From this time forward the farmer shoul be rapidly and energetically setting to work preparing his corn ground, getting in the crop &c., for the sooner the better after the period in which it will escape the frosts, seeing that it has to withstand the hot summer and pro bable droughts. The American Farmer for March says of the corn crop. .. Let what may be said of other products, that of corn mus be considered as the most important. We lay it down as a proposition not only susceptible of proof, but one which is justified by the experience of all observing corn planters, that a profitable crop of corn cannot be grown upon a poor soil, unless the soil be liberally manur

After giving tables showing both the organ ic and inorganic constituents of the grain of corn, with a view of demonstrating what its food should consist of, and how much of each kind an acre of corn will abstract from the soil The Farmer proceeds:

Preparation of the Corn Ground.-In th first place be careful to distribute the manur broad-cast equally as possible over the field in order that equality may be produced in the state of its fertility. Much of the success of a corn crop depends upon the manner in which the ground may be prepared for the reception of the seed. All land that is not wet should be plowed at least 8 inches deep, and would be all the better of being sub-soiled from 6 to 8 inches more. The plowing should be exe cuted with accuracy; no part should be left unplowed, and care should be taken to use the harrow and roller freely, so as to break all lumps and reduce the soil to the utmost fineness of tilth. When clover lavs or gras swards are plowed, before harrowing; the ground should be rolled with a heavy roller the same way it was plowed. If danger is apprehended from the out and grub worms, top-dressing of two bushels of salt per acre will be found useful. Indeed, under any cir cumetances such top-dressing will be useful, as will afford very acceptable inorganic food to the plants; besides which, it will increas the powers of the soil in the attraction and sharption of the moisture from the atmosphere, and in this way operate most beneficially. After the operations of harrowing and cross harrowing shall have been performed. then the ground should be rolled. This done it should be listed preparatory to dropping the corn; unless it should be contemplated to drill the corn, in which case the drills should run north and south.

Depth of Lists or Drills-The depth of the lists or drills should be from 8 to 4 inches. Distances of Rows .- Upon this subject gree diversity of opinion exists; but we think that 8 by 4 feet apart, or 4 feet at the furthest, are good distances; the first distance is the one we adopted after trying several others, and where the soil may be naturally rich, or made so by manuring, we think it a safe-one, --Number of Stalks in the Hill .- In manured

land three plants should be left in each hill; so also may that number be left in land naturally very rich.

Distance Apart of Drilled Corn -When corn may be cultivated in drills, the stalks should be about 12 inches apart, but the land to bear such close planting, must be liberally manured broadcast, as well as in the drills. Manuring in the Hill .- Independently of the

broadcast dressing of manure, of which we have spoken, corn should receive a proportion of manure applied in the hill, to give an in petus to the growth and vigor of the plants when they first come up. Of the Cultivation .- Upon this subject it i

almost superfluous to remark, as nearly every neighborhood has its own best way; from which it is useless to expect a departure. W seize the occasion here to state, that it is our firm belief that he who undertakes to make a good crop of corn, or anything else. by simply applying mineral or inorganic manures-unless his land be very rich-very fertile-will meet with a most lamentable failure. To grow a profitable crop, required both agimal and mineral manures to be applied. The soil must have in it both nutritive and miners substances-it must have in it all the element which enter-into, and make up the entire plant

The senses of smelling, tasting, and even of feeling or touch, are liable to innumer able causes of deception. It is mentioned i the Museum of Art and Science, that if two fingers of the same hand, being crossed, be placed upon a table, and a marble or pea is rolled between them, the impression will be, if their eyes are closed, that two marbles ar peas are touched. If the nose be pinched and cinnamon be tasted, it will taste like a common stick of deal. Many substances lose finvor when the nostrils are stopped. Nurses, therefore, upon right and scientific principles, stop the noses of children when they give them doses of disagreable medicine. If the eyes are blindfolded and buttermilk and claret be al ternately tasted, theperson tasting them, after a few repetitions of the process, will be unable to distinguish one from the other.

Nebraska.—The emigration to Nebraska territory is very large. The St. Louis Republican says a great number of persons have arrived in that city, on their way to that territory to settle. The steamboats were taken up as they arrived, to convey the emigrants to their destination.

HARDWARE.

A LARGE SPRING ARRIVAL! WHICH surpasses in quantity quality and prices any that has ever yet been opened in Carlisle, consisting of the greatest variety of all kinus of Hardware, such as, Shoe Findings, Saddlery, Coach Trimmings, Paints Oils, Varnish, Glass, Nails, Files, Anvils, Vices, Bellows, Springs, Axels, Bows, Felloes, Vancers, Cedarware, Farming Utensils, Bay and Rolled Iron, Steel, &c., with a thousand more articles unmentionable.

DR. HOOFLAND'S CELEBRATED GERMAN BITTERS.

