Months the apples had been dried and hung is a bag, in the cabin kitchen; the lane leading from Mrs Armstrong's to the Main road was white with the level snow; the wind whistled up and down the hills, and night hung dreary over the world. But within doors it was cheerful and warm. True, the genial face of Warren was wanting-but then, there was an honored guest seated by the hickory fire talking mostly to Sally (who wears a lace collar which Mrs Goodhue gave her) bot sometimes to quiet Moses, and sometimes to Mrs Armstrong, whom he calls motohr. Is it Mr Long ?

Across the fields, and almost meeting their own, fall the window lights of Mrs. Goodhue who has become reconciled to the country, and thinks it less dreary in the winter than it was in the summer. The fire is no less bright than Mrs. Armstrong's, and beside it sit Warren and Louisa-lovers, now.

"By the way," said the young man, with ar arch expression, and passing his arm around the waist of the girl, "there is one matter which has not been adjusted--you have never paid me, as you proposed, for that first bringing you from the city. You know, at the time. I suggested leaving the settlement to a third party; I have selected Parson Long, and if you don't object to him, pray fix the time as early as possible." The reply she made was smothered by the sweetest of all impediments; but it is certain she did not object to the parson. as arbiter, and that the tilme was fixed, for she has been, for many a day, one of the most pains-taking and exemplary-wives in all our neighborhood-scarcely rivaled by Mrs. Sally

Adricultural.

HORSES IN THE UNITED STATES.

The Boston Transcript'says: The first horses brought into any part of the territory at pres ent embraced in the United States, were landed in Florida by Cabeca de Veca, in 1527, forty two in number, all of which perished or were otherwise killed. The next importation was also brought to Florida, by De Soto, in 1539. In 1606, the French introduced the horse into Canada. In 1609, the English landed at Jamestown, in Virginia, having seven horses with them. In 1629, Francis Higginson imported horses and other domestic animals in the Colony of Massachusetts Bay. In 1625, the Dutch Company imported horses into New York. In 1750, the French of Illinois were in possession of considerable numbers of horses.

According to the census returns for 1850, there were 4,835,353 horses in the United States, exclusive of those in cities which were not returned. The four and a half millions of these animals in the United States, constitute a proportion of one to five of the inhabitants New York has one horse to seven persons; Pennsylvania, one to six and "sixtenths;-Ohio, one to four : Kentucky, one to three free inhabitants. In Ohio and the new States of the northwest, the increase of horses has kept pace with that of the population.

The number of horses in the United States is more than three times as large as that in Great Britain. A recent report in France shows that there are in that country, 8,200,000

INTERESTING AGRICULTURAL EX-

Some recent experiments in wheat and flour, go to prove that both contain water, and that the quantity is more in cold countries than in warm. In Alsace, from 16 to/20 per cent. In the United States from 12 to 14 per cent. In Africa and Sicily, from 6 to 11 per cent. This accounts for the fact that the same weight of the Southern flour yields more bread than the Northern. English wheat yields 18 lbs. to the quarter less than the Scotch. Alabama flour, it is said, yields 20 per cent. more than Cincinnati. And in general, American flour, according to the authority of one of the most extensive London bakers, absorbs 8 or 10 per cent. more of its own weight of water in being made into bread than the English. The warmer the country, the more the water is dried out of the grain before it ripens, and hence when made into bread it absorbs more water again, and it is therefore more valuable. Prof. Beck has written a report for the Patent Office, in which he shows that the presence of water unfits these articles for preservation. The books of a single inspector in New York city, showed that in 1847 he inspected 218,670 barrels sour and musty flour. In his opinion the loss on these was \$250,000. Every year, the total loss in the United States, from moisture in wheat and flour, is estimated at from \$3, 000,000 to \$5,000,000! To remedy this great evil, the grain should be well ripened before harvesting, and well dried before being stored in a good dry granary. Kiln drying is preferable. The mode of ascertaining the amount of water is this :- Take a small sample, say five ounces, and weigh it carefully. Put it in a dry vessel which shall be heated by boiling water. After six or seven hours, weigh it carefully, until it loses no more weight. Its loss of weight shows the original amount of

HICKOK'S PATENT IMPROVED CIDER MILL.

