New Pennsylvania Loan .- The Philadel phia Ledger's tates that the somewhat extrava gant appropriations, made at the last session of the Pennsylvania Legislature have made i necessary for the Executive to make a loan some \$700 000 from the Banks of Fhiladelphia. The loan is for one year, and hears six per cent. All the city banks participate in it, loaning about six per cent. of their respective capitals. The money is to be applied to the North Branch Canal, to the Mountain Division, and to atter permanent impressment. and to other permanent improvements. No part of it will be used for the payment of State interest, which is fully provided. The recourse -to-a-loan at this time has been made the mor imperative from the fact that the Attorney General has decided that the bonus of \$250,000 from the Girard and Mechanics' Banks, (whose charters are just renewed by the Governor signing the bills,) and which was originally intended for the North Branch, cannot go to that important improvement, but, under general law, must go to the sinking fund.

MASSACRE AT SEA.

By late telegraphic advices from Boston, w learn that letters have been received from Montevideo, which report that the captain, both mates, steward, and two passengers of the Reindeer, bound to Valparaise from Boston, were murdered by the crew. The crew made the attack an suddenly that no resistance could be made, and after the commission of the deed, scuttled the vessel, which was afterwards discovered abandoned, and towed into Montevidco. On the arrival of the murderers at that port one of them confessed all, and they were immediately put in irons, and will be sent t England for trial.

following extract of a letter from the Washing- received, ton Correspondent of the N. Y. Journal of Commerce, as of serious import.

WARRINGTON, Wednesday, June 1. Gen. Garland, who has been here en route for Now Mexico, has left for his important command. He arrived here in much less time than was expected, after he had been summoned to this place. He has received his instructions, and I conjecture that they embrace both in the state of military nows. diplomatic and military powers. He is undoubtedly to proceed forthwith to New Mexico, and to march into the Mesilla Valley with a force that will enable him to encounter Governor Tries, who is there before him, and who is prepared to expel him or any other American intruder. It may be that Governor Trias will retire before Gen, Garland, and that Santa Anna will suffer the United States to take and keep possession of that disputed territory. But such is not the apparent intention of the

Mexicans. Our executive Government have decaded that the disputed territory belongs to us under the treaty, and would be ours supposing the boundary line to be run from "a point immediately north of El Paso" westward.

It is no use now to go into the merits of this reful specified spec

controversy. I say again that our Executive has decifed the question, and it is to the results that we are to look. It is to be hoped that this dispute will be allowed to be settled in the manner contemplated in the treaty of Guada-lupe, by running the line over again, or, in case of a final disagreement, to refer the discase of a unat disagreement, to refer the dis-pute to the arbitration of some third party. But arms are now introduced by both parties in the dispute, and both parties indicate a resolute intention to settle the question by arms. Governor Trias may give way, but he has not occupied the Mesilla for the purpose of yielding it. He has not gone there with a force of a thousand men for the mere purpose of giving up the territory to Gen. Garland. With a smaller escort he could do that. We have seen the first Mexican war, and

know its immediate provocation. The circum stances of the present case are similar to those of the former. The advance on Corpus Christi and Matamoras kindled the first war, and the second may be occasioned by the movement upon the Mesilla Valley.

Locofoco TROUBLES .- Our Locofoco opponents are just now in the full realization of the difficulties which must inevitably follow the dispensation of patronage. The appointments made by Postmaster General Campbell, over pink silk, with pink silk bonnets trimmed for this State, have brought on "a peck of troubles," which it will be found hard to adjust and reconcile. At Harrisburg, the appointment of Mr. Parke, who voted for Gen. Taylor in 1848, seems to be quite agreeable to the Whigs, and just as disagreeable to the Lucofocos. At Hollidaysburg, the appointment of Mr. Murray seems to have given great offence to the harmonious Democracy of that place. Dickinson College .-- Lying Letters.

DICKINSON COLLEGE,) -Carlisle, June 2, '53. Mn. Editon: My attention has just been called to a paragraph in your paper of to day, headed "Small Pex in Carlisle," in which are statements, quoted from a correspondent, so destitute of truth, and so calculated to in jure both the town and the College, that I hasten to correct them.

The quotation states that "there are now

ten or twelve cases in town, and the people are becoming alarmed, and fleeing into the coun-try. There are ten cases in the College, and the Faculty have determined not to recall the

students this session!" 🖟 You will be not a little surprised when I inform you that out of all these affirmations, not one of them has the merit of truth! Your infor am prepared to report the town as healthy as usual. So far from the "people becoming alarmed, and fleeing into the country," I have heard of no one who has done so, unless perheard of no one who has doite so, unless perhaps your terrified correspondent. Only two cases of small pox have existed in the College, and the one above named in town. Besides these, there have been no others. In town and College, there have been the cases of varioloid, but all except three of these were very mild, in some infitance not requiring any medical treatment, and all have recovered. No death has occurred, and there are no new cases. The Students who were sick with this discass have all recovered. For greater prequiring the case have all recovered. "Resolved. That in the opinion of the Faculty it will be safe for the students to return and that they be notified that College duties will be resumed on Wednesday, June 8th." In accordance with this resolution, you are espectfully requested to return and resume

your studies at that time.
C. Collins, President. Already about half the College students are here and anxious to resume their labors. The final examination of the Senior Class will commence on Monday the 13th inst., and all the usual exercises of Commencement will come off at their proper time in July. public exercises of commencement week will commence on Monday, July 11th, and close on Thursday, the 14th. We hope the friends of the College will not be deterred by these "lying reports" from visiting Carlisle, and that their presence, as usual, will cheer us at our approaching festival.

C. Collins. The nuther of the lying letter which Dr. Collins thus conclusively replies to, must indeed have a heart " black and lazar-like," to enable him to find pleasure in sending forth statements so purely false and malicious. And the exhibition of his own despicable meanness of character is heightened, if possible, by his cowardly attempt to shift upon the shoulders of an innocent and inoffensive party what he have made their report, for which they have had not the manliness to avow as his own act. Small pox is a pest from which any community may pray to be exempt, but human pests sometimes spring up, living embodiments of hatred, malice and all uncharitableness, who are infinitely more to be dreaded, and with such this anonymous writer is fairly entitled to be classed. The community can have no feeling but just indignation towards one who exhibits such a wanton and wicked purpose to injure a popular institution and the pros-

perity of the town. The Borough Subscription. At the stated monthly meeting of the Town Council on Thursday evening last, an ordinance was passed making a subscription of one thousand shures to the capital stock of the Carlisle Water and Gas Campany. The Sonora Herald records many lucky discoveries. Large lumps, valued at from \$300 to \$900 had been taken from the new diggings.

Later accounts had reached San Francisco from China than any received by way of Europe. The rebellion was still progressing, but not so vigorously, and with less prospects of success. The rumor that Nankin had been captured was generally discredited. The insurgents had made the attempt but failed, having been pretty effectually routed by the Governor. The Emperor was using all his energies and means to restore order and crush the rebels. It was thought he would eventually succeed. There was no doubt, however of-a-very-formidable party-being arrayed against him.
