lime in small quantities is sifted over it. The whole is so mixed that every kernel is coated with lime. It may safely be left in this way for several days before sowing. It sown immediately the lime is unpleasant to the hand, and to prevent its injuring the sower a small quantity of gypsum is scattered over it. No smut is ever found in spring wheat prepared in this manner. The salt, lime and gypsum are all admirable manures.

The third objection is obviated by early sowing. In large districts in the northern part of the State it is difficult to plow early. The soil is a heavy clay and loam and retains the water very long. It is absolute ruin to the crop to plow while wet and consequently the farmer who relies upon spring plowing for his wheat will be unable to sow before the last of April or the first of May-a month too late here. The plowing must be done in the fall and the sowing at the carliest practicable day after the frost is out of the ground. The best spring wheat in quantity and quality, which have ever known raised, was upon a green sward, which had been turned under late in November and upon which the wheat was sown without further plowing, the latter days of March. A very light dragging lengthwise of the furrow, before sowing and the wheat was lightly dragged in so as not to raise the sod. Sown in this way it will be fit to harvost the latter part of July.— Wheat which ripens in July is seldom affected by mildew. Two bushels of seed should be sown per acre.

I have tried the Baltic wheat, which is said to be successfully cultivated in Vermont, but it is greatly inferior in quality as well as quantity to the Italian. WM. JESSUP.

Montrose, Aug. 1851.

Hints on Treatment of Cows.

CURRYING: Cattle are known to thrive much better where this operation is thoroughly performed; and Dr. B. Rush, in a lecture upon the advantages of studying the diseases of domestic animals states that there is an improvement in the quality of milk, and an increase in its quantity, which are obtained by cur-

rying the cow.

The first draw milk contains only 5, the second 3, and the fifth 17 per centatof cream.

Sores .- An ointment made of linseed oil and white lead will cure cracked DRINK .- Those who wish their cows

to give large messes of milk in the winter season should give them warm drink. The extra trouble will be more than repaid by the increased quantity of milk.
In MILKING be kind and soothing; the cow will give down her milk more free

CREAM. Do not milk so far from the dairy as to let the milk cool before it is out in the creaming dishes.

SQUARE ACRE, To lay out an acre square, two hundred and nine feet on each side is the nearest amount that will make an acre, being less than an inch each way over the exact distance; fortyty-three thousand five hundred and sixty superficial feet, or two hundred and eight ninety five hundredths feet on each side, constitute an acre of ground-

DRILLING IN WHEAT .- We believe it is the concurrent opinion of all farmers who have given it a fair trial, that the system of drilling in wheat instead of sowing it as has heretofore been done, is a saving of seed and of labor, and produces at least five bushels per acre more.

FIRST PREMIUM Grand and Square PIANOS. hnabe & gaehle,

Manufacturers, Nos. 4, 6, 8, 9 and 11 Eutan Street, Baltimore, Mid.

Street, Baltimore, Mt.

DIA NO FORTES, from 6 to 7 octaves, in in Rosowood, Mahogany and Walnut cases of various styles, with and without iron frames, combining all the improvements requisite to a superior instrument.

K. & G. have received from the Maryland Institute the first premitim for their Pianos, in three successive years, 1848, 1849, 1850. They have also been honored with numerous testimonials from all the most celebrated artists who have used their instruments. Pianos from their establishment have been used at the concerts os Lind, Herz. Holnstock, Bishop, Laborde, Knoop, and other eminent performers. They guarantee durability for five years, ander good care, and will replace with others all which may not give satisfaction, if application be made within its Months after delivery.

Their Unaufactory being conducted on the most extensive scale canables them to furnish instruments at the very lowest prices, whole-sale and retail. Constantly on hand, A. P. Hughes' Melodeons, fairing from \$45 to \$200, for which they are sole agents for this city.

Insurance Companies. The United States Life Insurance Annuity and Trust Company.

Gharter Perpetual—Corital \$23,000—Cash Syst m.