HICKOK'S PATENT IMPROVED CIDER MILL.

In the present arrangement of this highly approved and valuable Mill; the labor is divided by arranging a cutting Cylinder to be reduced to pomace. By this arrangement the work is performed faster and with much less labor.

The Press is arranged with a much larger screw than formerly, and by a very ingenious device the use of the bag is dispensed with and the Tub made to open at will to deliver the pomace, while at the same time the Cider is left clear and the work can be done with much less labor than by the old method. The Cylinders are covered with heavy sheet Zine, both on their perlipherles and ends; the wood in them is arranged so as not to swell; and the whole work on the Mill and Press made in the very best manner and arranged with especial view to their durability and service.

No Farmer who uses the Mill carefully and according to directions will be disappointed; but on the other head he will find this one of the most valuable and efficient machines on his farm.

The meddine is made to run by horse, steam, or hand.

The meddine is made to run by horse, steam, or hand.

other Mill.

Third—You can make the Cider as you want it, and when by the old method. The Cylinders are covered with heavy sheet Zine, both on their peripheries and ends; the wood in them is arranged so as not to swell; and the whole work on the Mill and Praes made in the very best manner and arranged with especial view to their durability and service.

No Farmer who uses the Mill carefully and according to directions with De disappointed, but on the other hand he will find this one of the most valuable and efficient machines on his farm.

The machine is made to run by horse, steam, or hand porzer, and when the apples are ground, a small boy of 14 years of age can press the ponace with all ease.

In all former times it was supposed that a large quantity of Cider could only be made by using a ponderous machine, that cloudy crushed the apples witcout grinding them fine. They were then made into a massive cheese in straw, and a most severe and long pressure was required to extract a portion of the Cider, a considerable quantity being absorbed by the straw and the mass of ponnece; and to obtain this unsatisfactory result the farmer had to take all his hands, and perhaps his six-horse team, and devote a whole day that could have been more profitably employed, to make from six to eight barrels of Cider. To obviate the difficulty the Farmers have heretofore labored under, this Machine has been invented, and the statement of a few facts will prove that it is not only the best Machine of the kind in existence, but it is the most profitable that a man can have, on his farm. The apples are by this Machine fact all under the propertion of the compactness of the pomace in the tub, and the complete manner in which it is ground, a pressure of from 3 to 6 tons—that can easily be obtained—will preduce a more favorable result than fifty tons pressure on the ordinary large quantity of apples than can be possibly done on the old-fashploned machines. On this press, owing to the compactness of the pomace in the tub, and the complete

PRESERVE YOUR TEETH BY USING Zermans Celebrated Tooth Wash.

IIIS valuable preparation has long been used In New York and Philadelpain, where this attained an immense popularity, for cleansing, preserving and beautifying the teeth. It is an excellent remedy for sorie, soft or bleeding gums. It also, imparts a delightful freshness to the mouth and agreeable odor to the breath.

Italso impartes delightful freshness to the mouth and agreeable odor to the breath.

Read the following from Dr. Murray.

"I can, with the utmost confidence, recommend to the public, Zerman's Anti-Scorbutic Tooth Wash as the best in use. In my practice as a Dentist, I have used and recommended it for me last five years, and have lound it to give satisfaction in every instance, as the Wash does not contain acid, or anything injurious to the teeth or gims; but, on the contrary, is the best antiseptic in the practice, and therefore, would recommend he use of it, not only to those who wish to preserve their teeth and gums, and have a wholesome ibreath, but also to those who have diseased gums tor teeth. The use of the Wash, for a short time, will insure a return to their healthy state.

GEORGE E MURRAY, Dentist,

No 61, S. Eleventh st., below Chestnut Phil'a.

Ir. Hendel, of Carlible, says:—'Mr. Zerman, I am well pleased with your Tooth Wash; it not only cleanses and whitens the teeth without injuring them, but it eners sore or bleeding gums. I cheerfully recommend it to the profession and public, as the very best preparation that can be need for cleansing and preserving the teeth, healing the gums, and giving sweetness to the threath.