DR, C.M. JACKSON, No. 120 Arch Street, Philadelphia. Their power over the above diseases is not excelled, if equalled, by any other preparation in the United States, as the cures attest, in many cases after skilful physicians had failed.
These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of diseases of the Liver and lesser glands, exercising the most searching powers in weakness and affections of the digestive or the contract the receivable and lesser than the contract the page with the feet certain and lesser. cane, they are withal safe, certain and pleas-

READ AND BE CONVINCED. Testimony of the highest character! HON. GEO STROOP, Judge of the District Court in GEO. STROOP, Judge of the District Court in Parry county, Pa., Nov. 18th. 1852 said: "your 'Hoofland's German Bitters' has been in use in our place over a year past, and to the astonishment of many has performed wonders. We may notice a few instances that have come under own immediate notice:—almost every person who has stopped at the hotel of Wm. Lackey, one year since, predicted from his comacinated countenance and deblity, that he could not live much longer. He was unable to attend to his buriess, and for the greater. to attend to his buiness, and for the greater part of the time confined to his ruom. We rec-ommended him to try the German Bitters; he did; and to the surprise of all, his friends he is now able to attend to his usual business and perform manual labor. The case of Henry Asper a stone mason, whom no one supposed would ever recover from the debility of his asystem, but was looked upon as fast approach ing the grave, took eight or nine bettles of the Bitters during the last winter, and this summer he has been fit of the surprise or all who knew his case following his trade. The case of William Murphy is no less astonishing.—
He too was so far reduced as to induce the general belief that the grave alone would be his only remedy. Mr. Lackey recommended him to try-the Hoofland's German Bitters; he is now apparently a well man, and able to do a hard day's work. We could mention many other cases of a similar character, if it were other cases of a similar character. If it were necessary. I myself derived much benefit from their use. I have given considerable of it away, not for your benefit alone, but to relieve suffering humanity, and let me assure you I am pleased to see the happy result. To the am pleased to see the happy result. To the afflicted we say, try them fairly and I will warrant relief."

lesser glands, giving tone to the stomach and nervous system, and bringing the system gen erally to a high state o, health.

"PANKORITE." MYERS' EXTRACT, OF FECK ROSE,

An Invaluable Remedy for all Ecrofulous Dis-eases, Indigestion, Salt Rheum, Sick Head-ache, Cancer, Nursing Sore Mouth, and General Debility, and as a Purifier of the Blood it is Unequalled.

The Rock Rose has gained a reputation at has ever done in the same length of time According to the opinions of eminent Physi-cians, the Rock Rose Plant is unequalled in Curing Scrofula in its Various Formst

STATEMENT OF REV. E. R. WARREN (Pastor of the 2d Baptist Church, New London Ct.,) relative to Myers' Extract Rose.

To The American Public.

As my name has been used in connection with recommendations of Mr. Myers' Rock Rose Syrup, in various advertisements by the manufacturer, I beg leave to make the following statement with reference to my sequantiance with the remedy and tests to which I have subjected it and the reasons for having introduced it to the notice, of private friends in the community in which I reside, long before the medicine was advertised. I rake this statement in the time of the state of the community in which I reside, long before the medicine was advertised. I rake this state ment freely, because I have, as a principle, withheld my name from all patent medicines, and sedulously abstanced from recommending them to the public, believing them frequently the spaun of quackery and humbug, and as tending to increase, instead of lessoning human disease and suffering. Such, I test, is the ment freely, because I have, as a principle, withheld my name from all patent medicines, and sedulously abstanted from recommending them to the public, believing them frequently the spaten of quackery and humbug, and as tanding to increase, instead of lessoning human disease and suffering. Such, I tear, is the character of a large portion of the patent panaceas of this medicine making age. "Their name is legion," and from their influence, sa from the demoniacal spirite, we have reason to pray for a safe deliverance.

but I took four or five bottles in perhaps as many months. Since that time I have suffered but slightly from these derangements. My Sick Hendache is entirely Cured.

Other, Tests.—Finding this medicine so useful to myself, Lat once gave it to several invalid friends. About this time, I was carnestly solicited to give advice in reference to a child, some eight years of ago. This child was severely afflicted with a Scrofula hamor, of a solicited to give advice in reference to a child, some eight years of age. This child was severely afflicted with a Scrofula humor, of a very severe type, the humor showing itself on all parts of the surface, and then suddenly disappearing. The child was very sick, and it, was thought doubtful whether she would live. The humor resembled black specks of mortfied flesh. In addition to some other remedies, a gave the child this Syrup for about six weeks, when she had sufficient strength to go out to school occasionally. The swelling of her limbs ceased, and she was restored to health. The family feel that they owe her life, with G d's blessing, to my remedies.

This test satisfied me that the Rock Rose possessed specific powers for Scrofulous flumors. I then tested it in cases of Cutane a B Eruptions, in Measles, Chicken Pox, Cane.