THE constant, unsolicited application for Life Insurance, gives the most alundant and gratifying proof that the public mind is deeply impressed with the vast importance of this subject. The great object, however, of Insurance should be safety, otherwise the whole motive to insure may be disappointed. Too much care cannot be practised in the selection of an office with which to effect the contract.—The choice should be regulated not by present and constant large inducements, as this, is certainly incompatible with future benefits. The premiums on life are calculated for the future, it present and prospective benefits therefore are given, the result ultimately, must terminate in hitgation, disappointment and ruin. The object aimed at by this institut in is stability and perpetuty. The rates of premium have been carefully prepared with reference to fluctuations.—The cash system of payments has also been adopted. Unpaid premium rotes constitute no part of the assets of this company, and overy contingency being fortified with an ample, capital, security stamps the whole system. This feature, paramount to all other considerations commends the company to public favor. Explanatory pamphlots, klanks, application papers information, and every facility will be cheertully furnished the public by Mr. E. BEATTY, who lies been daily appointed agent of this company for Cumberland county. Dr. H. HINKLEY has also been appointed Medical Examiner.

Directors.—Stephen R. Crawford, Ambrose Medical Examiner. Gharter Perpetual-Copital \$25,000 - Cash

Medicines.

DR. KEELER'S

Celebrated Family Medicines. t concorns every one. Cholera can be cure Dr. Keeler's Sarsaparilla Panacea. F the removal and parmanent cure of al Diseases arising from an impure state of the Blood and habit

of body.

The All-wise Creater has implanted in all regarded bodies an innate disposition to selfpreservation. The vital powers possess the property of resisting the influence of external causes, but as the BLOOD is the common par property of resisting the influence of external causes, but as the BLOOD is the common parabulum from which all parts of living mattederives its renovating elements, and consequently, upon which, the life of organized beings depend, it is probable that in cases of accident or where artificial means have been employed to deprive it of an essential property, the vital effects of the whole system will be directed toward restorting to it that propesty. In all constitutional and hereditary affections, this fluid has undergone some primary alteration, which is the cause of the special disease, or which essentially contributed to its production. Resto ration to health can only be obtained by a removal of the inorthfic cause through the medium of the circulation, and Dr. Keeler's Saraparilla; is the most powerful modifier of agent effecting this fluid known. See pamphlets.

Blackwoodtown, N. J., June 6, 1848.
Dr. Keeler-Dear Sir: I am entirely out of yoor Panaces. I was called upon day before yesterday for half a dozen. Your medicine is the comming very popular where I have infroduced it, and I think the more it is used the more popular it will get. Respectfully yours,

WM. Panham, M. D.

ATERS CHERRY PEUTORAL:

For the Pare of . COUCHE, COMBS,
HOARSHEMST, BRONCMITIS, CROWE, ASTELMIA, WINDOWNED CONCRAND COUS-STREET

Among the numerous discoveries Science has made in this generation to facilitate the business of life—increase its enjoyment, and eyen prolong he term of human existence, none can be manded of more real value to mankind, than this contribution of Chemistry to the Her-ling Art. A vast trial of its virturs throughout this broad country, his proven beyond a doubt, that no medicine or commation of medicines, yet known, can so surely confrol and cure the numerous varieties of pulmonary disease which have hitherts oswept from our midst thousands and thousands every year. In deed, there is now abundan' reason to believe a Remedy has at length been found which can be relied on former the most danaerous affections of the lungs. Our space here will not permit us to publish any proportion of the cures effected by its use, but we would present the following opinions of cuinent men, and refer further enquiry to the circular which the Agents below named, will always be pleased to furnish free, wherein are full particulars, and indispurable proof of these facts. From age Priestreat of Ammers Contract, the circular which the Agents below named, will always be pleased to furnish free, wherein are full particulars, and am satisfied from its chemical constitution, that it is an admirable compound for the relief of laryngual and bronchial difficulties.

If my cpinion as to its superior character can be of any service, you are at liberty to use it as you think proper.

"I doem the CHERRY PECTORAL an admirable composition from some of the best articles in the Materia Medica, and a very effective remedy for the class of discases it is intended to cure."

Now Auven. Ct., Nov. 1, 1849. MAJOR PATTISON, President of the S. C. Senate, states he has used the CHERRY PECTULAL with wonderful success to cure an inflammation of the lung.

pf-the lungs, ...

FROM ONE OF THE FIRST PHYSICIANS IN MAINE.

Dr. J. C. Ayer, Lowell. Dear Sir:—I am now. gonstantly using your Cherry Pectoral. in my practice, and prefer it to any other medicine for pulmonary complaints. From observation of many.severe cases, I am convinced it will cure coughs, colds, and diseases of the lungs, that have put to definite all other remedies.

I invariably recommend its use in cases of consumption, and consider it much the best temedy known for that disease. Respectfully yours.
