rangement the work is performed faster and with much less labor. The Press is arranged with a much larger screw than 5 more Press is arranged with a much larger screw than 5 more pressure was represented by the pressure was recovered with the pressure was recovered with heavy sheet Zinc, both on their peripheries and ends; the wood in them is arranged so as not to swell; and the whole work on the Mill and Press made in the very best manner and this special view to their durability and service. No Ferrier who uses the Mill carefully and according to directions will be disappointed, but to the other head he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will find this one of the most valuable and efficient hand he will be described him the most severs and long the most sever and long the most sever and long the most s is sweet and fresh, the only time it is really healthy and fit. for use—and do you wish to save a great portion of the hard labor attending the making of Apple-Butter? If so, buy this machine, and our word for it, you will not be disappointed.

This Mill is warmfied superior to any other portable mill in existence, and the Properties is ready at any time, (on hir notice being given,) to test it with any Portable shill that is not an infringement on it.

Farmers, examine this newly INFROVED

MILL, before you buy any other.

One great advantage of this machine over all others, is, that it will not chake up, and hard or soft apples can be ground, and yet the Cylinders will always remain clear and in grinding order. that slowly crushed the apples without grinding them fine. They wave there made into a massive theces in straw, and a most severe and long pressure was required to extract a portion of the Cider, a considerable quantily being absorbed by the straw and the mass of pomace; and to obtain this unsatisfactory result the farmer had to take all his hands, and perhaps his six-horse team, and devote a whole day that could have been more profitably employed, to make from six to eight barrels of Cider. To obviate the -difficulty the Farmers have been done profit and oner, this Machino has been invented, and the statement of a few facts will prove that it is not only the best Machino of the kind in existence, but it is the most profitable that a man can have on his farm. The apples are by this Machine graded up into a fine pulp, so that it requires but a comparatively light pressure, and that the minute or two, to extract all the Cider, it

pauly accused a superiment that One-Fourth morgluice can be obtained than by the old process. Be sides this, it only requires two hands to grind up and make into Cider a larger quantity of applies than can be possibly done on the old-fashioned machines. On this press, owing to the compactness of the pomace in the tub, and the complete manner in which it is ground, a pressure of from 3 to be tonse-that can assily be obtained—will produce a more and will grind alone by horse-power from 100 to 300 bundles for the compactness of the pomace in the tub, and the complete manner in which it is ground, a pressure of from 3 to be tonse-that can assily be obtained—will produce a more favorable result than fifly tons pressure on the ordinary that the fastern Dilities of Fennylvania.

Entered according to Act of Cengress, in the year 1852, is the District Court of the Emitro Dilities of Fennylvania.
