PERRY COUNTY WARM SPRINGS.

If the proprietor of this place feeling highly gratified with the success which has attended his management of the above establishment during the part season, has further increased his efforts to render the place and accommodations still more inviting and comforable, by adding a new large Bath House, with Summer Houses, &c.

These Springs are situated on the banks of Sherman's, and empty upto Sherman's Creek; a stream associated with the thrilling scenes between the early settlers of that part of Pennsylvania and Aborigines, whose hunting ground lay on its margin. The qualities of the water of the Warm Springs are most extraordinary, indeed, so much so, that none has over been ascertained in the United States for the speedy and permanent cure of all cruptions of the skin, and every species of Cutaneous Diseases. Hundreds of Certificates could be produced and published, if requisite to the many cures it has performed. The Bathing Houses are so arranged as to use the water of the different springs: some of which throw out ninety gallons of water to the minute.

The Springs are accessible by the Central Railrad to Duncannon, where a fine new conchis in readiness on the arrival of the cars to convey passengers who desire to visit the Springs, fourteen miles N. W of Duncannon.

TAKE NOTICE.—The public in general, but especially those who have suffered by the swindling operations of a set of scamps, who during the Spring and Summer of 1852 were industriously engaged in putting up-so-called LIGHTNING RODS. A new mode of swindling has been adopted by the same gang of operators. It is this: They are travelling about the cities as well-as the country, selling what they represent to be my magnetic points, or something better still. In some instances they have succeeded in gulling the unsuspecting by taking off the pewter point and placing one of their valuable and highly improved points in its place. But strange to say they were, on examination, proved to be similar to those taken down. They are made of pewter, Lead, copper, cast and wrought from, come of brass with zinc bases. There may be many more kinds offered the public, but the above I have been called on to examine, and I pronounced them is eless and worse than none at all—There is something strange about there fellows—they know nothing of the former Company, and yet the points they carry fit the tops of the rods exactly, and even the thread of the seriew is the same. I have conversed with two of these gentry within a few days, and I know them to be the same men that put up the same kinds of rods and points last season, only different sections and under different names. Some of these gentlemen carry rods with them, and will sell either rods, points or both. Sundury, Jan 24th 1851.

Dr Ayer: In the month of July last I was attacked by a violent diarrhoa in the mines of California. I returned to San Francisco in hope of receiving benefit from a change of climate and diet. My diarrhoa ceased, but was followed by a severe cough, and much soreness. I finally started for home, but revelved no benefit from the voyage. My cough continued to grow worse, and when I arrived at New York, I was at once marked by my acquaintences as a victim of consumption. I must confess that I saw no enflicient, reason to doubt what my friends all believed. At this time I commenced taking your truly invaluable medicine with little expectation of deriving any benefit from its use. You would not receive these lines did I not regard it my duty to state to the afflicted, through you, that my health, in the space of eight months, is fully restored.