ξ) ' হ্বী ቖ . ß MEXICAN MUSTANG LINIMENT. Through by Express.

Through by Express.

MESSRS, A G BRAGG & CO.—GENTLEMEN: We have been using your MEXICAN MUSTANG LINIMENT with the most perfect success. One of our most valuable Express horses had been much troubled by large swellings or tumors on the fetlocks; they had grown larger than hen's eggs. Besides being disfigured by these appendages, the limbs and joints appeared quite stiffened, swollen and lame. We had tried many Li meents and other remedies, but nothing amore red to produce any effect upon had tried many Limments and other remedles, but nothing appeared to produce any effect upon them. We would willingly HAVE GIVEN TWENTY FIVE DOLLARS to have had them removed, and the horse restored to soundness. Our hostler obtained some of your Limitent, and applied it without knowledge. A few days ago he called our attention to the horse, and to our surprise and gratification, his legs were perfectly smooth, THE TUMORS HAVING ENTRE-LY DISAPPEARED! We asked him by what magic he had effected such a remarkable cure? His reply was that the had been using the MUSTANG LINIMENT on them about ten days, and the result was the entire removal of the tumors without producing any soreness or leaving users.

we therefore take great pleasure in commending the Liniment, and shall continue to use it whenever occasion requires, in preference to any other preparation, so long as it produces such remarkable results
June 30,1052. KINSLEY & CO,
Southern and Eastern express, No 1 Wall st.,
Jorner of Broadway, New York.

Since the above certificate was given, Messrs (insley & Co have informed us that one of his litters was thrown from his wagon in the upper sart of the city, and very badly bruised, the vagon passing over his body. He was taken into Dector's office close by, and I'HE PHYSIC-AN TOLDHIM TO USE THE MUSTANG INIMENT, as he had recently tried it in a limitar case with great success. He did so, and it the soreness, lameness, and stiffness was rejuved, so that the next day he was about his usiness as usual.

"We take great pleasure in recommending the MEXICAN MUSTANG LINIMENT to all ur falends and customers, as the bestarticle we avo ever used for sores, bruises, sprains, or alds in horses. We have used it extensively and always effectually. Some of our men have I so used it for severe bruises and sores, as well s rheumatic pains, and they all say it nots like taggio—we can only say that we have abandoned the use of any other Liniment,

J. M. HEWETT,

Stable Keeper to the American Papress Co. and for Haruden's Express."

NEW YORK, July 31, 1852, NEW YORK, July 31, 1852.
We hereby certify that we have used the compound known as the MUSTANG LINIMENT and have no hesitation in recommending it as the test article we have ever used for the cure of prains, galls, cuts. bruises, &c on horses. All following this, will please call on the undersigned, and they will be happy to afford all other formation in their newsear nearest its officers. formation in their power as regards its efficacy, scription LUTZ. DALL & CO.. Exclus

Proprietors Manhattan Stage Co Extract from a letter dated SACRAMENTO CITT, Cal. Aug. 15, 1852.

I believe the MUSTANG LINIMENT mos I believe the MUSTANG LINIMENT most of excellent article. My wife brought a couple of bottles with her, which I must thank you for ince she came here, MY HORSE FELL DOWN WITH ME; and injured me considerably, but broke no bones. I had recourse to the Iustang, and the relief, and in fact cure was stonizhing... (Signed) D RANSOM.

Extract from a letter dated

PITTEBURG, Pa. October 5th, 1852.

Another circumstance which I noticed a few ays ago, I thought spoke highly of the virtues if the Mustang. Being in the office of a Physician of high standing, I noticed as he opened a foor of his book-case, several bottles of Musting along side of which was an marry Mustang of the and a two ounce prescription vial FILLED VITH MUSTANG LINIMENT, on which is the following directions: "Rub the throat well night and morning with the Liniment, and rap a woolen cloth around it."

O.H.Chamberlinis COMMERCIAL COLLEGE,

ocated No 127 Baltimore Street, Baltimore, Md. The estensible object of this Institution is to place in the reach of individuals proper facili-ies for obtaining a thorough and prectical Mercantile Education. Nothing indeed has been omitted that is calculated to produce the

merantile Education. Nothing indeed has been omitted that is calculated to produce the desired result.