Sure Month, Erysipelas, Salt Rhoum, Piles, 86, Knowledge and Honorary Ancher of the Surgeons, London, and Honorary Ancher of

mors. I then tested it in coses of Cutane's Bernptions, in Measles, Chicken Pox, Canc. Sure Month, Erysipelas, Salt Rhoum, Piles, 86.

In all these cases with perfect success. After testing this Syrup for more than a year, I wrote Mr. Myers (October 7tn, 1850) enthusis actically, not expecting my letter would be published, that his Syrup was a "Pankorite," all the receives given in plain language. The chipter-on self-saluse and Seminal Weakness, is worthly of preticular attention, and should be read to perations in several instances. I stated in that letter that "it was invaluable as a remedy in Cutaneous Eruptions, Erysipelas, Salt Rhoum, and other disorders, included in the varied family of diseases known as Scrottla, &c.; that in Dyspepsia it acted with wonder-ful efficacy." My opinion of its value for the salver named diseases, remain, unchanged, and the case a wheat I work have been salved for the salver named diseases, remain, unchanged, and street with Myeas. Oct.

w The increased interest manifested in the Rock Rose plant, in consequence of the many wonderful cures effected by Myers' Compound Extract of Rock Rose, calls for a brief history for \$1. Address Dr. WILLIAM YOUNG, of it, in order to correct any errone is opinion that may have been entertained oncern-

.44 It is entirely different from the commo

Rose. It is a red-stemmed, oblong lear plant, having a bitter taste. In addition to remarkable peculiarity of the plant, of bearing two crops of flowers in one season, it also has another interesting and beautiful property.

Dr. Eaton says, that in the months of Nosvember and December, he has seen hundredof these plants, sending out near their roots, broad, thin, curved ice-crystals, about an inch in breadth; which melted during the day, and were renewed in the morning. For a more minute and authentical description of it the reader is referred to Torrey and Gray's Botan

ical works. Its Medical History and Properties Are far the most important, since upon these depends its value to the community. Dr. Loudon says that in 1799, it was so valuable in England, that it was collivated from seeds, Ever since 1806, Professor Ives of Yale Col-lege, has habitually used it with great success n Scroula and Chronic diseases, and through him its virtues were made known, until, as Dr. Tyler says, "it is now in this section (New

for the cure of Scrofula and Cutaneous di Dr. Whitlaw, a Scotch Butanist of notoriety, while travelling in America in 1814, learned its use in Canada. Returning to England, he employed it in medicating his baths, which became greatly calebrated for the cure of simi-

Haven) a common article in domestic practic

Dr. J. H. Thompson, of the same place, prescribed it in bud cases of Serviulous patient scribed it in bud cases of Scrofulous patients at Wills' Hospital, His success attracted the attention of senior physicians. He roports the following remarkable case of white swelling the hip, in February, 1814:—The lad was seven years old, and had the disease three years. The bone was dislicated both upward and outward. There was a large opening in the hip leading to the bone; into which I could be the seven the large of the bone was the seven the large opening in the hip leading to the bone; into which I could be seven the large of the bone into which I could be seven to be sev thrust my finger. I counted three ulcars. He bad been under several physicisms, who had given bim up. I ordered a decention of Reck Rose. In two days his night sweats ccased I then ordered a traspoonful of Rock Rose three times a day. Thirty-nine days after he was

disease and suffering. Such, I tent, is the character of a large portion of the patent panaceae of this medicine making age. "Their name is legion," and from their influence, as from the demoniacal spirite, we have reason to pray for a safe deliverance.

The First Test.—I had myself suffered occasionally with sudden attacks of Sick Headache, and Billious Diarrhea, and I had sought a great variety of curative agents to but little purpose; and suffering from this disease (diarrhea) at this time, I determined to test the new Syrup first upon myself. The results were beyond my expectations. It was a powerful alterative, and the functions of secretion was changed, and define the functions of secretion was changed, and the functions of secretion was changed, and the functions of secretion was changed, and define the functions of secretion was changed, and the functions of secretion was changed and

varied family of diseases known as Scrofula, &c.: that in Dyspepsia it acted with wonderful efficacy." My opinion of its value for the above named diseases, remain, inchanged, and the same as when I wrote Mr Myers in Oct. 1850. I do not recommend it for all the sits of our suffering humanity; but luministiatingly say, that as a remedy for Scrofulous affections I believe it superior to any known curative agent.

It has been sufficiently tested by domestic practice to establish its adoption to extensive assofulness in mitigating human suffering and removing diseases.

But What is the Rock Rose?

The following history of the Rock Rose of this collections of this truly valuable work. Sea Captinum and persons going to sea, should possess Dr. Yonng's Treatise on Marringe, the Pocket Esculapius, or Every one-Itis own Physician. Corp.