The rooms of the College are well fitted up, conveniently arranged, and situated in the most desirable part of the City. Connected thereto is a Commercial Library, and this, in connection with familiar Lectures on Commercial Law and Mercantile. Science, is a matter of the highest importance to all who desire to become Accountants of the first order, and occupy stations of profit and responsibility. A young man can here obtain a more correct knowledge of general business matters in a few weeks than can be acquired in a many years in any one Counting Room.

The course of study embraces Double Entry Book keeping, and its adaptation to vatious departments of Commerce and Trade, Mercautile calculations taught according to the most apprived methods, Practical Pennanship, combining rapidity of execution with beauty of constraints. approved methods. Practical Penuanship, combining rapidity of execution with beauty of construction. Lectures on Moreantile Law, upon various important Mercantile subjects baside many other points necessary for a book-keeper or business man to understand. The time necessary for an industrious student to complete the course varies from 5 to 8 weeks. There being no vacation, applicants can enter at any time and attend both day and evening. Examinations are held at stayed periods and Diplomas awarded to those who graduate. For terms, &c., write and have a Circular forwarded by mail.

"PANKORETE."

MYERS' EXTRACT OF FOCK ROSE An Invaluable Remedy for all Scrofulous Dis cases, Indigestion, Salt Rheum, Siek Head-ache; Cancer; Nursing Sore Mouth, and General Debiting, and as a Purifier of the Blood it is Unequalled.

The Rock Rose has gained a reputation a home and abroad, which no other medicin has ever done in the same length of time According to the opinions of eminent Physicians, the Rock Rose Plantis unequalled in Curing Scrofula in its Various Forms!

STATEMENT OF REV. E. R. WARREN

(Pastor of the 2d Baptist Church, New London Ct.) felative to Myers' Extract Rose.

(Pastor of the 2d Boptist Church, New London, Ct.) felative to Myers' Extract Rose.

To The American Public.

As my name has been used in connection with recommendations of Mr. Myers' Reck Rose Syrup, in various advertisements by the manufacturer, I beg leave to make the following statement with reference to my acquaint, ance with the remedy and tests to which I have subjected it, and the reasons for having introduced it to the notice of private friends in the community in which I reside, long before the medicine was advertised. I reake this statement freely, because I have, as a principle, withheld-my name from all patent medicines, and sedulously abstanted from recommending them to the public, believing them frequently, the spawn of quackery and humbug, and as tending to increase, instead of lessening human disease and suffering. Such, I (ear, is the character of a large portion of the patent panaces of this medicine making age. "Their name is legion," and from their influence, so from the demoniacal spirits, we have reason to pray for a safe deliverance.

The First T-st.—I had myself suffered occasionally with sudden attacks of Sick Head.

disease and soffering. Such, I fear, is the character of a large portion of the patent panacess of this medicine making age. "Their name is legion," and from their influence, sa from the demoniacel spirits, we have reason to pray for a safe deliverance.

The First T-st.—I had myself suffered occasionally with sudden attacks of Sick Headach, and Billious Diarrhea, and I had sought a great variety of curative agents to but-little purpose; and suffering from this disease (diarrhea) at this time, I determined to test the new Syrup first upon myself. The results were beyond my expectations. It was a powerful alterative, and the functions of secretion were restored to a healthy state. It gave tone and elasticity to my system, and corrected the derangement of the digestive organs, and gave me that inestimable blessing—health. This test was not deformined in a week, or a month; but I took four or five bettles in perhaps as many months. Since that time I have suffered but slightly from these derangements. My Sick Headache is envirely Cured.

Other Tests.—Finding this medicine so useful to myself, I at once gave it to several invalid friends. About this time, I was carnestly solicited to give advice in reference to a child, some eight years of age. This child was

solicited to give advice in reference to a child. some eight years of age. This child was severely afflicted with a Scrofula humor, of a very severe type, the humor showing itself on all parts of the surface, and then suddenly disappearing. The child was very sick, and it was thought doubtful whether she would live, The humor resembled black specks of mortified flesh. In addition to some other remedies, gave the child this Sy up for about six weeks, whon she had sufficient strength to go ont to school occasionally. The swelling of her limbs ceased, and she was restored to health. The family feel that they owe her life, with God's blessing, to my remedies.

family feel that they owe not. This test satisfied me that the Rock Rose possessed specific powers for Scroful us her mors. I then tested it in cases of Cutaneous June 32, 1833. Eruptions, in Measles, Chicken Pox, Cancor, Sore Mouth, Erysipelas, Salt Rhoum, Piles, &c. Sore Mouth, Erysipelas, Salt Rhoum, Piles, & In all these cases with perfect success. Aftel testing this Syrup for more than a year, I wrote Mr. Myers (October 7th, 1850) enthusiastically, not expecting my letter would be published, that his Syrup was a "Pankorite," all healing, and I gave him the result of its operations in several instances. I stated in that letter that "it was invaluable as a remedy in Cutaneous Eruptions, Erysipelas, Salt Rheum, and other disorders, included in the varied family of diseases known as Scrofula, &c.: that in Dyspepsia it acted with wonderful efficacy." My opinion of its value for the above named diseases, remain unchanged, and the same as when I wrote Mr Myers in Oct. 1850. I do not recommend it for all the ills of our suffering humanity; but lunhesitatingof our suffering humanity; but I unhesitatingly say, that as a remedy for Scrofulous affections I believe it superior to any known cura-

It has been sufficiently tested by domestic practice to establish its adaption to extensive

usefulness in mitigating human suffering and removing direases. But What is the Rock Rose? The following history of the Rock Rose plant and its medicinal properties, we take from the New Haven Palladium, March 1852. The increased interest manifested in the Rock Rose plant, in consequence of the many wonderful cures effected by Myers' Compound Extract of Rock Rose, calls for a brief history

of it, in order to correct any erroneous opin-ion that may have been entertained concern-ing it; and also to set in a true light the na-ture of a plant which promises to be univer-sally beneficial "We are indebted to the United States Dis

pensatory of 1847, for the following escrip. " It is entirely different from the comm Rose. It is a red-stemmed, oblong leat plant, having a bitter taste. In addition to remarkable peculiarity of the plant, of bearing two erops of flowers in one season, it also has another interesting and heartiful remarks. ther interesting and beautiful property.

Dr. Eaton says, that in the months of November and December, he has seen hundreds of these plants, sending out near their roots, broad, thin, curved icc-crystals, about an inch in breadth which melted during the day, and were renewed in the morning. For a more minute and authentical description of it, the

ender is referred to Torrey and Gray's Botan-Its Medical History and Properties Are far the most important, since upon these depends its value to the community. Dr. Loudon says that in 1799, it was so valuable in England, that it was cultivated from seeds, Ever since 1806, Professor Ives of Yale Col-lege, has habitually used it with great success n Scrofula and Chronic diseases, and through him its virtues were made known, until, as Dr. Tyler says, "it is now in this section (New

the hip, in February, 1814:—The lad was seven years old, and had the disease three years. The bone was dislocated both opward end outward. There was a large opening in the hip leading to the bone; into which I could thrust my finger. I counted three ulcers. He had been under several physicians, who had wing him him the undersed the descript of Rech. had been under several physicians, who had given him up. I ordered a decection of Reck Rose. In two days his night sweats ceased: I then ordered a tenspoonful of Rock Rose three times a day. Thirty nine days after he was entirely wall.

Dr. Webb; of Madison, Ct., testifies to the value of Rock Rose, as evinced in the cure of numerous cases of the Scrofula, especially in children.

him its virtues were made known, until, as Dr. Tyler says, "it is now in this section (New Haven) a common article in domestic practice for the cure of Scrofula and Cutaneous discases."

Dr. Whitlaw, a Sco'ch Butanist of notoricy, while travelling in America in 1814, learned its use in Canada. Returning to England, he employed it in medicating his baths, which became greatly celebrated for the cure of similar discases.

Dr. J. H. Thompson, of the same place, prescribed it in bad cases of Scrofulous patients at Wills' Hospital. His success attracted the attention of senior physicians, Ile reports the following remarkable case of white swelling of the hip, in February, 1814:—The lad was
